

CPC COOPERATIVE PATENT CLASSIFICATION

Y04S SYSTEMS INTEGRATING TECHNOLOGIES RELATED TO POWER NETWORK OPERATION, COMMUNICATION OR INFORMATION TECHNOLOGIES FOR IMPROVING THE ELECTRICAL POWER GENERATION, TRANSMISSION, DISTRIBUTION, MANAGEMENT OR USAGE, i.e. SMART GRIDS

Systems supporting electrical power generation, transmission or distribution

- 10/00** Systems supporting electrical power generation, transmission or distribution
- 10/10 . Systems characterised by the monitored, controlled or operated power network elements or equipment (not used, see subgroups)
- 10/12 . . the elements or equipments being or involving energy generation units, including distributed generation [DER] or load-side generation
- 10/123 . . . the energy generation units being or involving renewable energy sources
- 10/126 . . . the energy generation units being or involving electricity based vehicles, i.e. power aggregation of electric vehicles [EV] or hybrid vehicles [HEV] (remote or cooperative charging Y04S 30/12; details associated with the interoperability in the section of transportation, e.g. vehicle recognition, authentication, identification or billing Y04S 30/14)
- 10/14 . . the elements or equipments being or involving energy storage units (for systems comprising uninterruptible power supplies or standby generators Y04S 20/12)
- 10/16 . . the elements or equipments being or involving electric power substations
- 10/18 . . the elements or equipments being or involving switches, relays or circuit breakers, e.g. intelligent electronic devices [IED]
- 10/20 . . the elements or equipments being or involving protection elements, arrangements or systems
- 10/22 . . the element or elements being flexible AC transmission systems [FACTS] or power factor or reactive power compensating or correcting units
- 10/24 . . the elements or equipments being or involving voltage regulating units
- 10/26 . . the elements or equipments being or involving measuring units
- 10/265 . . . the elements or equipments being or involving phasor measuring units [PMU]
- 10/30 . Systems characterised by state monitoring, e.g. fault, temperature monitoring, insulator monitoring, corona discharge
- 10/40 . Systems characterised by the display of information, e.g. of data or controls
- 10/50 . Systems or methods supporting the power network operation or management, involving a certain degree of interaction with the load-side end user applications (not used, see subgroups)
- 10/52 . . Outage or fault management (not used, see subgroups)
- 10/522 . . . Fault detection or location
- 10/525 . . . Power restoration

- 10/527 . . . Power quality monitoring
- 10/54 . . Management of operational aspects, e.g. planning, load or production forecast, maintenance, construction, extension
- 10/545 . . . Computing methods or systems for efficient or low carbon management or operation of electric power systems
- 10/56 . . Supply chain or logistics
- 10/58 . . Financial aspects
- 10/60 . . Reporting; Information providing; Statistics or analysis

Systems supporting the management or operation of end-user stationary applications, including also the last stages of power distribution and the control, monitoring or operating management systems at local level

- 20/00** Systems supporting the management or operation of end-user stationary applications, including also the last stages of power distribution and the control, monitoring or operating management systems at local level
- 20/10 . System characterised by the monitored, controlled or operated end-user elements or equipments (not used, see subgroups)
- 20/12 . . the elements or equipments being or involving energy storage units, uninterruptible power supply [UPS] systems or standby or emergency generators involved in the last power distribution stages (energy storage units involved in power generation, transmission and distribution Y04S 10/14; uninterruptible power supply systems or standby or emergency generators as end-user application Y04S 20/248)
- 20/14 . . The elements or equipments being or involving protection elements, switches, relays or circuit breakers
- 20/16 . . The elements or equipments being or involving power plugs, sockets, adapters or power strips
- 20/18 . . The element or elements being a direct current power network, grid or distribution line
- 20/20 . End-user application control systems (not used, see subgroups)
- 20/22 . . The system characterised by the aim of the control (not used, see subgroups)
- 20/221 . . . General power management systems
- 20/222 . . . Demand response systems, e.g. load shedding, peak shaving
- 20/224 Curtailment; Interruptions; Retail price-responsive demand
- 20/225 . . . The system entering an energy saving mode, i.e. sleep, low-power or standby modes
- 20/227 . . . Domotics or building automation systems
- 20/228 Characterised by involving a home automation communication network

20/24	. . The system characterised by the end-user application (not used, see subgroups)	40/12	. . Details of the transmission structure or support between the monitoring, controlling or managing units and monitored, controlled or operated electrical equipment (not used, see subgroups)
20/242	. . . the end-user application being or involving home appliances	40/121	. . . Using the power network as support for the transmission
20/244 the home appliances being or involving heating ventilating and air conditioning [HVAC] units	40/122 Using pulsed signals
20/246 the system involving the remote operation of lamps or lighting equipment	40/123 Using modification of a parameter of the network power signal
20/248	. . . the end-user application involving uninterruptible power supply [UPS] systems or standby or emergency generators (for uninterruptible power supply systems or standby or emergency generators in the last power distribution stages Y04S 20/12)	40/124	. . . Using a data transmission bus
20/30	. Smart metering	40/125	. . . Using phone lines
20/32	. . Systems characterised by remote reading	40/126	. . . Using wireless data transmission
20/322	. . . from a fixed location	40/127 by means of mobile telephony
20/325	. . . from a mobile location	40/128	. . . Using Internet
20/327	. . . The remote reading system including mechanisms for turning on/off the supply	40/14	. . Aspects related to the treatment or conditioning of data or signals (not used, see subgroups)
20/34	. . Systems which determine the environmental impact of user behavior	40/143	. . . Associated to the communication via dedicated transmission supports
20/36	. . Methods or devices for detecting or reporting abnormalities, e.g. faults, outages, leaks	40/146	. . . Associated to the communication via the power transmission network
20/38	. . Identification of individual loads by analysing current or voltage waveforms	40/16	. . Details of management of the overlaying communication network between the monitoring, controlling or managing units and monitored, controlled or operated electrical equipments (not used, see subgroups)
20/40	. . Displaying of usage with respect to time, e.g. monitoring evolution of usage, relating usage and weather conditions	40/162	. . . related to configuration or provisioning
20/42	. . Utility meters which are networked together, e.g. within a single building	40/164	. . . related to network topology
20/44	. . Displaying utility price or cost	40/166	. . . related to fault management
20/46	. . Remote display of meters readings	40/168	. . . for performance monitoring
20/48	. . Methods for determining the topology of meters in a network	40/20	. Information technology specific aspects (not used, see subgroups)
20/50	. . Retrofitting of installed meters	40/22	. . Computer aided design [CAD]; Simulation; Modelling
20/52	. . Systems oriented to metering of generated energy or power	40/24	. . Arrangements for network security or for protecting computers or computer systems against unauthorised activity, e.g. cyber security
20/525	. . . Monitoring the performance of renewable electricity generating systems, i.e. of solar panels		

Systems supporting specific end-user applications in the sector of transportation

30/00	Systems supporting specific end-user applications in the sector of transportation
30/10	. Systems supporting the interoperability of electric or hybrid vehicles (not used, see subgroups)
30/12	. . Remote or cooperative charging
30/14	. . Details associated with the interoperability, e.g. vehicle recognition, authentication, identification or billing

Communication or information technology specific aspects supporting electrical power generation, transmission, distribution or end-user application management

40/00	Communication or information technology specific aspects supporting electrical power generation, transmission, distribution or end-user application management
40/10	. Communication technology specific aspects (not used, see subgroups)

Market activities related to the operation of systems integrating technologies related to power network operation and communication or information technologies

50/00	Market activities related to the operation of systems integrating technologies related to power network operation and communication or information technologies
50/10	. Energy trading, including energy flowing from end-user application to grid
50/12	. Billing, invoicing, buying or selling transactions or other related activities, e.g. cost or usage evaluation
50/14	. Marketing, i.e. market research and analysis, surveying, promotions, advertising, buyer profiling, customer management or rewards
