#### **E01C**

CONSTRUCTION OF, OR SURFACES FOR, ROADS, SPORTS GROUNDS, OR THE LIKE; MACHINES OR AUXILIARY TOOLS FOR CONSTRUCTION OR REPAIR (forming roads or like surfaces by compacting or grading snow or ice E01H)

### **Definition statement**

This place covers:

Outdoor pavements and their foundations:

- · General design or layout of roads;
- · Paving made of prefabricated single units;
- · Coherent paving made in situ;
- · Special paving;
- Details of paving:
- Paving or foundation specially adapted for playgrounds or sports grounds;
- Paving specially adapted for footpaths, sidewalks or cycle tracks;
- · Pavements lights.

Machines and methods for making, placing, working or repairing road surfacing and its foundations.

# Limiting references

This place does not cover:

Bridges	<u>E01D</u>
Equipments for roads; traffic islands; drainage of the sub-base of roads	<u>E01F</u>
Forming roads or like surfaces by compacting or grading snow or ice	<u>E01H</u>

#### Informative references

Attention is drawn to the following places, which may be of interest for search:

Foundations in general	<u>E02D</u>
Dredging; Soil shifting	<u>E02F</u>
Indoor flooring	<u>E04F</u>

### Special rules of classification

Further details of paving elements not covered by the groups <u>E01C 5/00</u>, <u>E01C 9/00</u> and <u>E01C 11/00</u>, e.g. spacing features, interlocking, joining or drainage details are additionally classified in <u>E01C 2201/00</u>.

Further machine characteristics, parts or accessories not covered by the groups <u>E01C 19/00</u>, <u>E01C 23/00</u>, i.e. feeding devices for pavers, heated screeds, extendable screeds, screed or paver accessories and cabin details are additionally classified in E01C 2301/00.

Outdoor paving surfaces made of, or comprising synthetic grass are always classified in <u>E01C 13/08</u>, even when not disclosed as being adapted for sports.

### E01C 1/00

Design or layout of roads, e.g. for noise abatement, for gas absorption (design or layout of sports grounds  $\underline{A63C\ 19/00}$ ; design or layout of airfields  $\underline{B64F}$  {, of helicopter landing stages  $\underline{E01F\ 3/00}$ })

#### **Definition statement**

This place covers:

General layout of roads incl.

- · street systems and cross-sections of roads, as well as
- special road design for noise abatement or for compelling drivers to slow down,
- · arrangements for gas absorption and
- · road crossings.

### E01C 3/00

Foundations for pavings (specially adapted for playgrounds or sports grounds E01C 13/02; foundations in general E02D)

## **Definition statement**

This place covers:

Arrangements of foundations; Use of special materials for building up the foundation layers of the road; Protecting foundations from destructive influences.

# Relationships with other classification places

<u>E01C 3/02</u> is not used: Concrete base for bituminous paving made in situ is usually classified in E01C 7/32 and in the relevant sub-groups of E01C 7/08.

# Special rules of classification

E01C 3/02 is not used.

# E01C 5/00

Pavings made of prefabricated single units (specially adapted for playgrounds or sports grounds <u>E01C 13/04</u>, for footpaths, sidewalks or cycle tracks <u>E01C 15/00</u>; making artificial stones <u>C04B</u>; building stones <u>E04C</u>; flooring <u>E04F</u>)

#### **Definition statement**

This place covers:

The covering of roads or sidewalks consisting of prefabricated single units:

- · paving units characterised by their materials;
- · reinforced paving units;
- paving units characterised by the material used for beds or joints or characterised by the way of laying.

Prefabricated foundation elements and individual couplings for these paving units.

#### Relationships with other classification places

Prefabricated paving units for sidewalk are generally classified here if they concern paving slabs for forming the surface covering the sidewalk; if they concern special paving elements or sets for forming the sidewalk itself, then they should be classified in <u>E01C 15/00</u>.

Shaping plastic materials incl. moulds	<u>B29C</u>
Making artificial stones	<u>C04B</u>
Structural elements for building incl. building blocks or building slabs	E04C
Indoor flooring	E04F 15/00

# Special rules of classification

Paving elements consisting of material not defined or consisting of several possible different materials should be classified in  $\underline{\text{E01C 5/00}}$ .

Paving elements consisting of al least two different materials in one element, e.g. rubber topping over concrete layer, should be classified in <u>E01C 5/22</u>.

Details within the paving unit itself concerning special surface design, special paving arrangements, drainage or interconnection should also be classified in <u>E01C 2201/00</u>.

### E01C 7/00

Coherent pavings made in situ (specially adapted for playgrounds or sports grounds <u>E01C 13/06</u>; for footpaths, sidewalks or cycle tracks <u>E01C 15/00</u>)

#### **Definition statement**

This place covers:

Roads surfaces including road toppings, consisting of coherent paving made at the place of use, the road surfaces being made of road-metal with or without binders or by subjecting soil to stabilisation.

Repairing of concrete or bituminous roads.

### Relationships with other classification places

Foundations for paving made in situ are usually classified in  $\underline{\text{E01C } 3/00}$ , except of concrete base foundation for bituminous paving, which is classified in  $\underline{\text{E01C } 7/32}$  and in the relevant sub-groups of  $\underline{\text{E01C } 7/08}$ .

If the chemical aspect of the composition of the concrete or bituminous paving layer is relevant it should normally belong to  $\underline{\text{C04B}}$  or  $\underline{\text{C08L 95/00}}$  and not to  $\underline{\text{E01C 7/00}}$ .

Cement like composition	<u>C04B</u>
Bituminous composition	C08L 95/00
Soil stabilising materials	C09K 17/00

# Special rules of classification

Classes <u>E01C 7/20</u>, <u>E01C 7/22</u> and <u>E01C 7/24</u> are not used.

If the coherent paving is made of courses of different kind made in situ, it should be classified in <u>E01C 7/32</u>, except for thin intermediate or thin surface layers such as surface dressing, which should be classified in the relevant sub-groups of <u>E01C 7/35</u>.

### **Glossary of terms**

In this place, the following terms or expressions are used with the meaning indicated:

Road-metal	Aggregate
Coherent paving	Paving made of a mass of cohering material

### E01C 9/00

Special pavings (specially adapted for playgrounds or sports grounds <u>E01C 13/00</u>, for footpaths, sidewalks or cycle tracks <u>E01C 15/00</u>); Pavings for special parts of roads or airfields (pavement lights <u>E01C 17/00</u>; manholes or like covers or frames <u>E02D 29/14</u>)

#### **Definition statement**

This place covers:

Paving elements poured in situ.

Coverings, the surface of which consists partly of prefabricated units and partly of sections made in situ.

Pavings for special parts of roads or with special functionality, incl.:

- · pavings specially adapted for allowing vegetation,
- · vehicle decelerating or arresting surfacings,

**Definition statement** 

- paving take-off areas for vertically starting aircraft,
- · wheel tracks,
- pavings for railroad level-crossings,
- · pavings adjacent tramways rails,
- temporary pavings or
- steel gratings.

# Relationships with other classification places

Details of special paving should also be classified in the relevant sub-groups of  $\underline{\text{E01C 5/00}}$ ,  $\underline{\text{E01C 11/00}}$  and/or  $\underline{\text{E01C 2201/00}}$ .

Details of pavings {(E01C 1/005, E01C 5/003, E01C 5/005, E01C 7/145, E01C 7/185, E01C 7/325 take precedence)}

#### **Definition statement**

This place covers:

Methods or materials for repairing paving.

Details of paving incl.:

- · joint constructions,
- · reinforcements,
- · gutters and kerbs and
- methods for preventing slipperiness on roads, including permanently installed heating devices.

## Relationships with other classification places

Gutters for roads are normally classified in the relevant sub-groups of <u>E01C 11/22</u>, but if the invention relates to gully gratings, gullies adapted to be used with kerbs or interconnections of pipes with gutters, then it should be classified in <u>E03F</u>.

Methods or arrangements for preventing slipperiness or protecting against influences of the weather are normally classified in <u>E01C 11/24</u> if they concern methods or arrangements applying within the paving itself, such as use of special additives to the paving material or permanently installed heating elements. If they concern methods or arrangements applying on the surface such as spreading gripping or thawing materials, then they should be classified in <u>E01H 10/00</u> or in <u>E01C 19/20</u> if they concern spreading machines for wintry services, which are not specially adapted for treating wintry roads but could also be used for spreading other materials.

# E01C 19/00

Machines, tools or auxiliary devices for preparing or distributing paving materials, for working the placed materials, or for forming, consolidating, or finishing the paving (surface stabilisation <u>E01C 21/00</u>; apparatus specially adapted for reconditioning or repairing paving <u>E01C 23/00</u>)

### **Definition statement**

This place covers:

Devices or methods for preparing and/or applying paving material, and/or consolidating and/or finishing the road surface.

Devices for guiding or controlling the machines along a predetermined path.

Removable forms or shutterings for road-building purposes.

Devices or arrangements for forming individual paving elements, e.g. kerbs or by sectioning a freshly laid slab, in situ.

Apparatus for laying individual preformed surfacing elements.

### Relationships with other classification places

The devices or methods for placing paving material treat paving material as such and not joint material, curing means, prefabricated underlays, reinforcing elements or traffic markings, which are classified in the relevant sub-groups of <u>E01C 23/00</u>.

The devices or methods for finishing the road surface are devices for smoothing, roughening or patterning freshly laid paving. Devices for working existing road surfaces are classified in <u>E01C 23/06</u>. Devices for making grooves or like channels in not-yet-hardened paving, or for curing, heating or drying paving are classified in the relevant sub-groups of <u>E01C 23/00</u>.

Spreaders for gripping or thawing materials are also classified in the relevant sub-groups of E01C 19/20, if they concern spreaders for wintry services, which are not specially adapted for treating wintry roads but could also be used for spreading other materials. If they are specially adapted for that use, they are classified in E01H 10/00.

Auxiliary devices or arrangements for constructing, repairing, reconditioning, or taking-up road or like surfaces (apparatus for reconditioning of salvaged non-hydraulic compositions (for- in plant recycling of salvaged bituminous mixtures) E01C 19/10)

#### **Definition statement**

This place covers:

Apparatus or methods focussed on work carried out on existing surfaces, like roughening, cutting, reconditioning or marking out.

Devices for setting-out or checking the configuration of new surfacing; Applications of apparatus for measuring, indicating, or recording the surface configuration of existing surfacing.

Devices for making, treating or filling grooves in not-yet-hardened paving; Devices for introducing inserts or removable insert-supports in not-yet-hardened paving.

Arrangements for curing paving; Devices for applying curing means; Devices for laying prefabricated underlay; Protecting paving under construction or while curing.

Devices for laying reinforcing elements or dowel bars; Removable support for reinforcing elements; Devices for making essentially horizontal ducts in paving.

Devices for installing or removing forms.

Devices for heating or drying foundation, paving, or materials thereon.

#### Relationships with other classification places

Devices for working existing road surfaces are classified in the relevant sub-groups of E01C 23/06. Devices for smoothing, roughening or patterning freshly laid paving are classified in E01C 19/42 - E01C 19/44.

Milling drums for working road surfaces are classified in  $\underline{E01C\ 23/088}$ ; however, if the invention concerns the cutter bits as such, then it should be classified in  $\underline{B28D\ 1/186}$ .
