

## A61H

**PHYSICAL THERAPY APPARATUS, e.g. DEVICES FOR LOCATING OR STIMULATING REFLEX POINTS IN THE BODY; ARTIFICIAL RESPIRATION; MASSAGE; BATHING DEVICES FOR SPECIAL THERAPEUTIC OR HYGIENIC PURPOSES OR SPECIFIC PARTS OF THE BODY (electrotherapy, magnetotherapy, radiation therapy, ultrasound therapy [A61N](#))**

### Definition statement

*This place covers:*

Apparatus or processes which are not used for surgical purposes utilizing mechanical energy transmitted by direct physical contact with the external surface of the thorax portion of human bodies to induce or supplement normal breathing (e.g. iron lungs).

Apparatus or processes, which are not used for surgical purposes that are specially adapted to improve or promote the optical functioning of individuals (e.g. rectify defective vision, improve the natural operation of their eyes) by:

- contacting eyes or their muscles directly to move the eyes,
- subjecting the eyes of individuals to controlled muscle strain,
- utilizing stimulators, such as flash illumination, to cause movement of eyes of individuals in a controlled manner, or
- facilitating or training individuals through practice to move their own eyes in a beneficial manner.

Apparatus or devices that are explicitly designed for use by a single patient or disabled person for the purpose of helping them overcome a physical condition that impairs their ability to walk unassisted across the ground or similar support surface (e.g. crutches).

Apparatus or processes utilizing mechanical energy directly applied upon human bodies for therapy (e.g. massage). These therapy apparatus and processes are intended to facilitate the healing of diseases, promote or assist normal operation of a malfunctioning body part, reduce the impact of injuries, or beneficially influence the condition of disabled body parts either by the physical movement of body parts (e.g. devices for exercising a passive body member) or other types of physical stimulation (e.g. touching) transmitted through contact with:

- external body surfaces or
- surfaces of naturally occurring body cavities.

Apparatus or processes which are not used for surgical purposes utilizing mechanical energy directly applied to human bodies by physical contact therewith (e.g. chiropractic) to treat, alleviate the effects of, or prevent disease or bodily malfunctions (e.g. misalignments of bone, aberrant joint) solely by manipulation, adjustment, or realignment of at least a portion of the skeletal system of the body (e.g. bone joints, tendons, spinal columns) by either:

- impacting external surfaces of bodies to manipulate or adjust portions of their skeletons containing unbroken bones or
- pulling or pushing on the external surfaces of bodies to extend or compress portions of their skeletons containing unbroken bones.

Apparatus or processes which are not used for surgical purposes utilizing mechanical energy directly applied upon human bodies by physical contact (e.g. massage) to rub, stroke, knead, tap, vibrate, or otherwise move a portion of the external surface of human bodies, or the surfaces of their naturally occurring body cavities, to either:

- physically relax individuals,
- physically arouse or stimulate individuals, or
- counteract or relieve bodily pains.

## Definition statement

Apparatus or processes which are not used for surgical purposes (e.g. baths) that are specially adapted for covering, soaking, or immersing human bodies, or portions of bodies, within fluids (e.g. steam, water) or fluent materials (e.g. sand, mud) in a manner that is distinct from the common bathing process for cleaning human bodies and is intended to either:

- counteract or relieve bodily pains,
- physically relax individuals,
- promote or assist healing of injured bodies or their parts, or
- restore to health, or alleviate the effects of sicknesses or other types of abnormal conditions on, bodies or their parts.

Apparatus or processes (e.g. breast baths) specially adapted for covering, soaking, or immersing only one particular part of the human body within fluids (e.g. steam, water) or fluent materials (e.g. sand, seaweed).

Articles of clothing (e.g. sweating suits for therapy) that at least partially enclose human bodies for the primary purpose of increasing the local temperature (e.g. insulated, include heating elements) or humidity (e.g. constructed of partially air tight material) of the portion of the human bodies covered to a point where the localized temperature or humidity is beyond the range that human beings normally consider physically comfortable (i.e. creates localized sauna-like environment) for therapy.

Specially adapted components for the above types of apparatus.

Auxiliary appliances or accessories specially adapted for use with any of the above types of apparatus or process (e.g. reflex point locators).

Other types of apparatus or processes which are not used for surgical (e.g. acupuncture devices) purposes that utilize mechanical energy directly applied to human bodies by physical contact for improving their functioning that are not specifically provided for elsewhere in another subclass.

## Relationships with other classification places

When used with animals

If an apparatus or process is usable for both humans and animals for the same purpose and in the same manner, and it is otherwise proper for this subclass, classification is made only in subclass [A61H](#). Similar devices or processes to those covered by subclass [A61H](#) that are usable exclusively for animals, or are used in animals in a different manner or for different purposes than for humans, are classified in subclass [A61D](#).

When used for physical relaxation

Subclass [A61H](#) covers apparatus or processes that are specially adapted to physically relax or stimulate individuals due either to

- mechanical energy being directly applied upon human body parts to cause their physical movement, or stimulation, by direct physical contact with external surfaces of the body or surfaces of naturally occurring cavities in the body (i.e. massage) or
- the calming or invigorating effects of bathing.

Subclass [A61M](#) covers devices or processes which are specially adapted to cause or precipitate a change in the state of consciousness of humans (e.g. induce sleep, awaken), or to increase or decrease the mental activity of humans while awake, which may also involve relaxing or stimulating individuals.

Medical Treatment

Several subclasses provide for apparatus or processes that are used for treating humans for medical conditions. The relationship between these subclasses is as follows:

Subclass [A61B](#) provides for surgical apparatus or processes in general.

## Relationships with other classification places

Subclass [A61B](#) also provides for surgical apparatus or processes when

- surgical apparatus or processes are combined with means used for other types of treatment (e.g. therapy, massage) for medical conditions or
- the apparatus can be used both for surgery and for other types of treatment for medical conditions.

Subclass [A61H](#) provides for massage, chiropractic, or physical therapy apparatus or processes used for the treatment of disease, injuries, or disability (i.e. an abnormal condition of the body) by utilization of direct mechanical energy.

Subclass [A61N](#) provides for apparatus or processes used for the treatment of disease, injuries, or disability by utilization of forms of energy other than direct mechanical energy.

## Glossary of terms

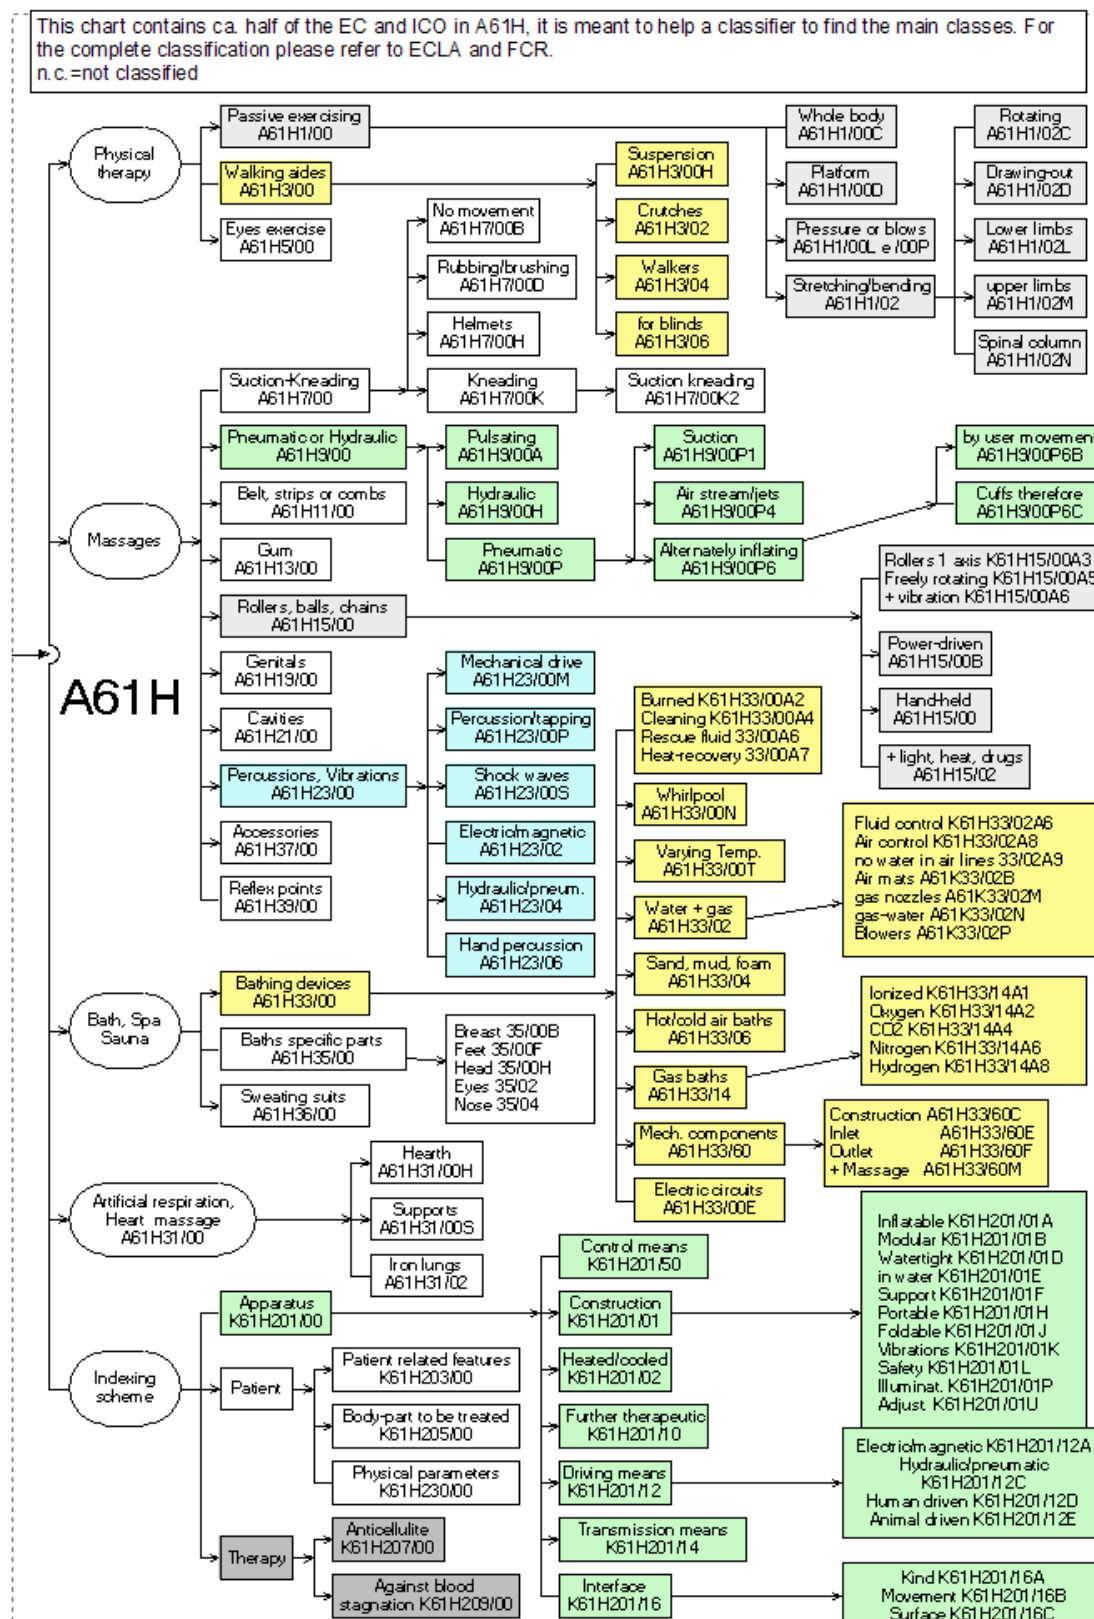

*In this place, the following terms or expressions are used with the meaning indicated:*

Therapy	Any medical treatment of an abnormal condition of a human or animal body (e.g. disease, impaired organ, injured limb) by means, instruments, devices, or methods that utilize forms of energy (e.g. mechanical energy) and which is not used for surgical purposes. In general, the treatment time for therapy is long-term relative to that for surgery which usually has a much more immediate effect on the body.
Disabled person	A human being that is unable to do a basic physical task (e.g. walking) without assistance due to a physical or mental impairment/condition.
Patient	A human being awaiting or undergoing any form of (a) medical care (e.g. testing) or treatment by medical staff (e.g. doctors, dentists, midwives, chiropractors) or (b) physical tending (e.g. feeding) by care providers (e.g. hospice or nursing home staff) due to impairment.

## BODY PLANES

The body-symmetrical plane is also called midsagittal plane or median plane.

## **A61H 1/00**

**Apparatus for passive exercising ([A61H 5/00](#) takes precedence); Vibrating apparatus {(driving means for vibrating [A61H 23/00](#))}; Chiropractic devices, e.g. body impacting devices, external devices for briefly extending or aligning unbroken bones**

### **Definition statement**

*This place covers:*

Apparatus and processes intended to facilitate the healing of diseases, promote or assist normal operation of a malfunctioning body part, reduce the impact of injuries, or beneficially influence the condition of disabled body parts either by the physical movement of body parts (e.g. devices for exercising a passive body member) or other types of physical stimulation (e.g. pressure or blows on a part of the skeletal structure, vibration on the body).

Vibrating apparatus for passive exercising.

Vehicles with legs	<b>B62D57/03</b>
Stairways or ramps	<a href="#">E04F 11/00</a>

### Special rules of classification

Exoskeletons specifically made for aiding disabled persons to walk are classified here in [A61H 3/00](#). If the exoskeleton is bending a joint (i.e. not only for supporting the weight), the joint which is moved has to be classified in [A61H 1/0237](#), the exoskeletons are normally portable [A61H 2201/0157](#) and wearable [A61H 2201/165](#), whereby wearable takes precedence over portable and therefore portable does not have to be coded.

Use orthogonal classification for additional information as well as for invention information ([A61H 2003/001](#) - [A61H 2003/007](#)).

For further additional information the orthogonal classification ([A61H 2201/00](#), [A61H 2230/85](#)) is used.

Instruments or machines for rinsing the teeth	<a href="#">A61C 17/02</a>
---	----------------------------

A61H 15/00

Massage by means of rollers, balls, e.g. inflatable, chains, or roller chains

Definition statement

*This place covers:*

The massage means acting either directly on the skin or on a layer positioned between the skin and the massage means

Roller chains are connected flexible series of links fastening a series of rollers for massaging purposes.

**Definition statement**

*This place covers:*

**A61H 2201/1481**

**Special movement conversion means**

**Definition statement**

*This place covers:*  
Specific applications for massage and therapy devices

**A61H 2201/149**

**rotation-linear or vice versa**

**References**

**Limiting references**

*This place does not cover:*

Single unit containing a itself rotary drive and a conversion system transforming the rotation in a linear movement	<a href="#">A61H 2201/123</a>
---	-------------------------------

**A61H 2201/16**

**Physical interface with patient**

**Definition statement**

*This place covers:*  
Interfaces implying an exchange of forces with the user

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Driving means	<a href="#">A61H 2201/12</a>
Special force transmission means	<a href="#">A61H 2201/14</a>
Electronic interface with the user	<a href="#">A61H 2201/5023</a>

## A61H 2201/1602

kind of interface, e.g. head rest, knee support or lumbar support

### Definition statement

*This place covers:*

Specific features of the interface with the patient

### Special rules of classification

Part of the body to be treated to be classified in [A61H 2205/00](#)

## A61H 2201/1604

Head

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Devices for treating head	<a href="#">A61H 2205/02</a>
Chairs with support for the head	<a href="#">A47C 7/38</a>
Beds, sofas or the like with support for the head	<a href="#">A47C 20/00</a>

## A61H 2201/1607

Holding means therefor

## References

### Limiting references

*This place does not cover:*

holding means for the head for active exercising	<a href="#">A63B 21/4003</a>

holding means for the back for active exercising	<a href="#">A63B 21/4007</a>
--	------------------------------

**A61H 2201/1628****Pelvis****Definition statement***This place covers:*

Also waist

**References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Devices for treating the crotch	<a href="#">A61H 2205/085</a>
Devices for treating the buttocks	<a href="#">A61H 2205/086</a>
Devices for treating the genitals	<a href="#">A61H 2205/087</a>
Devices for treating the hip	<a href="#">A61H 2205/088</a>

**A61H 2201/163****holding means therefor****References****Limiting references***This place does not cover:*

holding means for the waist for active exercising	<a href="#">A63B 21/4009</a>
---	------------------------------

**A61H 2201/1633****Seat ([A61H 2201/0149](#) takes precedence)****References****Limiting references***This place does not cover:*

Benches for active exercising	<a href="#">A63B 21/4029</a>
-------------------------------	------------------------------

**Informative references***Attention is drawn to the following places, which may be of interest for search:*

Chairs	<a href="#">A47C 1/00</a>
--------	---------------------------

## A61H 2201/1635

Hand or arm, e.g. handle (hand-held, [A61H 2201/0153](#); fore-arm support, [A61H 2003/006](#))

### Definition statement

*This place covers:*

also handrails

### References

#### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Devices for treating the arms	<a href="#">A61H 2205/06</a>
Devices for treating the hands	<a href="#">A61H 2205/065</a>
Chairs with support for the arms	<a href="#">A47C 7/54</a>
Beds, sofas or the like with support for the arms	<a href="#">A47C 20/023</a>

## A61H 2201/1638

Holding means therefor

### References

#### Limiting references

*This place does not cover:*

holding means for the upper limb for active exercising	<a href="#">A63B 21/4017</a>
--	------------------------------

## A61H 2201/164

Feet or leg, e.g. pedal

### Definition statement

*This place covers:*

all parts of leg, e.g. knee

### References

#### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Devices for treating the legs	<a href="#">A61H 2205/10</a>
Chairs with support for the legs or feet	<a href="#">A47C 7/50</a>
Stand alone support for the legs or feet	<a href="#">A47C 16/00</a>
Beds, sofas or the like with support for the legs	<a href="#">A47C 20/021</a>

**A61H 2201/1642****Holding means therefor****References****Limiting references***This place does not cover:*

holding means for the lower limbs for active exercising	<a href="#">A63B 21/4011</a>
---	------------------------------

**A61H 2201/1645****contoured to fit the user****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

for active exercising	<a href="#">A63B 21/4039</a>
-----------------------	------------------------------

**A61H 2201/1647****the anatomy of a particular individual****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Automatically adjusted according to anthropometric data of patient	<a href="#">A61H 2201/0196</a>
--	--------------------------------

**A61H 2201/165****Wearable interfaces****Definition statement***This place covers:*

interface to be worn and portable or attachable to a massaging or exercising device, i.e. a vest or a armband which can be used alone or attached to a machine and enables at least small movements of the user respect to the machine (NOT a band attached to a device and used for fixing a user to the device)

**References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Portable	<a href="#">A61H 2201/0157</a>
holding means for body specific parts	<a href="#">A61H 2201/1602</a>

A61H 2201/1652

Harness

Definition statement

*This place covers:*

A set of straps enabling the application of a force in at least one direction to a person carrying it without sliding-off, alone or within a garment

US7993248

References

Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Body harness	<a href="#">A62B 5/00</a>
--------------	---------------------------

A61H 2201/1654

Layer between the skin and massage elements, e.g. fluid or ball

Definition statement

*This place covers:*

To be used for all kind of massages, when a layer is used between the user and the massage elements, e.g. for protecting, for keeping dry, for distributing the force on the skin.

A61H 2201/1657

Movement of interface, i.e. force application means

Definition statement

*This place covers:*

Movement of the part of the device which is contact with the patient

References

Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Electronic interface with the user	<a href="#">A61H 2201/5023</a>
------------------------------------	--------------------------------

A61H 2201/1659

Free spatial automatic movement of interface within a working area, e.g. Robot

Definition statement

This place covers:  
Three-dimensional movement freely programmable according to the needs

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Free movement of interface for active exercising	<a href="#">A63B 21/4043</a>
--	------------------------------

A61H 2201/1661

Wobbling interface, e.g. Stewart platform or Hexapod (nutating movement, [A61H 2001/0207](#))

Definition statement

This place covers:

References

Limiting references

This place does not cover:

Nutating movement	<a href="#">A61H 2001/0207</a>
Wobbling plate as transmission means	<a href="#">A61H 2201/1427</a>

A61H 2201/1664

linear

References

For active exercising	<a href="#">A63B 2230/505</a>
-----------------------	-------------------------------

**A61H 2230/60**

**Muscle strain, i.e. measured on the user, e.g. Electromyography [EMG]**

**Definition statement**

*This place covers:*  
muscle activity
