

F21V

FUNCTIONAL FEATURES OR DETAILS OF LIGHTING DEVICES OR SYSTEMS THEREOF; STRUCTURAL COMBINATIONS OF LIGHTING DEVICES WITH OTHER ARTICLES, NOT OTHERWISE PROVIDED FOR

Definition statement

This place covers:

Functional features or details of lighting devices or systems of lighting devices, for example:

Aspects related to light emission or distribution:

- Reflectors, refractors, light filters, shades, globes, bowls, cover glasses, or other screens, and fastening thereof
- Use of light guides
- Producing or changing characteristics or distribution of the light

Aspects not related to light emission or distribution, e.g. fittings:

- Protecting, supporting, suspending, or attaching arrangements for lighting devices
- Arrangements of electric circuit elements in or on lighting devices
- Fastening of light sources or lamp holders
- Safety devices or cable stowing arrangements structurally associated with lighting devices
- Cooling or heating arrangements
- Gas-tight or water-tight arrangements

Lighting devices combined with articles having a primary function unrelated to lighting that are not otherwise provided for.

Electric light sources using a combination of different types of light generation	H05B 35/00
Circuit arrangements for light sources	H05B 46/00 , H05B 47/00
Semiconductor devices specially adapted for light emission	H10H 20/00
Organic semiconductor devices specially adapted for light emission	H10K 50/00

Special rules of classification

Structural combinations of lighting devices with other articles are classified in [F21V 33/00](#), unless specifically provided for elsewhere in this subclass or elsewhere in the CPC.

Details of non-electric lighting devices or systems are classified in groups [F21V 35/00](#) - [F21V 37/02](#) only if a special adaptation related to the use of a non-electric light source is of interest. If there is no such special adaption, classification is made in a relevant general place, e.g. in [F21V 21/00](#) for suspending arrangements

In this subclass, it is desirable to add the indexing codes of subclass [F21W](#) in order to indicate the uses or applications of lighting devices, and of [F21Y](#) in order to indicate the form of the light sources of lighting devices.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Light source	The entity (e.g. light bulb, fluorescent tube, gas mantle or combustible charge) that generates light for a lighting device.
--------------	--

F21V 1/04**rigid ([F21V 1/08](#) takes precedence)****References****Limiting references***This place does not cover:*

Adjustable frame of a shade for light source	F21V 1/08
--	---------------------------

F21V 1/06**foldable or collapsible****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Fastening of component parts of lighting devices, e.g. shades, globes, refractors, reflectors, filters, screens, grids or protective cages, with provision for shipment or storage	F21V 17/007
--	-----------------------------

F21V 1/08**adjustable****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Controlling the distribution of the light emitted by adjustment of elements	F21V 14/00
---	----------------------------

F21V 1/10**Rotating shades****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group.

Definition statement

Rotating glass cover or globe or shade or fins due to heat of a light source

F21V 1/14

Covers for frames; Frameless shades

Definition statement

This place covers:

Shades characterised by the material

Stretched fly attached to a ceiling frame

A stretched fly attached to a ceiling frame

F21V 3/00

Globes; Bowls; Cover glasses (with refracting properties [F21V 5/00](#); with reflecting properties [F21V 7/00](#); characterised by cooling arrangements [F21V 29/506](#))

Definition statement

This place covers:

Globes for street lighting devices

Glass cover for automotive vehicles

Globes, bowls, cover glasses characterised by their shapes

Globes, bowls, cover glasses characterised by material, coatings or surface treatments

F21V 5/04

of lens shape

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Simple or compound lenses	G02B 3/00
Optical system adapting the beam shape of a semiconductor light source such as a laser diode or an LED, e.g. for efficiently coupling into optical fibres	G02B 19/0047

F21V 5/045

{the lens having discontinuous faces, e.g. Fresnel lenses}

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Simple or compound lenses with non-spherical faces with discontinuous faces, e.g. Fresnel lens	G02B 3/08
--	---------------------------

F21V 5/046

{the lens having a rotationally symmetrical shape about an axis for transmitting light in a direction mainly perpendicular to this axis, e.g. ring or annular lens with light source disposed inside the ring}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F21V 5/048**

{the lens being a simple lens adapted to cooperate with a point-like source for emitting mainly in one direction and having an axis coincident with the main light transmission direction, e.g. convergent or divergent lenses, plano-concave or plano-convex lenses}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F21V 5/08

producing an asymmetric light distribution

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F21V 7/00

Reflectors for light sources (characterised by cooling arrangements

[F21V 29/505](#))

Relationships with other classification places

In the context of lighting, a "reflector" is a device which reflects light with desired characteristics and distribution, while a "filter" is a device which passes light with desired characteristics and distribution.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Combinations of two kinds of elements one being of reflector and one of the following: refractor, filter or screen	F21V 13/04 , F21V 13/08 , F21V 13/10
Combinations of three kinds of elements being reflectors, refractors, and filters	F21V 13/14
Changing the characteristics or distribution of the light emitted by adjustment of parts by movement of reflectors	F21V 14/04
Reflectors for vehicle headlamps or rear lamps	F21S 41/30 , F21S 43/30
Optical elements other than lenses: Mirrors	G02B 5/08
System with reflecting surfaces using mirrors only, for light condensing, e.g. for use with a light emitter	G02B 17/0668
Systems with reflecting surfaces, with or without refracting elements for light condensing, e.g. for use with a light emitter	G02B 17/0868
Projectors or projection-type viewers: Reflectors in projection beam	G03B 21/28

F21V 7/0008**{providing for indirect lighting}****Definition statement***This place covers:*

The lighting devices emitting light towards the ceiling and not toward the surface of interest to be lit

Lighting devices, the light beams of which are not being directed directly toward the aim, e.g. by means of reflectors

Illustrative example of subject matter classified in this group.

F21V 7/0025

{Combination of two or more reflectors for a single light source (array of reflectors for a cluster of light sources [F21V 7/0083](#))}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**References****Limiting references**

This place does not cover:

Array of reflectors for a cluster of light sources	F21V 7/0083
--	-----------------------------

F21V 7/005

{with an elongated shape to cooperate with linear light sources}

Definition statement

This place covers:

Elongated reflective surface with its axis parallel to the axis of an elongated light emitter.

Plurality of reflective surfaces along an axis parallel to the axis of one elongated light emitter.

References

Limiting references

This place does not cover:

Plurality of reflective surfaces along an axis parallel to the axis of an light source formed of a plurality of light emitters, each light emitter corresponding to an individual reflective surface, i.e. array of light sources	F21V 7/0083
---	-----------------------------

Special rules of classification

In this group, it is desirable to add the Indexing Codes of [F21Y 2103/00](#)

F21V 7/0058

{adapted to cooperate with light sources of shapes different from point-like or linear, e.g. circular light sources}

Special rules of classification

In this group, it is desirable to add the Indexing Codes of [F21Y 2103/30](#)

F21V 7/0066

{specially adapted to cooperate with point like light sources; specially adapted to cooperate with light sources the shape of which is unspecified ([F21V 7/16](#) - [F21V 7/30](#) take precedence)}

References

Limiting references

This place does not cover:

Construction of reflector with provision for adjusting the curvature	F21V 7/16
Construction of reflector with provision for folding or collapsing	F21V 7/18
Reflectors characterised by materials, surface treatments or coatings, e.g. dichroic reflectors	F21V 7/22-F21V 7/30
Reflector constructed to facilitate cooling	F21V 29/505

F21V 7/0083

{Array of reflectors for a cluster of light sources, e.g. arrangement of multiple light sources in one plane (combination of two or more reflectors [F21V 7/0025](#))}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

Plurality of individually removable identical reflectors on a planar matrix of LEDs

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Combination of two or more reflectors for a single light source	F21V 7/0025
---	-----------------------------

F21V 7/0091

{using total internal reflection}

Definition statement

This place covers:

Reflectors for rear vehicle light using total internal reflection.

Refractors having surfaces used for total internal reflection.

References

Limiting references

This place does not cover:

Reflectors for vehicle headlamps using total internal reflection	F21S 41/322
--	-----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Systems with reflecting surfaces, with or without refracting elements; Catadioptric systems for use with light emitter	G02B 17/0868
---	------------------------------

Special rules of classification

Reflectors for signal lamps for vehicles using total internal reflection have to be also classified in [F21S 43/315](#).

Collimators for signal lamps for vehicles using total internal reflection have to be also classified in [F21S 43/402](#).

Refractors having surfaces used for total internal reflection have to be also classified in [F21V 5/00](#).

F21V 7/04

Optical design

Definition statement

This place covers:
Reflector for which the surface is defined by mathematical formulae.

F21V 7/09

with a combination of different curvatures

Definition statement

This place covers:
Also reflector surfaces with asperities

F21V 7/18

with provision for folding or collapsing

Definition statement

This place covers:
Illustrative examples of subject matter classified in this group.

F21V 7/22

characterised by materials, surface treatments or coatings, e.g. dichroic reflectors

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Surface treatment of glass, at least one coating being a metal	C03C 17/36
Multilayer mirrors	G02B 5/0816

F21V 9/00

Elements for modifying spectral properties, polarisation or intensity of the light emitted, e.g. filters (coloured shades [F21V 1/00](#); elements characterised by cooling arrangements [F21V 29/502](#))

Relationships with other classification places

In the context of lighting, a "filter" is a device which passes light with desired characteristics and distribution, while a "reflector" is a device which reflects light with desired characteristics and distribution.

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Fastening or lifting of the lamp glass of lanterns	F21L 19/003
Fastening of component parts of vehicle headlamps	F21S 41/29 , F21S 41/39 , F21S 41/55
Fastening of component parts of vehicle signal lamps	F21S 43/27 , F21S 43/37

Informative references

Attention is drawn to the following places, which may be of interest for search:

For gas-tight or water-tight arrangements	F21V 31/00
---	----------------------------

F21V 17/007

{with provision for shipment or storage}

Definition statement

This place covers:

Components of lighting devices intended to be easily dismantled or with reduced dismantled volume for shipment or storage

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Foldable or collapsible frames for shades for light sources	F21V 1/06
Construction of reflector with provision for folding or collapsing	F21V 7/18
Receptacles with Roll-up holders with pockets for separates articles (personal use); Not limited to lamps	A45C 11/26
Machines, apparatus or devices for or method of packaging or material; unpacking	B65B
Packaging for ampoules, lamp bulbs (for sale)	B65D 85/42
Packaging for ampoules or lamp bulbs, e.g. for sale	B65D 85/42

Supports or holders for coiled, wound or folded material	B65H 75/02
--	----------------------------

F21V 17/02

with provision for adjustment ([F21V 17/04](#) - [F21V 17/08](#) take precedence)

Definition statement

This place covers:

Details regarding the mechanism for the adjustment

References

Limiting references

This place does not cover:

Fastening of component parts of lighting devices, the fastening being onto or by the light source	F21V 17/04
Fastening of component parts of lighting devices, the fastening being onto or by the lampholder	F21V 17/06
Fastening of component parts of lighting devices, onto the supporting or suspending arrangements of the lighting device, e.g. power cords, standards	F21V 17/08

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Controlling the distribution of the light emitted by adjustment of elements	F21V 14/00
---	----------------------------

Special rules of classification

Always provide also the information which component is concerned by giving the relevant Indexing Code [F21V 5/00-F21V 9/00](#); if the focus is on the change in the characteristics or distribution of the light emitted give also additional information symbols in groups [F21V 14/04-F21V 14/08](#)

F21V 17/04

the fastening being onto or by the light source

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

**F21V 17/06**

the fastening being onto or by the lampholder

Definition statement

This place covers:

Electric light-globe holder

Outer shell structure of a decoration lamp string

F21V 17/10

characterised by specific fastening means or way of fastening
([F21V 17/02](#) - [F21V 17/08](#) take precedence)

References

Limiting references

This place does not cover:

Fastening of component parts of lighting devices with provision for adjustment	F21V 17/02
Fastening of component parts of lighting devices, the fastening being onto or by the light source	F21V 17/04
Fastening of component parts of lighting devices, the fastening being onto or by the lampholder	F21V 17/06
Fastening of component parts of lighting devices, onto the supporting or suspending arrangements of the lighting device, e.g. power cords, standards	F21V 17/08

F21V 17/101

{permanently, e.g. welding, gluing or riveting}

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Joining or sealing of preformed parts, welding of plastics materials	B29C 65/00
Joining sheets or plates, e.g. panels, to one another or to strips or bars parallel to them by means of riveting	F16B 5/04

F21V 19/00

Fastening of light sources or lamp holders (fastening electric light source solely by the coupling device [H01R 33/00](#) {; special means for attaching candle to candle holder [F21V 35/003](#)})

References

Limiting references

This place does not cover:

Special means for attaching the candle to the candle holder	F21V 35/003
Fastening electric light sources in vehicle headlamps	F21S 41/19
Fastening electric light sources in vehicle signal lamps	F21S 43/19
Fastening electric light source solely by the coupling device	H01R 33/00

F21V 19/0005

{of sources having contact pins, wires or blades, e.g. pinch sealed lamp ([F21V 19/001](#) takes precedence)}

References

Limiting references

This place does not cover:

Fastening of removably mounted LEDs; Fastening of removably mounted PCBs holding light sources	F21V 19/001
--	-----------------------------

F21V 19/001

{the light sources being semiconductor devices, e.g. LEDs}

References

Limiting references

This place does not cover:

Fastening of light sources or lampholders: Details of lamp holders, terminals or connectors for vehicle headlamps	F21S 41/192
Fastening of light sources or lampholders: Details of lamp holders, terminals or connectors for vehicle rear lights	F21S 43/195

Informative references

Attention is drawn to the following places, which may be of interest for search:

Printed circuits structurally associated with non-printed electric components characterised by the use of a flexible or folded printed circuit	H05K 1/189
--	----------------------------

Synonyms and Keywords

In patent documents, the following abbreviations are often used:

PCB	Printed Circuit Board
LED	Light Emitting Diode

F21V 19/006

{of point-like light sources, e.g. incandescent or halogen lamps, with screw-threaded or bayonet base (of sources having contact pins, wires or blades [F21V 19/0005](#); of LEDs or sources mounted on printed-circuit board [F21V 19/001](#))}

This place does not cover:

Fastening of light sources or lampholders of sources having contact pins, wires or blades	F21V 19/0005
Fastening of removably mounted LEDs; Fastening of removably mounted PCBs holding light sources	F21V 19/001

Synonyms and Keywords

In patent documents, the following abbreviations are often used:

LED	Light Emitting Diode
-----	----------------------

F21V 19/0075

{of tubular light sources, e.g. ring-shaped fluorescent light sources}

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Holders formed as intermediate parts for linking a counter-part to a coupling part for tubular fluorescent lamps	H01R 33/942
--	-----------------------------

F21V 19/0085

{at least one conductive element acting as a support means, e.g. resilient contact blades, piston-like contact}

Relationships with other classification places

This group does not cover coupling devices in which a holder is adapted for supporting apparatus to which its counterpart is attached or separate parts thereof, see [H01R 33/08](#): Two-pole devices for supporting tubular fluorescent lamps.

F21V 19/02

with provision for adjustment, e.g. for focusing

Definition statement

This place covers:

Details regarding the mechanism for the adjustment of the light source or lampholder

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Changing the characteristics or distribution of the light emitted by movement of light sources	F21V 14/02
--	----------------------------

Special rules of classification

If the focus is on the change in the characteristics or distribution of the light emitted give also

[F21V 14/02](#)

F21V 19/04

with provision for changing light source, e.g. turret {(auxiliary devices for cleaning, placing, or removing incandescent lamps [H01K 3/32](#), fluorescent lamps [H01J 9/006](#))}

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Auxiliary devices for cleaning, placing, or removing fluorescent lamps	H01J 9/006
Auxiliary devices for cleaning, placing, or removing incandescent lamps	H01K 3/32

F21V 21/00

Supporting, suspending, or attaching arrangements for lighting devices ([F21V 17/00](#), [F21V 19/00](#) take precedence; arrangement of signalling or lighting devices, the mounting or supporting thereof or circuits therefor, for vehicles in general [B60Q](#), stands for supporting apparatus or articles in general [F16M 11/00](#)); Hand grips

References**Limiting references**

This place does not cover:

Fastening of component parts of lighting devices	F21V 17/00
Fastening of light sources or lampholders	F21V 19/00

Informative references

Attention is drawn to the following places, which may be of interest for search:

Arrangement of signalling or lighting devices, the mounting or supporting thereof or circuits therefor, for vehicles in general	B60Q
Stands for supporting apparatus or articles in general	F16M 11/00

F21V 21/002

making direct electrical contact, e.g. by piercing ([F21V 21/35](#) takes precedence)

Definition statement

This place covers:

The housing of the lighting device or lampholder is equipped with needle contacts to pierce the cable insulator to connect while attaching the housing or lampholder to the cable.

**References****Limiting references**

This place does not cover:

Supporting elements displaceable along a guiding element with direct electrical contact between the supporting element and electric conductors running along the guiding element	F21V 21/35
--	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Electrically-conductive connections between two or more conductive members in direct contact and means for effecting or maintaining such contact; Needle-point, slotted plate, or analogous contact members penetrating insulation or cable strands having at least one tooth, prong, pin or needle penetrating the insulation	H01R 4/2404
--	-----------------------------

F21V 21/005

for several lighting devices in an end-to-end arrangement, i.e. light tracks

Definition statement

This place covers:

Housing of lighting devices mechanically in side-by-side or end-to-end contact

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Systems of lighting devices, not provided for in main groups F21S 4/00 - F21S 10/00 or F21S 19/00	F21S 2/00
Lighting devices or systems	F21S 2/00

F21V 21/008

Suspending from a cable or suspension line

Definition statement

This place covers:

Details of the suspending means from a cable or suspension line

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Lighting devices intended for fixed installation intended only for mounting on a ceiling or like overhead structure	F21S 8/06
---	---------------------------

F21V 21/02

Wall, ceiling, or floor bases; Fixing pendants or arms to the bases ([F21V 21/08](#) takes precedence; bases for movable standing lamps [F21V 21/06](#))

References

Limiting references

This place does not cover:

Supporting, suspending, or attaching arrangements for lighting devices; Devices for easy attachment to any desired place, e.g. clip, clamp, magnet	F21V 21/08
--	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Bases for movable standing lamps	F21V 21/06
Installation of electrical cables or lines in buildings / Details / Distribution boxes / ceiling roses or other lighting sets	H02G 3/20

F21V 21/03

Ceiling bases, e.g. ceiling roses ([F21V 21/04](#) takes precedence)

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F21V 21/04

Recessed bases

Definition statement

This place covers:

Details of the fastening means for a recessed lighting device

Hanger bar for recessed lighting fixtures

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Arrangements for fixing loudspeaker transducers, e.g. in a box, furniture

H04R 1/025

Special rules of classification

Generally no classification in [F21S 8/02](#)

F21V 21/06

Bases for movable standing lamps; Fixing standards to the bases ([F21V 21/08](#) takes precedence)

Definition statement

This place covers:

Portable lighting devices provided with stands or bases to be used as a movable standing lamp

References

Limiting references

This place does not cover:

Supporting, suspending, or attaching arrangements for lighting devices; Devices for easy attachment to any desired place, e.g. clip, clamp, magnet	F21V 21/08
---	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Mechanical connection of the arms of a multi-armed chandelier	F21V 21/02
Electrical connection of the arms of a multi-armed chandelier	F21V 23/06
Stands for supporting apparatus or articles in general	F16M 11/00

Synonyms and Keywords

In patent documents, the following words/expressions are often used as synonyms:

- " base", "Socles", "embase" and "piétement"

F21V 21/08

Devices for easy attachment to any desired place, e.g. clip, clamp, magnet

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Devices for fastening or securing constructional elements or machine parts together	F16B
---	----------------------

F21V 21/084**Head fittings****Definition statement**

This place covers:

Illustrative example of subject matter classified in this group.

**References****Application-oriented references**

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Hats or helmets with lamps	A42B 3/044
----------------------------	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Instruments for performing medical examinations of the interior of cavities or tubes of the body by visual or photographic inspection, e.g. endoscopes with illuminating arrangements	A61B 1/06
---	---------------------------

F21V 21/0925**{for portable lighting devices}****Definition statement**

This place covers:

Illustrative example of subject matter classified in this group.

F21V 21/10

Pendants, arms, or standards; Fixing lighting devices to pendants, arms, or standards (adjustable mounting [F21V 21/14](#); construction of posts not peculiar to use with lighting devices [E04H 12/00](#))

Definition statement

This place covers:

Access door to the inside of a pole for lighting device; compartments inside the lighting pole

References

Limiting references

This place does not cover:

Construction of posts not peculiar to use with lighting devices	E04H 12/00
---	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Adjustable mounting of lighting devices	F21V 21/14

F21V 21/112

Fixing lighting devices to pendants ([F21V 21/002](#) takes precedence)

Definition statement

This place covers:

Adjustment clip for a suspended light fixture

References

Limiting references

This place does not cover:

Supporting, suspending, or attaching arrangements for lighting devices making direct electrical contact	F21V 21/002
---	-----------------------------

F21V 21/116

Fixing lighting devices to arms or standards ([F21V 21/002](#) takes precedence)

Definition statement

This place covers:

Connector for connecting lamp to support

Definition statement

T-channel fixture-mounting pole clamp

References

Limiting references

This place does not cover:

Supporting, suspending, or attaching arrangements for lighting devices making direct electrical contact

F21V 21/002

F21V 21/13**Spring-loaded poles fixed at both ends****Definition statement**

This place covers:

Illustrative example of subject matter classified in this group.

F21V 21/145

{for portable lighting devices}

Definition statement

This place covers:

Portable lighting devices provided with adjustable stands or bases to be used as a movable standing lamp

Special rules of classification

Documents with this scope, published before 1985, are classified in the higher group [F21V 21/14](#)

F21V 21/15

specially adapted for power operation, e.g. by remote control

Definition statement

This place covers:

Lighting devices comprising electrical motor to actuate an adjustment movement of the lighting devices

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Arrangements of switches in or on lighting devices activated by remote control means	F21V 23/0435
--	------------------------------

F21V 21/22

telescopic

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Telescopic towers; masts, poles	E04H 12/182
Undercarriages changeable in height or length of legs by telescoping	F16M 11/26

F21V 21/24

Lazy-tongs

Definition statement

This place covers:

Illustrative example of subject matter classified in this group.

F21V 21/29

employing universal joints

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Universal joints, i.e. with mechanical connection allowing angular movement or adjustment of the axes of the parts in any direction	F16L 27/02
---	----------------------------

F21V 21/30**Pivoted housings or frames****References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Electric lighting devices with self-contained electric batteries or cells characterised by the provision of a light source housing portion adjustably fixed to the remainder of the device	F21L 4/04
--	---------------------------

F21V 21/34**Supporting elements displaceable along a guiding element {(telescopic mounting of lighting devices [F21V 21/22](#))}****References****Limiting references**

This place does not cover:

Telescopic mountings of a lighting device	F21V 21/22
---	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Coupling parts adapted for simultaneous co-operation with two or more identical counterparts, e.g. for distributing energy to two or more circuits; Rails or bus-bars constructed so that the counterparts can be connected thereto at any point along their length, e.g. track lighting systems	H01R 25/14
--	----------------------------

F21V 21/36**Hoisting or lowering devices, e.g. for maintenance****References****Limiting references**

This place does not cover:

Adjustable mountings of lighting devices	F21V 21/14
--	----------------------------

F21V 21/40**Hand grips****References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Operation lamp handles	A61B 90/36
------------------------	----------------------------

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Handle	handle is defined to grab and/or manipulate/move the lighting device to a chosen position and not as being a handle on which a lighting device is or can be mounted.
--------	--

F21V 21/403

{for operation or dentist lamps}

Special rules of classification

In this group, it is desirable to add the Indexing Code [F21W 2131/202](#) or [F21W 2131/205](#)

F21V 23/00

**Arrangement of electric circuit elements in or on lighting devices
{(characterised by cooling arrangements [F21V 29/508](#))}**

References**Limiting references**

This place does not cover:

Electric circuits per se	H05B 39/00
--------------------------	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Arrangement of electronic circuits separated from the light source for vehicle (e.g. mounting of housings for starter circuits for discharge lamps)	B60Q 1/0094
Arrangement of electronic circuits part of the light source or light source holder for vehicle (e.g. mounting of housings of starter circuits for discharge lamps)	F21S 41/192

F21V 23/04

the elements being switches (safety devices [F21V 25/00](#))

Definition statement

This place covers:

Electric means varying continuously or discontinuously the light intensity, e.g. ON/OFF switch, potentiometer, dimmer,...etc

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Safety devices structurally associated with lighting devices	F21V 25/00

Informative references

Attention is drawn to the following places, which may be of interest for search:

Details of coupling devices of the kinds covered by groups H01R 12/70 or H01R 24/00- H01R 33/00 ; Means for relieving strain on wire connection, e.g. cord grip	H01R 13/58
---	----------------------------

F21V 29/00

Protecting lighting devices from thermal damage; Cooling or heating arrangements specially adapted for lighting devices or systems (lighting fixtures combined with outlets for air-treatment systems [F24F 13/078](#))

References

Limiting references

This place does not cover:

Lighting fixtures combined with outlets for air-treatment systems	F24F 13/078
---	-----------------------------

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Cooling of lighting devices for vehicle headlamps or rear lamps	F21S 45/40
Cooling of air-treatment systems with air-flow over lighting fixtures	F24F 3/056
Cooling of projectors or projector type viewers	G03B 21/16
Cooling arrangements for gas- or vapour-discharge lamps	H01J 61/52
Cooling arrangements for electric incandescent lamps	H01K 1/58

Informative references

Attention is drawn to the following places, which may be of interest for search:

Heat pipes	F28D 15/02
Heating or cooling of liquid crystal cells	G02F 1/133382
Control of the temperature of systems for controlling or regulating non-electric variables	G05D 23/00
Cooling means for data processing equipment	G06F 1/20
Arrangements for cooling, heating, ventilating or temperature compensation for semiconductor or other solid state devices	H01L 23/34
Casings or enclosures with channels or ducts for flow of cooling medium	H02K 5/20
Thermal arrangements for printed circuits, e.g. for cooling or heating	H05K 1/0201
Heat extraction or cooling elements for semiconductor devices characterised by the semiconductor body packages	H10H 20/858

F21V 29/15**Thermal insulation****Definition statement**

This place covers:

- Means for screening the heat, e.g. screen for heat radiation
- Thermal insulation spaces or air gaps
- Use of heat insulation materials

Illustrative example of thermal insulation space in figure below:

Definition statement

Illustrative example of air gap between components or in the mass of a component in the figure below:

Heat insulating material between components to prevent heat conduction in figure below:

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Through holes in printed circuit board to screen conductive heat transfer from one part to the other
--

H05K 1/0203

F21V 29/504**of refractors****Definition statement**

This place covers:

Refractors for light sources being designed to facilitate cooling.

F21V 29/505**of reflectors****Definition statement**

This place covers:

Reflectors for light sources being designed to facilitate cooling.

Illustrative examples of subject matter classified in this group, see figures below:

Definition statement

Special shape of the lamp cover with means for conducting or dissipating heat, e.g. channels or openings. See illustrative example below:

Definition statement

Thermally conductive films or blades contacting the inner surface of the globe to transfer the heat generated by light source to the globe. See illustrative example below:

Structure of the cover surface facilitating cooling. See illustrative example below:

Definition statement

Globe forming fins or the exterior of which in contact with fins. See illustrative example below:

Evaporation and condensation within the globe of the lighting device or LED module or LED lamp, i.e. part of a globe is forming a part of a heat pipe. See illustrative example below:

F21V 29/507

of means for protecting lighting devices from damage, e.g. housings

Definition statement

This place covers:

Means for protecting lighting devices from damage, e.g. housings, being designed to facilitate cooling.

Definition statement

Illustrative examples of subject matter classified in this group:

Housing for enclosing light source with openings (151) for facilitating cooling:

Cage provided for facilitating cooling:

Definition statement

Evaporation and condensation in a housing compartment:

**F21V 29/508****of electrical circuits****Definition statement**

This place covers:

Means for facilitating the cooling of circuit boards for the drivers or supply circuits of the light sources but not the cooling of light emitters or their supports.

Illustrative examples of subject matter classified in this group:

Electric circuit is cooled directly by evaporation, see figure below:

Heat transfer from circuit to the housing, see figure below:

F21V 29/51

using condensation or evaporation of a fluid, e.g. heat pipes

Definition statement

This place covers:

Illustrative examples of subject matter classified in this group:

by using a heat pipe:

Definition statement

Evaporation and condensation within the globe of the lighting device or LED module:

Evaporation and condensation in a housing compartment for cooling of the central arranged electronic circuit:

Definition statement

Evaporation of water in open environment to improve heat dissipation:

**F21V 29/52**

electrically powered, e.g. refrigeration systems

Definition statement

This place covers:

Illustrative example of subject matter classified in this group:

F21V 29/54

using thermoelectric means, e.g. Peltier elements

Definition statement

This place covers:

Illustrative examples of subject matter classified in this group:

**F21V 29/56**

using liquid coolants ([F21V 29/51](#) takes precedence)

Definition statement

This place covers:

The cooling by liquids without condensation or evaporation of the fluid

Below an illustrative example of subject matter classified in this group. In this example the thermally conductive liquid is permanently enclosed within the shell:

References

Limiting references

This place does not cover:

Cooling arrangements using condensation or evaporation of a fluid, e.g. heat pipes
--

F21V 29/51

F21V 29/63

using electrically-powered vibrating means; using ionic wind

Definition statement

This place covers:

Illustrative example of subject matter classified in this group:

F21V 29/65**the gas flowing in a closed circuit****Definition statement***This place covers:*

Illustrative example of subject matter classified in this group:

**F21V 29/673****{the fans being used for intake}****Definition statement***This place covers:*

Fans arranged in such a way that the warm air is moved away from the heat source after the air was heated by the heat source, i.e. the fans are arranged downstream from the light/heat sources in respect of the air flow.

Illustrative example of subject matter classified in this group:

F21V 29/677**{the fans being used for discharging}****Definition statement***This place covers:*

Fans arranged in such a way that they move cooling air in the direction of the heat or light sources, i.e. the fans are located upstream from the light sources in respect of the air the flow.

Illustrative examples of subject matter classified in this group:

F21V 29/70

characterised by passive heat-dissipating elements, e.g. heat-sinks

Definition statement

This place covers:

Heat spreaders, i.e. thermal conducting element interconnecting the source of heat and the heat sink, in order spread the heat on a heat sink surface.

Illustrative example, e.g. a heat spreader for a printed circuit board supporting LEDs:

**F21V 29/713**

{in direct thermal and mechanical contact of each other to form a single system}

Definition statement

This place covers:

Heat sinks being built from multiple elements forming a single system where the elements are in direct thermal contact.

Illustrative example of subject matter classified in this group:

F21V 29/717

{using split or remote units thermally interconnected, e.g. by thermally conductive bars or heat pipes}

Definition statement

This place covers:

Separate heat sink units or split units connected by conductive bars or heat pipes.

Illustrative examples of subject matter classified in this group:

F21V 29/73

the elements being adjustable with respect to each other, e.g. hinged

Definition statement

This place covers:

Illustrative examples of subject matter classified in this group:

**F21V 29/74**

with fins or blades

Definition statement

This place covers:

Illustrative examples of subject matter classified in this group:

Definition statement

Fins/pins consisting of main fins/pins and supplementary fins/pins increasing the surface areas of the main fins/pins, e.g. snowflake-like profiles or fins with multi-branches.

**F21V 29/745**

{the fins or blades being planar and inclined with respect to the joining surface from which the fins or blades extend}

Definition statement

This place covers:

Illustrative examples of subject matter classified in this group:

Definition statement

Fins not radially arranged on a cylinder:

Parallel fins attached to a curved surface, therefore forming an angle with respect to the curved surface:

"V" shaped section fins attached at the tip to a surface:

F21V 29/767

{the planes containing the fins or blades having directions perpendicular to the light emitting axis}

Definition statement

This place covers:

Illustrative example of subject matter classified in this group:

F21V 29/77

with essentially identical diverging planar fins or blades, e.g. with fan-like or star-like cross-section

Definition statement

This place covers:

Illustrative example of subject matter classified in this group:

**F21V 29/773**

{the planes containing the fins or blades having the direction of the light emitting axis}

Definition statement

This place covers:

The direction of fins or blades on the supporting plane are parallel to the axis of the emitted light.

Definition statement

Illustrative example of subject matter classified in this group:

**F21V 29/777**

{the planes containing the fins or blades having directions perpendicular to the light emitting axis}

Definition statement

This place covers:

The fins or blades are supported on planes which are perpendicular to the direction of the emitted light, i.e. that the extension of the fins or blades from the supporting plane are parallel to the direction of light.

Illustrative example of subject matter classified in this group:

F21V 29/78

with helically or spirally arranged fins or blades

Definition statement

This place covers:

Illustrative example of subject matter classified in this group:

F21V 29/80**with pins or wires****Definition statement***This place covers:*

Illustrative examples of subject matter classified in this group:

F21V 29/81

with pins or wires having different shapes, lengths or spacing

Definition statement

This place covers:

Illustrative example of subject matter classified in this group:

**F21V 29/83**

the elements having apertures, ducts or channels, e.g. heat radiation holes

Definition statement

This place covers:

Illustrative examples of subject matter classified in this group:

Channels formed in the mass of the heat sink

Interconnected fins (124) forming channels (122):

F21V 29/85

characterised by the material (liquid coolants [F21V 29/56](#))

Definition statement

This place covers:

Special materials, e.g. for allowing flexibility, bendability and foldability of a heat exchanger

Illustrative example of subject matter classified in this group:

Structural combinations of lighting devices with other articles, not otherwise provided for

Definition statement

This place covers:

Lighting devices that are combined with articles having a primary function unrelated to lighting and not otherwise provided for.

The figures below are examples of structural combinations of lighting devices with other articles.

- The device 20, supported on the flagpole, for properly illuminating a flag during the hours of darkness, is selectively energized so that it directs a beam of light 22 at the flag only during hours of darkness, proper for [F21V 33/00](#).

- The invention relates to a flag-pole light provided by means of a luminous knob (1) comprising a light source (3) which is provided within a cover (2) and emits light rays that are reflected from reflecting surfaces (4, 5) through a translucent lower portion (2b) of the cover, proper for [F21V 33/00](#).
