\*N = new entries where reclassification into entries is involved; C = entries with modified file scope where reclassification of documents from the entries is involved; Q = new entries which are firstly populated with documents via administrative transfers from deleted (D) entries. Afterwards, the transferred documents into the Q entry will either stay or be moved to more appropriate entries, as determined by intellectual reclassification; E= existing entries with enlarged file scope, which receive documents from C or D entries, e.g. when a limiting reference is removed from the entry title; M = entries with no change to the file scope (no reclassification); D = deleted entries; F = frozen entries will be deleted once reclassification of documents from the entries is completed; U = entries that are unchanged.

NOTES:

- \*\*No { curly brackets } are used for titles in CPC only subclasses, e.g. C12Y, A23Y; 2000 series symbol titles of groups found at the end of schemes (orthogonal codes); or the Y section titles. The { curly brackets } are used for 2000 series symbol titles found interspersed throughout the main trunk schemes (breakdown codes).
- For U groups, the minimum requirement is to include the U group located immediately prior to the N group or N group array, in order to show the N group hierarchy and improve the readability and understanding of the scheme. Always include the symbol, indent level and title of the U group in the table above.
- All entry types should be included in the scheme changes table above for better understanding of the overall scheme change picture. Symbol, indent level, and title are required for all types except “D” which requires only a symbol.
- #“Transferred to” column must be completed for all C, D, F, and Q type entries. F groups will be deleted once reclassification is completed.
- When multiple symbols are included in the “Transferred to” column, avoid using ranges of symbols in order to be as precise as possible.
- For administrative transfer of documents, the following text should be used: “< administrative transfer to XX>” or “<administrative transfer to XX and YY simultaneously>” when administrative transfer of the same documents is to more than one place.  
Administrative transfer to main trunk groups is assumed to be “invention information”, unless otherwise indicated, and to 2000 series groups is assumed to be “additional information”.

## 2. A. DEFINITIONS (New)

Insert the following **new** definitions.

### A01M

#### Definition statement

*This place covers:*

- Catching or killing insects
- Special adaptations or arrangements or liquid- or powder-spraying apparatus for the purposes covered by this subclass
- Fumigators
- Flame-throwers specially adapted for the purposes covered by this subclass
- Apparatus for the destruction of vermin, noxious animals or unwanted vegetation
- Traps for animals
- Devices or apparatus for killing animals by dispensing poison, or by projectiles
- Scaring or repelling devices
- Hunting appliances

#### Relationships with other classification places

**A01M** provides for the catching, trapping or scaring of animals; yet when these processes are used for the purposes of fishing and apiculture/bee-keeping, they are classified in **A01K**. Furthermore, electric circuits or apparatus specially adapted for catching, trapping and control of animals or adapted for the destruction of insects and animals are classified in **H05C**. Mechanical devices/apparatus for the destruction of vermin, noxious animals and unwanted plants and vegetation are classified in **A01M**; yet biocides, pest repellants, attractants and plant growth regulators are classified in **A01N**.

## References

### Limiting references

*This place does not cover:*

Appliances for catching swarms; Drone-catching devices	A01K 57/00
Fishing	A01K 69/00 - A01K 99/00
Biocides, pest repellants or attractants	A01N

### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Slaughtering or stunning of animals	A22B
Spraying or atomising apparatus, in general	B05B
Equipment for fitting in or to aircraft for dropping or releasing powdered, liquid or gaseous matter, e.g. pesticides, herbicides	B64D 1/16
Electric circuits or apparatus specially designed for use in equipment for killing, stunning, enclosing or guiding living beings	H05C

## Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

Animal	Non-human members of the kingdom Animalia, including, but not limited to, mammals, birds and insects.
Destruction	To destroy or cause the death of a living organism; the non-chemical sterilisation of invertebrates.
Fumigator	Apparatus used to disinfect or purify an area using the fumes of selected chemicals.

PROJECT MP0354

Insect	A class of arthropod animals characterised by an exoskeleton supporting a three-part body (comprising a head, thorax and abdomen), six legs and two antennae.
Killing	To destroy or cause the death of a living organism; the non-chemical sterilisation of invertebrates.
Noxious	Harmful, poisonous or undesirable.
Snare	An anchored noose typically made from wire or cable which tightens around an animal, preventing release or escape.
Vermin	Wild animals, e.g. rodents, which may spread disease or be harmful to crops.
