Manufacture of leather; Machines or devices therefor {(machines specially adapted for forming upper shoe blanks or shoe leggings by stretching [A43D 8/003](#))}

Definition statement

This place covers:

Methods and machines for manufacturing leather. The machines can be in combination with other machines such as machines used for punching holes in belts, however such specific machines should be also classified for example in [C14B 5/04](#)

Special rules of classification

If the machine is clearly a machine for working leather, though leather per se may not be specifically mentioned, it should also be classified here. However, no machines should be classified here which are merely suitable to work leather, but not specially adapted to do so.
