### Other ignition

19/00	Incandescent ignition, e.g. during starting of internal combustion engines; Combination of incandescent and spark ignition
19/02	electric, e.g. layout of circuits of apparatus having glowing plugs
19/021	• {characterised by power delivery controls}
19/022	• • · {using intermittent current supply}
19/023	• • • {Individual control of the glow plugs}
19/025	• • {with means for determining glow plug
	temperature or glow plug resistance}
19/026	• • {Glow plug actuation during engine operation}
19/027	• • {Safety devices, e.g. for diagnosing the glow plugs or the related circuits}
19/028	<ul> <li>{the glow plug being combined with or used as a sensor}</li> </ul>
19/04	<ul> <li>non-electric, e.g. heating incandescent spots by burners (use of burners for direct ignition F02P 21/00)</li> </ul>
21/00	Direct use of flames or burners for ignition
21/02	• the flames being kept burning essentially external to engine working chambers
21/04	<ul> <li>Burning-cartridges or like inserts being arranged in engine working chambers (as starting aid F02N 19/02)</li> </ul>
23/00	Other ignition
23/02	Friction, pyrophoric, or catalytic ignition
23/04	• Other physical ignition means, e.g. using laser rays
23/045	• • {using electromagnetic microwaves}
