

CPC COOPERATIVE PATENT CLASSIFICATION

G01L MEASURING FORCE, STRESS, TORQUE, WORK, MECHANICAL POWER, MECHANICAL EFFICIENCY, OR FLUID PRESSURE (sensing pressure changes for compensating measurements of other variables or compensating readings of instruments for variations in pressure [G01D](#) or other relevant subclasses for the variable measured; weighing [G01G](#); converting a pattern of forces into electrical signals [G06K 11/00](#))

NOTE

Attention is drawn to the Notes following the title of class [G01](#).

1/00	Measuring force or stress in general (measuring force due to impact G01L 5/00 ; measuring deformation of bodies as a result of stress by using gauges G01B)	1/165	. . . {with acoustic surface waves}
		1/167	. . . {optical excitation or measuring of vibrations}
		1/18	. using properties of piezo-resistive materials, i.e. materials of which the ohmic resistance varies according to changes in magnitude or direction of force applied to the material (resistance strain gauges for measuring linear expansion or contraction G01B)
1/005	. {by electrical means and not provided for in G01L 1/06 - G01L 1/22 }		
1/02	. by hydraulic or pneumatic means		
1/04	. by measuring elastic deformation of gauges, e.g. of springs	1/183	. . {by measuring variations of frequency of vibrating piezo-resistive material}
1/042	. . {of helical springs}	1/186	. . . {optical excitation or measuring of vibrations}
1/044	. . {of leaf springs}	1/20	. by measuring variations in ohmic resistance of solid materials or of electrically-conductive fluids (of piezo-resistive materials G01L 1/18); by making use of electro-kinetic cells, i.e. liquid-containing cells wherein an electrical potential is produced or varied upon the application of stress
1/046	. . {of spiral springs}		
1/048	. . {of torsionally deformable elements}	1/205	. . {using distributed sensing elements}
1/06	. by measuring the permanent deformation of gauges, e.g. of compressed bodies	1/22	. . using resistance strain gauges (resistance strain gauges for measuring linear expansion or contraction G01B)
1/08	. by the use of counterbalancing forces {(automatic balancing arrangements for measuring electric variables in which a force or torque representing the measured value is balanced by a force or torque representing the reference value G01R 17/08)}	1/2206	. . . {Special supports with preselected places to mount the resistance strain gauges; Mounting of supports}
1/083	. . {using hydraulic or pneumatic counterbalancing forces}	1/2212 {particularly adapted to unbounded-wire-type strain gauges}
1/086	. . {using electrostatic or electromagnetic counterbalancing forces}	1/2218 {the supports being of the column type, e.g. cylindric, adapted for measuring a force along a single direction}
1/10	. by measuring variations of frequency of stressed vibrating elements, e.g. of stressed strings (using resistance strain gauges G01L 1/22 {using piezo-resistive vibrators G01L 1/183 })	1/2225 {the direction being perpendicular to the central axis}
1/103	. . {optical excitation or measuring of vibrations}	1/2231 {the supports being disc- or ring-shaped, adapted for measuring a force along a single direction}
1/106	. . {Constructional details}	1/2237 {the direction being perpendicular to the central axis}
1/12	. by measuring variations in the magnetic properties of materials resulting from the application of stress	1/2243 {the supports being parallelogram-shaped}
1/122	. . {by using permanent magnets}	1/225	. . . {Measuring circuits therefor}
1/125	. . {by using magnetostrictive means (magnetostrictive devices in general H01L 41/12 ; magnetostrictive sensors H01L 41/125)}	1/2256 {involving digital counting}
1/127	. . {by using inductive means (G01L 1/122 , G01L 1/125 take precedence)}	1/2262 {involving simple electrical bridges}
1/14	. by measuring variations in capacitance or inductance of electrical elements, e.g. by measuring variations of frequency of electrical oscillators	1/2268	. . . {Arrangements for correcting or for compensating unwanted effects}
1/142	. . {using capacitors}	1/2275 {for non linearity}
1/144	. . . {with associated circuitry (G01L 1/146 and G01L 1/148 take precedence)}	1/2281 {for temperature variations}
1/146	. . . {for measuring force distributions, e.g. using force arrays (G01L 1/148 takes precedence)}	1/2287	. . . {constructional details of the strain gauges (adjustable resistors H01C 10/00)}
1/148	. . . {using semiconductive material, e.g. silicon}	1/2293 {of the semi-conductor type (semi-conductor devices controllable by variations of applied mechanical force H01L 29/84)}
1/16	. using properties of piezo-electric devices		
1/162	. . {using piezo-electric resonators}		

- 1/24 . by measuring variations of optical properties of material when it is stressed, e.g. by photoelastic stress analysis {using infra-red, visible light, ultra-violet}
- 1/241 . . {by photoelastic stress analysis}
- 1/242 . . {the material being an optical fibre}
- 1/243 . . . {using means for applying force perpendicular to the fibre axis}
- 1/245 {using micro-bending}
- 1/246 . . . {using integrated gratings, e.g. Bragg gratings}
- 1/247 . . {using distributed sensing elements, e.g. microcapsules (along a single optical fibre [G01L 1/242](#))}
- 1/248 . . {using infra-red ([G01L 1/241](#), [G01L 1/242](#) take precedence)}
- 1/25 . using wave or particle radiation, e.g. X-rays, {microwaves}, neutrons ([G01L 1/24](#) takes precedence)
- 1/255 . . {using acoustic waves, or acoustic emission ([G01L 1/10](#) and [G01L 1/16](#) take precedence)}
- 1/26 . Auxiliary measures taken, or devices used, in connection with the measurement of force, e.g. for preventing influence of transverse components of force, for preventing overload
- 3/00 Measuring torque, work, mechanical power, or mechanical efficiency in general**
- 3/02 . Rotary-transmission dynamometers
- 3/04 . . wherein the torque-transmitting element comprises a torsionally-flexible shaft
- 3/045 . . . {by measuring variations of frequency of stressed vibrating elements}
- 3/06 . . . involving mechanical means for indicating
- 3/08 . . . involving optical means for indicating
- 3/10 . . . involving electrical or magnetic means for indicating
- 3/101 {involving magnetic or electromagnetic means}
- 3/102 {involving magnetostictive means (magnetostrictive devices in general [H01L 41/12](#); magnetostrictive sensors [H01L 41/125](#))}
- 3/103 {Details about the magnetic material used}
- 3/104 {involving permanent magnets}
- 3/105 {involving inductive means ([G01L 3/102](#), [G01L 3/104](#) take precedence)}
- 3/106 {involving electrostatic means}
- 3/107 {involving potentiometric means}
- 3/108 {involving resistance strain gauges}
- 3/109 {involving measuring phase difference of two signals or pulse trains}
- 3/12 involving photoelectric means
- 3/14 . . wherein the torque-transmitting element is other than a torsionally-flexible shaft
- 3/1407 . . . {involving springs}
- 3/1414 {using mechanical or hydraulic transducers}
- 3/1421 {using optical transducers}
- 3/1428 {using electrical transducers}
- 3/1435 {involving magnetic or electromagnetic means}
- 3/1442 {involving electrostatic means}
- 3/145 {involving potentiometric means}
- 3/1457 {involving resistance strain gauges}
- 3/1464 {involving screws and nuts, screw-gears or cams}
- 3/1471 {using planet wheels or conical gears}
- 3/1478 {involving hinged levers}
- 3/1485 {involving fluidic means}
- 3/1492 {involving electric couplings}
- 3/16 . Rotary-absorption dynamometers, e.g. of brake type
- 3/18 . . mechanically actuated
- 3/20 . . fluid actuated {(fluid actuated brakes in general [F16D 57/00](#))}
- 3/205 . . . {of the air brake type (air actuated brakes in general [F16D 57/00](#))}
- 3/22 . . electrically or magnetically actuated {(electrical or magnetic brakes in general [H02K 49/00](#))}
- 3/24 . Devices for determining the value of power, e.g. by measuring and simultaneously multiplying the values of torque and revolution per unit of time, by multiplying the values of tractive or propulsive force and velocity (measuring velocity per se [G01P](#))
- 3/242 . . {by measuring and simultaneously multiplying torque and velocity}
- 3/245 . . {by measuring and simultaneously multiplying pressure and velocity}
- 3/247 . . {by measuring and simultaneously multiplying tractive or propulsive force and velocity}
- 3/26 . Devices for measuring efficiency, i.e. the ratio of power output to power input
- 5/00 Apparatus for, or methods of, measuring force, e.g. due to impact, work, mechanical power, or torque, adapted for special purposes (measuring pressure of a fluent medium [G01L 7/00](#) - [G01L 21/00](#); measuring rapid changes of pressure in gas, steam or liquid [G01L 23/00](#))**
- 5/0004 . {Force transducers adapted for mounting in a bore of the force receiving structure ([G01L 5/0009](#) takes precedence)}
- 5/0009 . {Force sensors associated with a bearing (testing of bearings [G01M 13/04](#))}
- 5/0014 . . {by using capacitive sensors}
- 5/0019 . . {by using strain gages, piezo-electric, piezo-resistive or other ohmic-resistance based sensors}
- 5/0023 . . {by using magnetic sensors}
- 5/0028 . {Force sensors associated with force applying means ([G01L 5/0052](#), [G01L 5/0057](#), [G01L 5/0061](#) take precedence)}
- 5/0033 . . {applying a pulling force}
- 5/0038 . . {applying a pushing force}
- 5/0042 . . {applying a torque}
- 5/0047 . {measuring forces due to residual stresses}
- 5/0052 . {measuring forces due to impact ([G01L 5/0061](#), [G01L 5/14](#) take precedence; impact testing of structures [G01M 7/08](#); impact testing of material [G01N 3/00](#))}
- 5/0057 . {measuring forces due to spring-shaped elements}
- 5/0061 . {Force sensors associated with industrial machines or actuators (for the specific machine or actuator involved see relevant class, e.g. [F01](#), [F04](#), [F16](#), [B66](#), [E21](#))}
- 5/0066 . . {Calibration arrangements (calibration of force sensors in general [G01L 25/00](#))}
- 5/0071 . . {Specific indicating arrangements, e.g. of overload}

- 5/0076 . . {Force sensors associated with manufacturing machines ([G01L 5/0066](#), [G01L 5/0071](#) and [B23Q 17/09](#) take precedence; for the specific machine or operation involved [see relevant class](#), e.g. [B21 - B42](#))}
- 5/008 . . . {Force sensors integrated in an article or a dummy workpiece}
- 5/0085 . . . {Force sensors adapted for insertion between cooperating machine elements, e.g. for measuring the nip force between rollers}
- 5/009 . . . {Force sensors associated with material gripping devices ([manipulators in general G01L 5/22](#))}
- 5/0095 . {measuring work or mechanical power}
- 5/03 . for measuring release force of ski safety bindings
- 5/04 . for measuring tension in ropes, cables, wires, threads, belts, bands or like flexible members {([specially adapted for the strings of tennis rackets A63B 51/005](#); [G01L 5/0004](#) takes precedence)}
- 5/042 . . {by measuring vibrational characteristics of the flexible member}
- 5/045 . . {for measuring the tension across the width of a band-shaped flexible member ([measuring flatness G01B](#); [metal rolling in general B21B](#))}
- 5/047 . . {Specific indicating or recording arrangements, e.g. for remote indication, for indicating overload or underload}
- 5/06 . . using mechanical means {([G01L 5/042](#), [G01L 5/045](#) take precedence)}
- 5/08 . . using fluid means {([G01L 5/042](#), [G01L 5/045](#) take precedence)}
- 5/10 . . using electrical means {([G01L 5/042](#), [G01L 5/045](#) take precedence)}
- 5/101 . . . {in which the sensor is inserted into the member}
- 5/102 . . . {in which the sensor is located at a non-interrupted part of the member}
- 5/103 . . . {in which the sensor is fixed at one end of the member}
- 5/105 . . . {using electro-optical means}
- 5/106 . . . {by measuring a reaction force applied on a cantilever beam}
- 5/107 . . . {by measuring a reaction force applied on an element disposed between two supports, i.e. on a plurality of rollers or gliders}
- 5/108 . . . {by measuring a reaction force applied on a single support or glider}
- 5/12 . for measuring axial thrust in a rotary shaft, e.g. of propulsion plants
- 5/13 . for measuring the tractive or propulsive power of vehicles
- 5/133 . . {for measuring thrust of propulsive devices, e.g. of propellers ([aeroplanes B64C](#); [marine propulsion B63H](#); [jet-engines F02K](#))}
- 5/136 . . {Force sensors associated with a vehicle traction coupling ([vehicle connections B60D](#); [control of vehicle brakes B60T](#))}
- 5/14 . for measuring the force of explosions; for measuring the energy of projectiles
- 5/16 . for measuring several components of force
- 5/161 . . {using variations in ohmic resistance}
- 5/162 . . . {of piezoresistors}
- 5/163 . . . {of potentiometers}
- 5/164 . . {using variations in inductance}
- 5/165 . . {using variations in capacitance}
- 5/166 . . {using photoelectric means}
- 5/167 . . {using piezo-electric means}
- 5/168 . . {using counterbalancing forces}
- 5/18 . for measuring ratios of force
- 5/20 . for measuring wheel side-thrust ([in balancing G01M](#))
- 5/22 . for measuring the force applied to control members, e.g. control members of vehicles, triggers
- 5/221 . . {to steering wheels, e.g. for power assisted steering}
- 5/223 . . {to joystick controls}
- 5/225 . . {to foot actuated controls, e.g. brake pedals}
- 5/226 . . {to manipulators, e.g. the force due to gripping}
- 5/228 . . . {using tactile array force sensors}
- 5/24 . for determining value of torque or twisting moment for tightening a nut or other member which is similarly stressed ([arrangements in wrenches or screwdrivers B25B 23/14](#); [screamed connections specially modified to indicate the attainment of a particular tensile load F16B 31/02](#))}
- 5/243 . . {using washers}
- 5/246 . . {using acoustic waves ([for force in general G01L 1/255](#))}
- 5/26 . for determining the characteristic of torque in relation to revolutions per unit of time
- 5/28 . for testing brakes
- 5/282 . . {the vehicle wheels cooperating with rotatable rolls}
- 5/284 . . {Measuring braking-time or braking distance}
- 5/286 . . {Measuring deceleration ([deceleration in general G01P](#))}
- 5/288 . . {Measuring the force necessary to rotate a braked wheel}

Measuring fluid pressure

- 7/00 **Measuring the steady or quasi-steady pressure of a fluid or a fluent solid material by mechanical or fluid pressure-sensitive elements** ([G01L 11/004](#) takes precedence;) transmitting or indicating the displacement of mechanical pressure-sensitive elements by electric, (e.g. photoelectric) or magnetic means [G01L 9/00](#); measuring differences of two or more pressure values [G01L 13/00](#); measuring two or more pressure values simultaneously [G01L 15/00](#); measuring tyre pressure or the pressure of other inflated bodies [G01L 17/00](#); vacuum gauges [G01L 21/00](#); hollow bodies deformable or displaceable under internal pressure, [per se G12B 1/04](#); {pressure sensitive switches using Bourbon gauges [H01H 9/00](#); pressure sensitive fluidum level or volume measuring devices [G01F 17/00](#); [G01F 23/14](#), [G01F 23/16](#) pressure sensitive depth meters [G01C 13/008](#); aircraft altitude meters [G01C 5/005](#)}
- 7/02 . in the form of elastically-deformable gauges
- 7/022 . . {constructional details, e.g. mounting of elastically-deformable gauges ([G01L 7/041](#), [G01L 7/061](#), [G01L 7/082](#), [G01L 7/102](#), [G01L 7/163](#), [G01L 7/182](#) take precedence over [G01L 7/022](#))}

- 7/024 . . {with mechanical transmitting or indicating means ([G01L 7/043](#), [G01L 7/063](#), [G01L 7/084](#), [G01L 7/104](#), [G01L 7/166](#), [G01L 7/185](#) take precedence over [G01L 7/024](#))}
- 7/026 . . {with optical transmitting or indicating means ([G01L 7/045](#), [G01L 7/065](#), [G01L 7/086](#), [G01L 7/106](#), [G01L 7/187](#) take precedence over [G01L 7/026](#))}
- 7/028 . . {correcting or regulating means ([G01L 7/048](#), [G01L 7/068](#), [G01L 7/088](#), [G01L 7/108](#) take precedence over [G01L 7/028](#))}
- 7/04 . . in the form of flexible, deformable tubes, e.g. Bourdon gauges
- 7/041 . . . {Construction or mounting of deformable tubes}
- 7/043 . . . {with mechanical transmitting or indicating means}
- 7/045 . . . {with optical transmitting or indicating means}
- 7/046 . . . {with exhausted tubes}
- 7/048 . . . {correcting or regulating means for flexible, deformable tubes}
- 7/06 . . of the bellows type
- 7/061 . . . {construction or mounting of bellows}
- 7/063 . . . {with mechanical transmitting or indicating means}
- 7/065 . . . {with optical transmitting or indicating means}
- 7/066 . . . {with exhausted bellows}
- 7/068 . . . {correcting or regulating means for bellows}
- 7/08 . . of the flexible-diaphragm type
- 7/082 . . . {construction or mounting of diaphragms (of [semiconductive diaphragms G01L 9/0042](#))}
- 7/084 . . . {with mechanical transmitting or indicating means}
- 7/086 . . . {with optical transmitting or indicating means}
- 7/088 . . . {correcting or regulating means for flexible diaphragms}
- 7/10 . . of the capsule type
- 7/102 . . . {construction or mounting of capsules}
- 7/104 . . . {with mechanical transmitting or indicating means}
- 7/106 . . . {with optical transmitting or indicating means}
- 7/108 . . . {correcting or regulating means for capsules}
- 7/12 . . . with exhausted chamber; Aneroid barometers
- 7/14 with zero-setting means
- 7/16 . . in the form of pistons
- 7/163 . . {construction or mounting of pistons}
- 7/166 . . {with mechanical transmitting or indicating means}
- 7/18 . . using liquid as the pressure-sensitive medium, e.g. liquid-column gauges
- 7/182 . . {constructional details, e.g. mounting}
- 7/185 . . {with mechanical transmitting or indicating means}
- 7/187 . . {with optical transmitting or indicating means}
- 7/20 . . involving a closed chamber above the liquid level, the chamber being exhausted or housing low-pressure gas; liquid barometers
- 7/22 . . involving floats, e.g. floating bells
- 7/24 . . involving balances in the form of rings partly filled with liquid

- 9/00 Measuring steady or quasi-steady pressure of a fluid or a fluent solid material by electric or magnetic pressure-sensitive elements** ([G01L 11/004](#) takes precedence); **Transmitting or indicating the displacement of mechanical pressure-sensitive elements, used to measure the steady or quasi-steady pressure of a fluid or fluent solid material by electric or magnetic means** (measuring differences of two or more pressure values [G01L 13/00](#); measuring two or more pressure values simultaneously [G01L 15/00](#); vacuum gauges [G01L 21/00](#); transferring the output of the sensing member to the indicating or recording part in general [G01D 5/00](#))
- 9/0001 . {Transmitting or indicating the displacement of elastically deformable gauges by electric, electro-mechanical, magnetic or electro-magnetic means ([G01L 9/0026](#), [G01L 9/0033](#), [G01L 9/0082](#), [G01L 9/0089](#), [G01L 9/0091](#) take precedence)}
 - 9/0002 . . {using variations in ohmic resistance ([G01L 9/0051](#) takes precedence)}
 - 9/0004 . . {using variations in inductance ([G01L 9/007](#) takes precedence)}
 - 9/0005 . . {using variations in capacitance ([G01L 9/0072](#) takes precedence)}
 - 9/0007 . . {using photoelectric means ([G01L 9/0076](#) takes precedence)}
 - 9/0008 . . {using vibrations}
 - 9/001 . . . {of an element not provided for in the following subgroups of [G01L 9/0008](#) (not used)}
 - 9/0011 {Optical excitation or measuring}
 - 9/0013 . . . {of a string}
 - 9/0014 {Optical excitation or measuring of vibrations}
 - 9/0016 . . . {of a diaphragm}
 - 9/0017 {Optical excitation or measuring}
 - 9/0019 . . . {of a semiconductive element}
 - 9/002 {Optical excitation or measuring}
 - 9/0022 . . . {of a piezoelectric element}
 - 9/0023 {Optical excitation or measuring}
 - 9/0025 {with acoustic surface waves}
 - 9/0026 . {Transmitting or indicating the displacement of flexible, deformable tubes by electric, electro-mechanical, magnetic or electro-magnetic means ([G01L 9/0008](#) takes precedence; pressure sensitive flexible, deformable tubes in general [G01L 7/04](#))}
 - 9/0027 . . {using variations in ohmic resistance}
 - 9/0029 . . {using variations in inductance}
 - 9/003 . . {using variations in capacitance}
 - 9/0032 . . {using photoelectric means}
 - 9/0033 . {Transmitting or indicating the displacement of bellows by electric, electro-mechanical, magnetic, or electro-magnetic means ([G01L 9/0008](#) takes precedence; pressure sensitive bellows in general [G01L 7/06](#))}
 - 9/0035 . . {using variations in ohmic resistance}
 - 9/0036 . . {using variations in inductance}
 - 9/0038 . . {using variations in capacitance}
 - 9/0039 . . {using photoelectric means}
 - 9/0041 . {Transmitting or indicating the displacement of flexible diaphragms (pressure sensitive flexible diaphragms in general [G01L 7/08](#))}

9/0042	. . {Constructional details associated with semiconductive diaphragm sensors, e.g. etching, or constructional details of non-semiconductive diaphragms (details about the integration or bonding of piezoresistor in or on the diaphragm G01L 9/0052 and G01L 9/0057 respectively)}	9/0091	. {Transmitting or indicating the displacement of liquid mediums by electrical, electro-mechanical, magnetic or electro-magnetic means (G01L 9/0008 takes precedence; pressure sensitive liquid mediums in general G01L 7/18)}
9/0044	. . . {Constructional details of non-semiconductive diaphragms}	9/0092	. . {using variations in ohmic resistance}
9/0045	. . . {Diaphragm associated with a buried cavity}	9/0094	. . {using variations in inductance}
9/0047	. . . {Diaphragm with non uniform thickness, e.g. with grooves, bosses or continuously varying thickness}	9/0095	. . {using variations in capacitance}
9/0048	. . . {Details about the mounting of the diaphragm to its support or about the diaphragm edges, e.g. notches, round shapes for stress relief}	9/0097	. . {using photoelectric means}
9/005	. . . {Non square semiconductive diaphragm}	9/0098	. {using semiconductor body comprising at least one PN junction as detecting element}
9/0051	. . {using variations in ohmic resistance}	9/02	. by making use of variation in ohmic resistance, e.g. of potentiometers, {, i.e. electric circuits therefor, e.g. bridges, amplifiers or signal conditioning}
9/0052	. . . {of piezoresistive elements (circuits therefor G01L 9/06)}	9/025	. . {with temperature compensating means (non electric temperature compensating means G01L 19/04)}
9/0054 {integral with a semiconducting diaphragm}	9/04	. . of resistance-strain gauges
9/0055 {bonded on a diaphragm}	9/045	. . . {with electric temperature compensating means (non electric temperature compensating means G01L 19/04)}
9/0057	. . . {of potentiometers}	9/06	. . of piezo-resistive devices
9/0058	. . . {of pressure sensitive conductive solid or liquid material, e.g. carbon granules}	9/065	. . . {with temperature compensating means (non electric temperature compensating means G01L 19/04)}
9/006	. . . {of metallic strain gauges fixed to an element other than the pressure transmitting diaphragm}	9/08	. by making use of piezo-electric devices {, i.e. electric circuits therefor}
9/0061 {using unbounded-wire-type strain gauges}	9/085	. . {with temperature compensating means (non electric temperature compensating means G01L 19/04)}
2009/0063 {using a fluid coupling between strain gauge carrier and diaphragm}	9/10	. by making use of variation in inductance {, i.e. electric circuits therefor}
9/0064 {the element and the diaphragm being in intimate contact}	9/105	. . {with temperature compensating means (non electric temperature compensating means G01L 19/04)}
2009/0066	. . . {Mounting arrangements of diaphragm transducers; Details thereof, e.g. electromagnetic shielding means}	9/12	. by making use of variation in capacitance {, i.e. electric circuits therefor}
2009/0067 {with additional isolating diaphragms}	9/125	. . {with temperature compensating means (non electric temperature compensating means G01L 19/04)}
2009/0069 {the transducer being mounted on a flexible element}	9/14	. involving the displacement of magnets, e.g. electro-magnets
9/007	. . {using variations in inductance}	9/16	. by making use of variations in the magnetic properties of material resulting from the application of stress
9/0072	. . {using variations in capacitance}	9/18	. by making use of electrokinetic cells, i.e. liquid-containing cells wherein an electric potential is produced or varied upon the application of stress
9/0073	. . . {using a semiconductive diaphragm}	11/00	Measuring steady or quasi-steady pressure of a fluid or a fluent solid material by means not provided for in group G01L 7/00 or G01L 9/00
9/0075	. . . {using a ceramic diaphragm, e.g. alumina, fused quartz, glass}	11/002	. {by thermal means, e.g. hypsometer}
9/0076	. . {using photoelectric means}	11/004	. {by the use of counterbalancing forces (measuring force by the use of counterbalancing forces G01L 1/08)}
9/0077	. . . {for measuring reflected light}	11/006	. . {hydraulic or pneumatic counterbalancing forces}
9/0079 {with Fabry-Perot arrangements}	11/008	. . {electrostatic or electromagnetic counterbalancing forces}
9/008	. . {using piezoelectric devices (piezoelectric resonators G01L 9/0022 ; surface acoustic waves G01L 9/0025)}	11/02	. by optical means
9/0082	. {Transmitting or indicating the displacement of capsules by electric, electro-mechanical, magnetic, or electro-mechanical means (G01L 9/0008 takes precedence; pressure sensitive capsules in general G01L 7/10)}	11/025	. . {using a pressure-sensitive optical fibre}
9/0083	. . {using variations in ohmic resistance}	11/04	. by acoustic means
9/0085	. . {using variations in inductance}	11/06	. . Ultrasonic means
9/0086	. . {using variations in capacitance}		
9/0088	. . {using photoelectric means}		
9/0089	. {Transmitting or indicating the displacement of pistons by electrical, electro-mechanical, magnetic or electro-magnetic means (G01L 9/0008 takes precedence; pressure sensitive pistons in general G01L 7/16)}		

13/00	Devices or apparatus for measuring differences of two or more pressure values	19/0618	. . {Overload protection}
13/02	. using elastically-deformable members or pistons as sensing elements	19/0627	. . {Protection against aggressive medium in general}
13/021	. . {using deformable tubes}	19/0636	. . . {using particle filters}
13/023	. . {using bellows}	19/0645	. . . {using isolation membranes, specially adapted for protection (use of coupling membranes with a coupling fluid in general G01L 19/0046)}
13/025	. . {using diaphragms}	19/0654	. . . {against moisture or humidity}
13/026	. . . {involving double diaphragm}	19/0663	. . {Flame protection; Flame barriers}
13/028	. . {using capsules}	19/0672	. . {Leakage or rupture protection or detection (detection of leakage <i>per se</i> G01M 3/00)}
13/04	. using floats or liquids as sensing elements	19/0681	. . {Protection against excessive heat}
13/06	. using electric or magnetic pressure-sensitive elements	19/069	. . {Protection against electromagnetic or electrostatic interferences}
15/00	Devices or apparatus for measuring two or more pressure values simultaneously	19/08	. Means for indicating or recording, e.g. for remote indication (indicating or recording in general G01D)
17/00	Devices or apparatus for measuring tyre pressure or the pressure in other inflated bodies (specially adapted for mounting on vehicles or tyres B60C 23/00)	19/083	. . {electrical}
17/005	. {using a sensor contacting the exterior surface, e.g. for measuring deformation}	19/086	. . {for remote indication}
19/00	Details of, or accessories for, apparatus for measuring steady or quasi-steady pressure of a fluent medium insofar as such details or accessories are not special to particular types of pressure gauges	19/10	. . mechanical
19/0007	. {Fluidic connecting means}	19/12	. . Alarms or signals
19/0015	. . {using switching means}	19/14	. Housings {(G01L 19/0007 , G01L 19/0084 , G01L 19/0092 , G01L 19/04 , G01L 19/06 take precedence)}
19/0023	. . {for flowthrough systems having a flexible pressure transmitting element}	19/141	. . {Monolithic housings, e.g. molded or one-piece housings}
19/003	. . {using a detachable interface or adapter between the process medium and the pressure gauge}	19/142	. . {Multiple part housings}
19/0038	. . {being part of the housing (other details about the housing G01L 19/14)}	19/143	. . . {Two part housings}
19/0046	. . {using isolation membranes (G01L 13/026 and G01L 19/0645 take precedence)}	19/144	. . . {with dismountable parts, e.g. for maintenance purposes or for ensuring sterile conditions (for detachable interface or adapter between the process medium and the pressure gauge G01L 19/003)}
2019/0053	. {Pressure sensors associated with other sensors, e.g. for measuring acceleration, temperature}	19/145	. . {with stress relieving means}
19/0061	. {Electrical connection means}	19/146	. . . {using flexible element between the transducer and the support}
19/0069	. . {from the sensor to its support}	19/147	. . {Details about the mounting of the sensor to support or covering means}
19/0076	. . . {using buried connections}	19/148	. . {Details about the circuit board integration, e.g. integrated with the diaphragm surface or encapsulation}
19/0084	. . {to the outside of the housing (other details about the housing see G01L 19/14)}	19/149	. . {of immersion sensor, e.g. where the sensor is immersed in the measuring medium or for <i>in vivo</i> measurements, e.g. by using catheter tips (catheter tips <i>per se</i> A61M 25/0067 ; pressure measurements in the body A61B 5/00)}
19/0092	. {Pressure sensor associated with other sensors, e.g. for measuring acceleration or temperature (G01L 9/025 , G01L 9/045 , G01L 9/065 , G01L 9/085 , G01L 9/105 , G01L 9/125 , G01L 19/02 , G01L 19/04 take precedence; measuring two or more variable G01D 21/02 ; temperature sensors with pressure compensation G01K 1/26)}	19/16	. Dials; Mounting of dials
19/02	. Arrangements for preventing, or for compensating for, effects of inclination or acceleration of the measuring device; Zero-setting means (for aneroid barometers G01L 7/14)	21/00	Vacuum gauges
19/04	. Means for compensating for effects of changes of temperature {, i.e. other than electric compensation (electric compensation G01L 9/025 , G01L 9/045 , G01L 9/065 , G01L 9/085 , G01L 9/105 or G01L 9/125)}	21/02	. having a compression chamber in which gas, whose pressure is to be measured, is compressed
19/06	. Means for preventing overload or deleterious influence of the measured medium on the measuring device or <i>vice versa</i>	21/04	. . wherein the chamber is closed by liquid; vacuum gauges of the McLeod type
19/0609	. . {Pressure pulsation damping arrangements}	21/06	. . . actuated by rotating or inverting the measuring device
		21/08	. by measuring variations in the transmission of acoustic waves through the medium, the pressure of which is to be measured
		21/10	. by measuring variations in the heat conductivity of the medium, the pressure of which is to be measured
		21/12	. . measuring changes in electric resistance of measuring members, e.g. of filaments; Vacuum gauges of the Pirani type
		21/14	. . using thermo-couples

21/16	<ul style="list-style-type: none"> by measuring variation of frictional resistance of gases 	23/30	<ul style="list-style-type: none"> Means for indicating consecutively positions of pistons or cranks of internal-combustion engines in combination with pressure indicators
21/18	<ul style="list-style-type: none"> using a pendulum 	23/32	<ul style="list-style-type: none"> Apparatus specially adapted for recording pressure changes measured by indicators (apparatus for recording steady or quasi-steady pressure G01L 19/08; apparatus for recording measurement in general G01D)
