

E05F

DEVICES FOR MOVING WINGS INTO OPEN OR CLOSED POSITION; CHECKS FOR WINGS; WING FITTINGS NOT OTHERWISE PROVIDED FOR, CONCERNED WITH THE FUNCTIONING OF THE WING

Definition statement

This place covers:

Devices for moving wings, such as doors or windows, into open or closed position; checks for wings, such as doors or windows; wing fittings not otherwise provided for, concerned with the functioning of the wing.

Gravity-, spring-, or power-operated devices to provide a force input for opening or closing wings, such as door openers and door closers, self-closing hinges and hinges with wing-counterbalancing function.

Also covered are operating mechanisms for wings constructed to convert the force input from a user, motor, opener or closer into movement of a wing, such as cable-, cord-, chain-, or belt-drives, lifting arms, rack and pinion drives or screw and nut arrangements.

The subclass furthermore covers braking devices, stops and buffers for wings as well as controlling means, such as remote wireless control means, and safety devices such as obstruction detection devices.

Relationships with other classification places

Hinges and other suspension devices for wings in [E05D](#).

Locks for doors and windows in [E05B](#) and [E05C](#).

Construction of doors, windows, gates and frames in buildings in [E06B](#).

Construction of doors, windows, and other moveable wings in vehicles in [B60J](#).

References

Limiting references

This place does not cover:

Counterbalancing means for sliding or lifting wings	E05D 13/10
---	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Operating or controlling devices for fire-barriers	A62C 2/24
Operating mechanisms for safeguarding bank teller windows	E05G 5/00
Operating mechanisms for interconnected lamellae	E06B 7/086

Springs per se	F16F
Electric motors per se	H02K , H02P

Special rules of classification

Closers, openers, braking devices, stops and buffers for wings: [E05F 1/00](#), [E05F 3/00](#) and [E05F 5/00](#).

Accessories for wings: [E05F 7/00](#).

Operating mechanisms for wings: [E05F 9/00](#), [E05F 11/00](#), [E05F 13/00](#), [E05F 15/00](#) and [E05F 17/00](#).

Controlling means, such as remote wireless controls means, and safety devices such as obstruction detection devices: [E05F 15/00](#).

A number of main groups in this sub-class contain a large number of older documents that were classified administratively. These documents have not yet been classified into the sub-groups and are indexed with [E05Y 2800/00](#). This index should not be used for classification.

Under [E05Y 2900/00](#) and lower an indexing scheme exists for information on the application or use of the devices. The indexing scheme is shared with the sub-class [E05D](#).

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Braking device	Devices constructed to slow down the movement of wings
Closer	Gravity-, spring- or power-operated device constructed to provide a closing force to wings over a substantial part of their movement; includes devices for assisting users in wing-movement or for wing-counterbalancing; a closer can take the shape of a self-closing hinge
Opener	Gravity-, spring- or power-operated device constructed to provide an opening force to wings over a substantial part of their movement; includes devices for assisting users in wing-movement or for wing-counterbalancing
Operating mechanism for wings	Mechanism constructed to convert force inputs from a user, motor, opener or closer into movement of wings
Self-closing hinge	Gravity- or spring-operated hinge constructed to provide a closing force to wings over a substantial part of their movement; includes devices for wing-counterbalancing
Vehicle	Land vehicles, e.g. cars, trucks, buses or trains
Wing	Pivotable, slideable, or otherwise moveable part of doors, windows, flaps, covers or similar structures to prevent traffic through a passageway in building construction and outfitting, fences, domestic appliances, vehicles and furniture; the term also includes drawers, lids of chests, car boots/trunks or car bonnets/hoods

E05F 1/00

Closers or openers for wings, not otherwise provided for in this subclass

Definition statement

This place covers:

Gravity-, or spring-operated closers or openers for wings including those in the shape of hinges, i.e. self-closing hinges.

Relationships with other classification places

Power-operated door closers or openers in [E05F 15/00](#).

E05F 1/002

{controlled by automatically acting means (for powered-operated mechanisms [E05F 15/70](#))}

E05F 1/12

Mechanisms in the shape of hinges or pivots, operated by springs

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Hinges with springs applying a holding force, e.g. a hold-closed force to hold the hinge and respective wing in an immobile closed position	E05D 11/1014
---	------------------------------

Special rules of classification

If the hinges comprises two or more pins, [E05D 3/06](#) applies in addition to [E05F 1/12](#).

E05F 3/00

Closers or openers with braking devices, e.g. checks; Construction of pneumatic or liquid braking devices (construction of non-pneumatic or non-liquid braking devices [E05F 5/00](#); friction devices in hinges [E05D 11/08](#))

Definition statement

This place covers:

Closers and openers, including self-closing hinges, with integrated braking devices such as rotary or piston fluid brakes, friction brakes or counteracting springs.

Construction of braking devices for such closers and openers.

Closers with integrated braking devices and additional arrangements, e.g. holding the wing open or assisting in opening the wing.

Relationships with other classification places

Construction of non-pneumatic or non-liquid braking devices for wings are classified in [E05F 5/00](#) and subgroups.

Stops and buffers for wings are classified in [E05F 5/00](#) and subgroups.

References

Informative references

Friction devices between relatively-movable hinge parts	E05D 11/08
Devices for preventing movement between relatively-movable hinge parts	E05D 11/10

E05F 3/221

{Mechanical power-locks, e.g. for holding the wing open or for free-moving zones}

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Mechanical power-lock	Mechanically operated lock for holding wing in position other than closed – includes spring operated
-----------------------	--

E05F 5/00

Braking devices, e.g. checks; Stops; Buffers (construction of pneumatic or liquid braking devices [E05F 3/00](#); braking devices, buffers or end stops on drawers for tables, cabinets or like furniture [A47B 88/473](#); combined with devices for holding wings open [E05C 17/00](#); devices for limiting opening of wings or for holding wings open by a movable member extending between frame and wing [E05C 17/04](#))

Definition statement

This place covers:

Construction of braking devices, stops and buffers for wings.

References

Limiting references

This place does not cover:

Construction of pneumatic or liquid braking devices	E05F 3/00
Braking devices, buffers or end stops on drawers for tables, cabinets or like furniture	A47B 88/473
Braking devices combined with devices for holding the wing	E05C 17/00
Devices for limiting opening of wings	E05C 17/04

Informative references

Attention is drawn to the following places, which may be of interest for search:

Indexing scheme related to brakes, disengaging means, holders, stops and valves	E05Y 2201/20
---	------------------------------

Special rules of classification

[E05F 5/00](#) provides classification entries for braking devices, stops or buffers associated with wings characterised by their wing movement.

The indexing codes under [E05Y 2201/20](#) are used to classify further details not available in the main trunk. In particular, the indexing codes as foreseen under [E05Y 2201/21](#) and [E05Y 2201/224](#) are used to classify braking devices, stops or buffers combined with motors associated with wings.

The indexing codes under [E05Y 2201/21](#) and [E05Y 2201/224](#) are however not applied when classification symbols in [E05F 5/00](#) or subgroups are being allocated for inventive information.

Looping references between [E05F 5/00](#) and [E05F 3/00](#) have been identified. Until this inconsistency is resolved in IPC, the current classification practice in CPC is as follows: Reference [E05F 3/00](#) is limiting in the subgroup [E05F 5/00](#). CPC will be corrected once this inconsistency is resolved in IPC.

E05F 7/00

Accessories for wings not provided for in other groups of this subclass (specially adapted for furniture [A47B 95/00](#); door-lifters [B66F](#), [E04F 21/00](#); knobs or handles [E05B](#))

Definition statement

This place covers:

Accessories or devices providing additional control to the wing, e.g. devices for alignment of the wing, rattling control, or devices to take the wing's weight arranged away from a hinge axis.

Relationships with other classification places

Accessories for sliding or lifting wings in [E05D 13/00](#)

Accessories for hinges in [E05D 11/00](#)

Door lifters in [B66F](#)

Knobs and handles in [E05B](#)

Limiting references

This place does not cover:

Means for transmitting movements between vertical and horizontal sliding bars, rods, or cables in wings opening about a vertical as well as a horizontal axis	E05D 15/5208
---	------------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Means for transmitting movements between vertical and horizontal sliding bars, rods or cables, for the fastening of wings	E05C 9/24
---	---------------------------

Special rules of classification

Looping references between [E05F 7/08](#) and [E05C 9/24](#) have been identified. Until this inconsistency is resolved in IPC, the current classification practice in CPC is as follows: References [E05C 9/24](#) and [E05F 7/08](#) are non-limiting. CPC will be corrected once this inconsistency is resolved in IPC.

E05F 9/00

Means for operating wings by hand rods not guided in or on the frame, including those which also operate the fastening (bolts or fastening devices for wings [E05C](#))

Definition statement

This place covers:

Hand-held rods constructed to operate wing bolts or fastenings and to operate by hand the wings per se.

Relationships with other classification places

Bolts or fastening devices for wings in [E05C](#)

Gravity-, or spring-operated closers or openers for wings in [E05F 1/00](#)

Power-operated door closers or openers in [E05F 15/00](#)

E05F 11/00

Man-operated mechanisms for operating wings, including those which also operate the fastening (connecting mechanisms for a plurality of wings [E05F 17/00](#))

Definition statement

This place covers:

Operating mechanisms in wings, casings or frames constructed to convert the manual force input from a user into movement of a wing, such as belt-, cable-, cord-, or chain-drives, lifting arms, rack and pinion drives or screw and nut arrangements.

Relationships with other classification places

Operating mechanisms for wings constructed to convert the force input from a motor into movement of a wing are classified in [E05F 15/603](#).

Operating mechanisms for wings constructed to convert the force input from the weight of a person or vehicle into movement of a wing are classified in [E05F 13/00](#).

References**Informative references**

Automatic	Independent of external or manual control, i.e. control by detection, sensing or measuring
-----------	--

E05F 15/71**responsive to temperature changes, rain, wind or noise****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Responsive to emergency conditions, e.g. fire	E05F 15/72
Indexing code for physical protection against high or low temperatures	E05Y 2800/414

E05F 15/72**responsive to emergency conditions, e.g. fire****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Operating or controlling mechanisms for physical fire-barriers	A62C 2/24
Locks actuating in response to heat	E05B 65/104
Indexing code for physical protection against fire	E05Y 2800/416
Indexing code for physical protection against smoke or gas	E05Y 2800/42

E05F 15/76**responsive to devices carried by persons or objects, e.g. magnets or reflectors
([E05F 15/77](#) takes precedence)****References****Limiting references***This place does not cover:*

Wireless control devices carried by persons or objects	E05F 15/77
--	----------------------------

E05F 15/77**using wireless control****Definition statement***This place covers:*

Automatic wireless control of wings, e.g. programmable control transmitted wirelessly.

E05F 15/78**using light beams****Definition statement***This place covers:*

Wireless control using light beams, e.g. infrared control.

E05F 17/00**Special devices for shifting a plurality of wings operated simultaneously
(for simultaneously moving a plurality of interconnected ventilating lamellae
[E06B 7/086](#))****Definition statement***This place covers:*

Operating mechanisms for wings constructed to convert the force input from a user, motor, opener or closer into simultaneous movement of several wings.

References**Informative references***Attention is drawn to the following places, which may be of interest for search:*

Simultaneously moving a plurality of interconnected ventilating lamellae	E06B 7/086
