

B61F

RAIL VEHICLE SUSPENSIONS, e.g. UNDERFRAMES, BOGIES OR ARRANGEMENTS OF WHEEL AXLES; RAIL VEHICLES FOR USE ON TRACKS OF DIFFERENT WIDTH; PREVENTING DERAILING OF RAIL VEHICLES; WHEEL GUARDS, OBSTRUCTION REMOVERS OR THE LIKE FOR RAIL VEHICLES (for vehicles in general [B60](#); axles or wheels [B60B](#); vehicle tyres [B60C](#))

Definition statement

This place covers:

- Parts of railway vehicles that are located under the body of the car, and that serves to support, guide and move the body on the rail;
- Parts of rail vehicles for cooperating with tracks of different widths;
- Devices or parts which prevent derailing;
- Means to protect vulnerable components on the lower side of the car body, e.g. wheel guards or obstruction removers

B61F 1/00

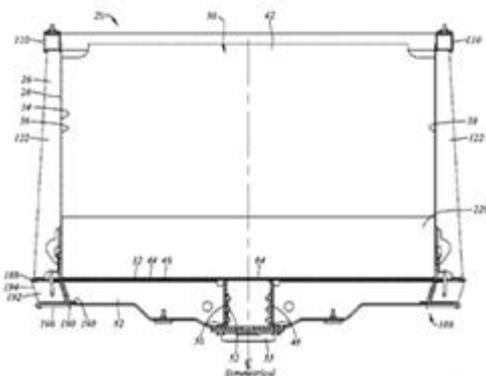

Underframes (making railway vehicle underframes by forging or pressing [B21K 7/12](#))

Definition statement

This place covers:

Constructional features of frameworks for carrying the main body structure.

Following drawing shows one example:

B61F 3/00

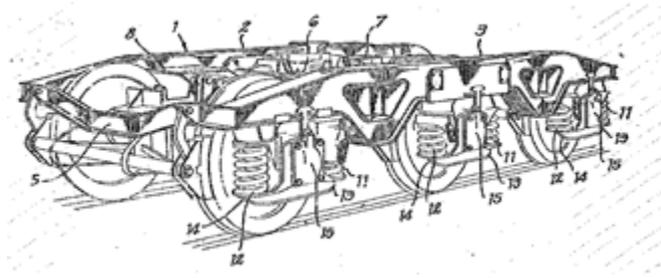

Types of bogies ([B61F 5/00](#) takes precedence)

Definition statement

This place covers:

Constructional features of bogies relating to the numbers of driven/undriven axle used, bogies for articulated railway vehicles, and air drag reducing details.

Following drawing shows one example:

B61F 5/00

Constructional details of bogies; Connections between bogies and vehicle underframes; Arrangements or devices for adjusting or allowing self-adjustment of wheel axes or bogies when rounding curves

Definition statement

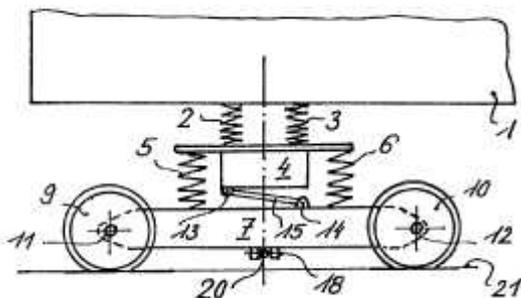

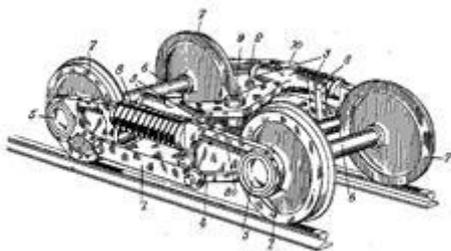

This place covers:

Details of bogies and their connections to the vehicle underframe to improve the running characteristic of the bogie, to reduce wear of the rail and prevent derailment of the vehicle.

Typical examples are:

- Method for optimizin guidance of railway vehicles.
- Railroad car truck suspension yaw stabilizer.
- Pneumatic spring between bogie and underframe.
- Self-steering bogies.
- Railway truck leveling device.
- Bogie for tilting-body type railcar.
- Lightweight truck bolster for railcar.

Following drawing show two examples:

B61F 7/00

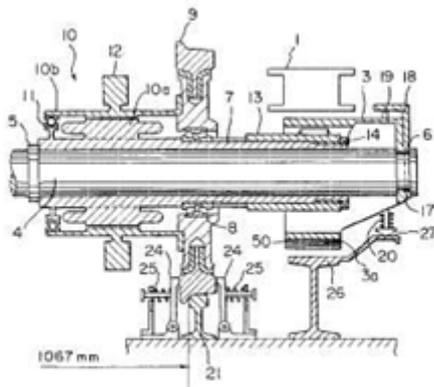

Rail vehicles equipped for use on tracks of different width

Definition statement

This place covers:

The title of this group is self-explanatory and do not need to be more specified.

Following drawing shows one example:

B61F 9/00

Rail vehicles characterised by means for preventing derailing, e.g. by use of guide wheels

Definition statement

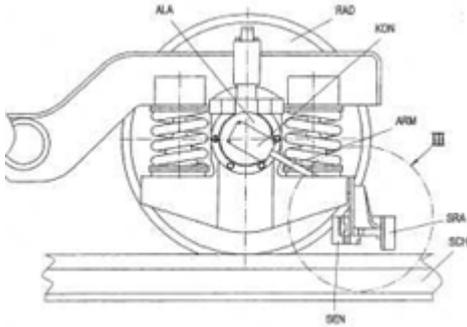

This place covers:

Devices and methods to prevent derailment of the railway vehicle. It concerns additional components that are mounted on the vehicle.

Typical examples are:

- Derailment detector unit.
- Rail vehicle with guiding device.
- Inductive derailment sensor.

Following drawing shows one example (EP1422119):

B61F 11/00

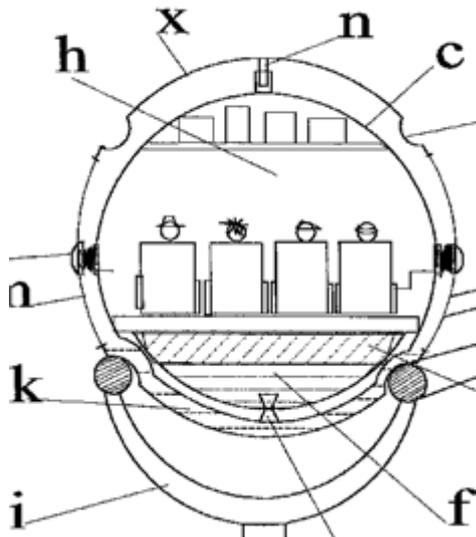

Rail vehicles characterised by rail-engaging elements other than wheels, e.g. balls

Definition statement

This place covers:

The title of this group is self-explanatory and do not need to be more specified.

Following drawing shows one example (DE29509473U):

B61F 13/00

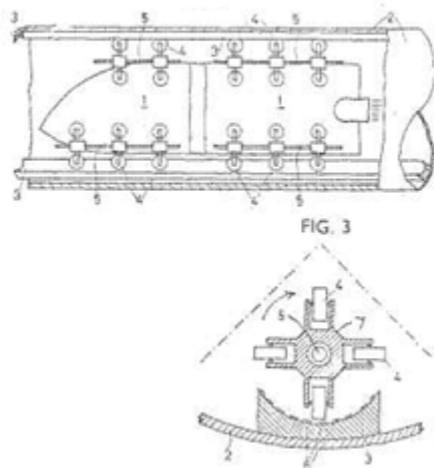

Rail vehicles characterised by wheel arrangements, not otherwise provided for

Definition statement

This place covers:

Railway vehicles having a wheel arrangement configuration that is not of the conventional type.

Following drawing shows one example:

B61F 17/00

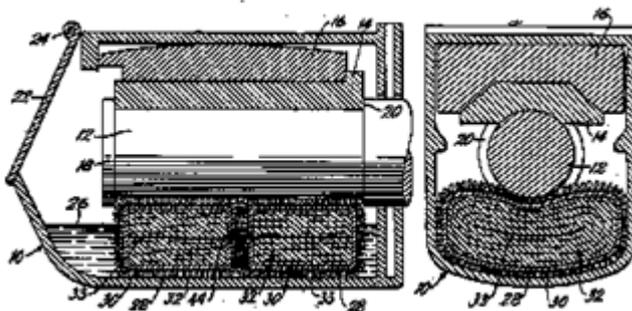

Lubrication specially adapted for axle-boxes of rail vehicles (lubrication in general [F16N](#))

Definition statement

This place covers:

The titles of this group are self-explanatory and do not need to be more specified.

Following drawing shows one example:

B61F 19/00

Wheel guards; Bumpers; Obstruction removers or the like (for vehicles in general [B60R 19/00](#))

Definition statement

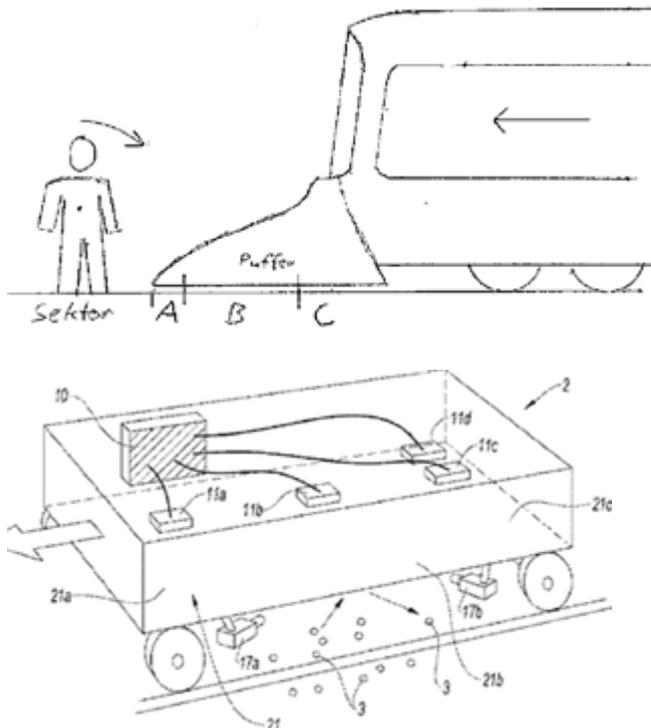

This place covers:

Devices and methods to protect the railway vehicle components from obstacle, e.g. ballast, or to minimize consequences of collisions with pedestrians.

Typical examples are:

- Method and device to detect impacts on specific zones on a railway vehicle.
- Collision protection system for rail vehicles.
- Track sweeper for rail vehicle.

Following drawings show two examples:
