

F16B

DEVICES FOR FASTENING OR SECURING CONSTRUCTIONAL ELEMENTS OR MACHINE PARTS TOGETHER, e.g. NAILS, BOLTS, CIRCLIPS, CLAMPS, CLIPS, WEDGES, JOINTS OR JOINTING

Definition statement

This place covers:

Fastening elements for constructional parts per se, such as: clamps, clips, dowels, nails, staples, bolts without screw thread, pins, rivets, circlips, self-cutting screws, screws and bolts with thread, nuts, lock-nuts, threaded inserts, washers, hooks, suction cups

The connection of constructional elements such as key-type connections, shrinkage connections, joining of sheets and plates, connections of rods or tubes mutually or to flat surfaces at an angle, connections of constructional elements by sticking or pressing them together, joining of furniture, connections of constructional elements by a part of one element entering a hole in the other

The fastening elements or connection of elements in this group can be employed in multiple technical application fields. However, the focus is on the fastening element or the connection of elements itself.

Relationships with other classification places

Fastening elements in this subclass are characterised by their constructional or functional aspects. Fastening elements which are specially adapted or designed for a specific technical application are generally rather classified in the specific technical application field.

Rail joints	E01B 11/00
Connections for buildings	E04

For building constructions	E04B 1/38
Clamping means for down pipes for roof drainage	E04D 13/08
For hand railings	E04F 11/18
Fastening scaffolds against buildings	E04G 5/04
Scaffold couplings	E04G 7/00
For fencing	E04H 17/00
Bolts or fasteners for wings, specially for doors or windows	E05C
Locking bearings for parts moving only linearly	F16C 29/10
Hooks as integral parts of chains	F16G 17/00
Pipe joints	F16L
Supports for pipes, cables or protective tubing, e.g. hangers, holders, clamps, cleats, clips, brackets	F16L 3/00
Clips for connecting hoses to rigid members	F16L 33/02
Magnetic holding devices	H01F 7/00
Electrostatic holding devices	H02N 13/00

Informative references

Attention is drawn to the following places, which may be of interest for search:

Manufacture of threaded fastening means	B21H , B21K , B23G
Screw mechanisms	F16H

Special rules of classification

As a general rule, multiple classifications can be attributed to one document. Symbols for inventive information and additional information are attributed to the corresponding fields.

If there are interesting functional features of an invention specially adapted for an application, at least a symbol for additional information in [F16B](#) should be given to this document.

Many documents describe a fastening element itself and a connection comprising the fastening element. If the focus of such a document lies e.g. on the fastening element itself, a symbol for inventive information should be given for the fastening element and a further symbol for additional information should be given for the connection and vice versa according to the focus.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Connections using screw-thread elements	the connection is established by the screw-thread element
A screw acts on another element in order to establish a clamped connection	a connection using clamps

F16B 1/00

Devices for securing together, or preventing relative movement between, constructional elements or machine parts

Definition statement

This place covers:

Securing devices making use of shape memory alloys, hydraulic or pneumatic action or securing devices with marking colours or the like.

Special rules of classification

Groups [F16B 2/00](#) - [F16B 47/00](#) take precedence over group [F16B 1/00](#).

Group [F16B 1/00](#) is residual.

F16B 1/0014

{by the use of a shape-memory material}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 1/005

{by the use of a hydraulic action}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 1/0057

{by the use of a pneumatic action}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 1/0071

{with markings, colours, indicators or the like (for indicating tensile load [F16B 31/02](#))}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

References

Limiting references

This place does not cover:

For indicating tensile load	F16B 31/02

Special rules of classification

Group [F16B 1/04](#) is residual. Groups [F16B 2/00](#) - [F16B 47/00](#) take precedence.

F16B 2/00

**Friction-grip releasable fastenings (for cables or ropes, e.g. cleats [F16G 11/00](#))
{(connections of rods or tubes, e.g. of non-circular section, mutually, including resilient connections [F16B 7/00](#))}**

Definition statement

This place covers:

Clamps, i.e. gripping elements where the gripping action is effected by positive means other than the inherent resistance to deformation of the material of the clamp

Clips, i.e. gripping elements where the gripping action is effected solely by inherent resistance to deformation of the material of the clip

References

F16B 5/121

{fastened over the edge(s) of the sheet(s) or plate(s)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 5/123**

{Auxiliary fasteners specially designed for this purpose}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 5/125

{one of the auxiliary fasteners is comprising wire or sheet material or is made thereof}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 5/126

{at least one of the sheets, plates, bars or strips having integrally formed or integrally connected snap-in-features}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 5/128

{a strip with a C- or U-shaped cross section being fastened to a plate such that the fastening means remain invisible, e.g. the fastening being completely enclosed by the strip}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 7/00

Connections of rods or tubes, e.g. of non-circular section, mutually, including resilient connections ({{[F16B 11/008](#), [F16B 17/002](#) take precedence}); umbrella frames [A45B 25/02](#); welding or soldering of connections [B23K](#); vehicle connections in general [B60D](#); railway couplings [B61G](#); bicycle frames [B62K](#); couplings for transmitting rotation [F16D](#); couplings for tubes conveying fluids [F16L](#))

Definition statement

This place covers:

Connections of rods and tubes or profiles mutually by clamping, clipping or screwed connections.

References

Limiting references

This place does not cover:

Welding or soldering of connections	B23K
-------------------------------------	----------------------

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Umbrella frames	A45B 25/02

Connections of tubes or rods	F16B 7/00
------------------------------	---------------------------

Special rules of classification

This sub-group concerns joints between two or more NON-METAL connecting elements whose connector or liaison part is non-metal or metallic.

F16B 12/48

Non-metal leg connections ([F16B 12/46](#) takes precedence)

Definition statement

This place covers:

Illustrative example of subject matter classified in this group (DE202009017363U, DE202010017070).

References

Limiting references

This place does not cover:

Non-metal corner connections	F16B 12/46
------------------------------	----------------------------

Informative references

------------------------------	---------------------------

Special rules of classification

This sub-group concerns joints between two or more METAL leg connecting elements whose connector or liaison part is non-metal or metal and includes connections between table top or similar and leg(s).

F16B 12/56

Brackets for bedsteads; Coupling joints consisting of bolts or the like; Latches therefor

Definition statement

This place covers:

Illustrative example of subject matter classified in this group (US2006195983).

FIG. 5

F16B 12/58

Tapered connectors for bed rails

Definition statement

This place covers:

Illustrative example of subject matter classified in this group (FR875988, US3539211).

F16B 12/60

Fittings for detachable side panels

Definition statement

This place covers:

Illustrative example of subject matter classified in this group (FR2699058).

F16B 13/00

Dowels or other devices fastened in walls or the like by inserting them in holes made therein for that purpose (nails [F16B 15/00](#); self-locking pins or bolts in general, stud-and-socket releasable fastenings [F16B 21/00](#); dowels or bolts for railroad sleepers [E01B 9/00](#); and means for anchoring structural elements or bulkheads specially adapted to foundation engineering [E02D 5/74](#); bolts or dowels used while laying bricks or casting concrete sleepers [E04B 1/38](#); setting anchoring bolts in shafts, tunnels or galleries [E21D 20/00](#); anchoring bolts for shafts, tunnels or galleries [E21D 21/00](#))

Definition statement

This place covers:

Dowels made e.g. of wood, metal or plastic.

Dowels in form of a solid rod.

Dowels having parts gripping it the hole, e.g. expanding sleeves or toggle mechanisms.

Dowels fastened by inserted an additional element.

Dowels fixed by a settable material.

References

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Connections in furniture using dowels	F16B 12/00
Self-locking pins or bolts in general, stud-and-socket releasable fastenings	F16B 21/00
Dowels or bolts for railroad sleepers	E01B 9/00
Means for anchoring structural elements or bulkheads specially adapted to foundation engineering	E02D 5/74
Bolts or dowels used while laying bricks or casting concrete sleepers	E04B 1/38
Dowels fixed by grouting	E21D 20/02
Anchoring bolts for shafts, tunnels or galleries	E21D 21/00

Bolts without screw-thread and rivets	F16B 19/00
Dowels for insulation of walls and ceilings	E04F 13/0835

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Dowel	Solid cylindrical rod, usually made of wood, plastic or metal that is usually inserted into a blind hole.
-------	-----------------------------------------------------------------------------------------------------------

F16B 13/001

{with means for preventing rotation of the dowel}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/002**{self-cutting}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

**References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Self-cutting screws	F16B 25/00
---------------------	----------------------------

F16B 13/003

{with a separate drilling bit attached to or surrounded by the dowel element}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/004

{with a drilling sleeve driven against a tapered or spherical plug}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/02

in one piece with protrusion or ridges on the shaft

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/025**{of rolled sheet material}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

**F16B 13/04**

with parts gripping in the hole or behind the reverse side of the wall after inserting from the front ({[F16B 13/002](#) and [F16B 13/12](#) take precedence;} friction-grip releasable fastenings in general [F16B 2/00](#))

References**Limiting references***This place does not cover:*

Friction-grip releasable fastenings in general	F16B 2/00
------------------------------------------------	---------------------------

F16B 13/061**{of the buckling type}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

**F16B 13/065****{fastened by extracting the screw, nail or the like}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 13/066

{fastened by extracting a separate expander-part, actuated by the screw, nail or the like}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/068

{expanded in two or more places}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/0808

{by a toggle-mechanism}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/0825

{with a locking element, e.g. sleeve, ring or key co-operating with a cammed or eccentric surface of the dowel body}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/0833

{with segments or fingers expanding or tilting into an undercut hole
([F16B 13/0858](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/085

{with a drive-nail deflected by an inclined surface in the dowel body (nails with spreading shaft [F16B 15/04](#))}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**References****Limiting references**

This place does not cover:

Nails with a spreading shaft	F16B 15/04
------------------------------	----------------------------

F16B 13/0858

{with an expansible sleeve or dowel body driven against a tapered or spherical expander plug (F16B 13/004 takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/0866

{with prongs penetrating into the wall of the hole by a retractile movement of a threaded member}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/0875

{with elastic discs or spring washers anchoring in the hole}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/0883

{with split rings or wire between the threads of the dowel body or in grooves near a conical surface ([F16B 13/0825](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/0891

{with a locking element, e.g. wedge, key or ball moving along an inclined surface of the dowel body ([F16B 13/0816](#), [F16B 13/0825](#), [F16B 13/0883](#) take precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/122**{made from a sheet-metal blank}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 13/124

{fastened by inserting a threaded element, e.g. screw or bolt ([F16B 13/122](#), [F16B 13/128](#) take precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/126

{fastened by inserting an unthreaded element, e.g. pin or nail ([F16B 13/122](#), [F16B 13/128](#) take precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/128

{with extending protrusions, e.g. discs, segments, ridges, fingers or tongues
(F16B 13/122 takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/142

{characterised by the composition of the setting material or mixture
(F16B 13/143 takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/143

{using frangible cartridges or capsules containing the setting components}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 13/144

{characterised by the shape or configuration or material of the frangible cartridges or capsules}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 13/146**

{with a bag-shaped envelope or a tubular sleeve closed at one end, e.g. with a sieve-like sleeve, or with an expandable sheath}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 15/00

Nails; Staples (surgical staples [A61B 17/064](#); manufacture of nails or staples [B21G](#); {drawing-pins, thumb-tacks [B43M 15/00](#)}; railway spikes [E01B 9/06](#))

Definition statement

This place covers:

Nails, i.e. pin shaped sharp objects made mainly of hard metal alloy and being used as a fastener

Staples, i.e. two pronged fasteners made of metal.

References

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Surgical staples	A61B 17/064
Thumb tacks	B43M 15/00

F16B 23/0007

{characterised by the shape of the recess or the protrusion engaging the tool
([F16B 23/0069](#) and [F16B 23/0076](#) take precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0015

{substantially rectangular, e.g. one-slot head}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0023

{substantially cross-shaped}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/003

{star-shaped or multi-lobular, e.g. Torx-type, twelve-point star}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0038

{substantially prismatic with up to six edges, e.g. triangular, square, pentagonal, Allen-type cross-sections}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0046

{having one eccentric circular or polygonal recess or protrusion}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0061

{with grooves, notches or splines on the external peripheral surface designed for tools engaging in radial direction ([F16B 23/003](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0069

{with holes to be engaged with corresponding pins on the tool or protruding pins to be engaged with corresponding holes on the tool}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

for a 5-
test break.

F16B 23/0076

{causing slipping of the tool in loosening rotation, i.e. disabling unscrewing unless another tool is used ([F16B 31/027](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0084

{with a threaded engagement between the head of the bolt or screw and the tool}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 23/0092

{with a head engageable by two or more different tools ([F16B 23/0076](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 25/00**

Screws that cut thread in the body into which they are screwed, e.g. wood screws {([F16B 35/065](#) takes precedence; joining sheets or plates using screws with two separate threads [F16B 5/0275](#), using screws with adjustment sleeves [F16B 5/0283](#))}

Definition statement

This place covers:

Self tapping or self-cutting screws used for securing constructional elements or machine parts together.

References**Application-oriented references**

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Self cutting screws used for medical purposes	A61B 17/00
-----------------------------------------------	----------------------------

Threaded wire inserts	F16B 37/12
-----------------------	----------------------------

F16B 25/0015

{the material being a soft organic material, e.g. wood or plastic ([F16B 25/0031](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 25/0031

{the screw being designed to be screwed into different materials, e.g. a layered structure or through metallic and wooden parts}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 25/0047**

{the ridge being characterised by its cross-section in the plane of the shaft axis}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 25/0052

{the ridge having indentations, notches or the like in order to improve the cutting behaviour}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 25/0057**

{the screw having distinct axial zones, e.g. multiple axial thread sections with different pitch or thread cross-sections}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 25/0063

{with a non-threaded portion on the shaft of the screw}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

Fig 1

F16B 25/0068**{with multiple-threads, e.g. a double thread screws}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 25/0073

{characterised by its pitch, e.g. a varying pitch}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 25/0078

{with a shaft of non-circular cross-section or other special geometric features of the shaft}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 25/0084

{characterised by geometric details of the tip}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 25/0089**{the screw having wings}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 25/0094

{the screw being assembled or manufactured from several components, e.g. a tip out of a first material welded to shaft of a second material}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 25/103

{by means of a drilling screw-point, i.e. with a cutting and material removing action}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

Illustrative example of subject matter classified in this group.

F16B 37/085

{with at least one unthreaded portion in both the nut and the bolt}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 37/0857

{with the threaded portions of the nut engaging the thread of the bolt by the action of one or more springs or resilient retaining members ([F16B 37/0821](#) and [F16B 37/0835](#) take precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 37/0885**{in two halves hingedly connected}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 37/0892

{in two or more pieces, e.g. assemblies made by two C-shaped nuts mutually interlocked, or retained by an additional member ([F16B 37/0885](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 37/12

with thread-engaging surfaces formed by inserted coil-springs, discs, or the like; Independent pieces of wound wire used as nuts; Threaded inserts for holes {(Mounting devices [B25B 27/143](#))}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

Mounting devices	B25B 27/143
------------------	-----------------------------

F16B 37/122

{Threaded inserts, e.g. "rampa bolts"}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 37/125**{the external surface of the insert being threaded}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

**F16B 37/127****{and self-tapping}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 37/14

Cap nuts; Nut caps or bolt caps

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 37/145**{Sleeve nuts, e.g. combined with bolts}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

**F16B 37/16****Wing-nuts ([F16B 37/14](#) takes precedence)****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 39/00

Locking of screws, bolts or nuts ({[F16B 35/005](#) takes precedence}; locking of bottle closures [B65D](#); locking of rail-fastening bolts for permanent ways [E01B 9/12](#); locking of fastening means for railway fishplates [E01B 11/38](#); locking devices for valves or cocks [F16K](#))

Definition statement

This place covers:

Locking of screws by means of a settable material, plastic deformation, geometric engagement or friction.

References

Limiting references

This place does not cover:

Measures against loss of bolts and nuts (preassembling)	F16B 41/002
Measures against unauthorised operation of bolts, nuts or pins	F16B 41/005

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Locking of bottle closures	B65D
Locking of rail-fastening bolts for permanent ways	E01B 9/12
Locking of fastening means for railway fishplates	E01B 11/38
Locking devices for valves or cocks	F16K

F16B 39/01

especially adapted to prevent loosening at extreme temperatures

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 39/02**

in which the locking takes place after screwing down (**F16B 39/01** takes precedence; split-pins, circlips, or the like for preventing relative axial movement only **F16B 21/10**; fastening nuts by welding or riveting **F16B 37/06**)

References**Limiting references**

This place does not cover:

Split-pins, circlips, or the like for preventing relative axial movement only	F16B 21/10
Fastening nuts by welding or riveting	F16B 37/06

F16B 39/021

{by injecting a settable material after the screwing down}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/023

{by driving a conic or wedge-shaped expander through the threaded element}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/025

{by plastic deformation of a part of one of the threaded elements into a notch or cavity of the other threaded element ([F16B 39/103](#) and [F16B 39/106](#) take precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/026

{by swaging the nut on the bolt, i.e. by plastically deforming the nut}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/028

{by means of an auxiliary bolt or threaded element whose action provokes the deformation of the main bolt or nut and thereby its blocking}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/04

with a member penetrating the screw-threaded surface of at least one part, e.g. a pin, a wedge, cotter-pin, screw

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/06

with a pin or staple parallel to the bolt axis

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/08

with a cap interacting with the nut, connected to the bolt by a pin or cotter pin

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/10

by a plate, {spring, wire} or ring immovable with regard to the bolt or object {and mainly perpendicular to the axis of the bolt} ([F16B 39/08](#) takes precedence)

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/101

{with a plate, spring, wire or ring holding two or more nuts or bolt heads which are mainly in the same plane}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 39/103**

{with a locking cup washer, ring or sleeve surrounding the nut or bolt head and being partially deformed on the nut or bolt head, or on the object itself}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/105

{locking the bold head or nut into a hole or cavity, e.g. with the cup washer, ring or sleeve deformed into a dimple in the cavity}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/106

{with a deformable locking element, e.g. disk or pin above the bolt head or nut, flattened into a hole or cavity within which the bolt head or nut is positioned}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/108

{with a locking washer under the nut or bolt head having at least one tongue or lug folded against the nut or bolt head, or against the object itself ([F16B 39/103](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

Fig. 2

F16B 39/12

by means of locknuts

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 39/122**

{foreseen with mating surfaces inclined, i.e. not normal, to the bolt axis}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/124**{with helically inclined mating surfaces}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 39/126

{causing radial forces on the bolt-shaft ([F16B 39/36](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/128

{by means of eccentric or spiral interengaging parts}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 39/14**

made of thin sheet material or formed as spring-washers (locknuts per se made of thin sheet metal [F16B 37/02](#))

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

References

Locknuts per se made of thin sheet metal	F16B 37/02
------------------------------------------	----------------------------

F16B 39/16

in which the screw-thread of the locknut differs from that of the nut

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/18

in which the locknut grips with screw-thread in the nuts as well as on the bolt

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/20

by means of steel wire or the like ([F16B 39/10](#) takes precedence)

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/225

{by means of a settable material}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/24

by means of washers, spring washers, or resilient plates that lock against the object (locking to the screw-thread [F16B 39/14](#), [{F16B 39/34}](#), [F16B 39/36](#))

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

References

Locking by deformable inserts or the like parts	F16B 39/34
Locking with conical parts	F16B 39/36

F16B 39/26

with spring washers fastened to the nut or bolt-head

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 39/28**

by special members on, or shape of, the nut or bolt ([F16B 39/26](#) takes precedence; locknuts [F16B 39/12](#))

References**Limiting references**

This place does not cover:

Locknuts	F16B 39/12
----------	----------------------------

F16B 39/282

Locking by means of special shape of work-engaging surfaces, e.g. notched or toothed nuts

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 39/2825**

{causing the bolt to tilt}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/284

Locking by means of elastic deformation (**{F16B 39/2825, F16B 39/36,}**
F16B 39/38 take precedence)

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/286

caused by saw cuts

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/30

Locking exclusively by special shape of the screw-thread

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

References

Limiting references

This place does not cover:

Shape of thread	F16B 33/02
-----------------	----------------------------

F16B 39/32**Locking by means of a pawl or pawl-like tongue****Definition statement**

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 39/34****Locking by deformable inserts or like parts****Definition statement**

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/36

with conical locking parts, which may be split, including use of separate rings co-operating therewith

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 39/38

with a second part of the screw-thread which may be resiliently mounted
([F16B 39/30](#) takes precedence)

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 41/00**

Measures against loss of bolts, nuts, or pins; Measures against unauthorised operation of bolts, nuts or pins ({locking of screws, bolts or nuts [F16B 39/00](#);} seals [G09F 3/00](#))

Definition statement

This place covers:

Measures against loss of bolts, nuts or pins in preassembling and against unauthorised operation

References**Limiting references**

This place does not cover:

Locking of bolts, nuts or pins	F16B 39/00

F16B 43/001

{for sealing or insulation}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 43/002

{with special provisions for reducing friction}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 43/003

{with a special hole shape in order to allow a quick mounting or dismounting of the washer, e.g. with a keyhole slot ([F16B 43/005](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 43/004

{with a radial cut in order to improve elasticity of the washer (F16B 43/005 takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 43/005

{engaging the bolt laterally to allow a quick mounting or dismounting of the washer, i.e. without the need to engage over the end of the bolt ([F16B 43/009](#) takes precedence)}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 43/006

{in two or more parts hingedly connected}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 43/007**{in two or more parts}****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

F16B 43/02

with special provisions for engaging surfaces which are not perpendicular to a bolt axis or do not surround the bolt

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F16B 43/025

{for surfaces not surrounding the bolt, e.g. hook adaptors for bolts}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F16B 45/00**

Hooks; Eyes (if the attaching parts or means are concerned, groups [F16B 13/00](#), [F16B 15/00](#), [F16B 19/00](#), [F16B 25/00](#), [F16B 35/00](#), [F16B 47/00](#) take precedence; for hanging pictures or the like [A47G 1/16](#); towing hooks for ships [B63B 21/58](#); for hoisting or hauling purposes [B66C](#); hooks or eyes with integral parts designed to facilitate quick attachment to cables or ropes at any point [F16G 11/14](#))

Definition statement

This place covers:

Curved fastening member used for fastening or securing constructional elements or machine parts together. This group also covers snap-hooks for mountaineering.

References**Application-oriented references**

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Hooks for hanging pictures or the like	A47G 1/16
Clothes hangers	A47G 25/06
Towing hooks for ships	B63B 21/58

Hooks for hoisting or hauling purposes	B66C
Hooks or eyes with integral parts designed to facilitate quick attachment to cables or ropes at any point	F16G 11/14
