## C CHEMISTRY; METALLURGY

(NOTES omitted)

### METALLURGY

**C22 METALLURGY** (of iron [C21](#)); **FERROUS OR NON-FERROUS ALLOYS; TREATMENT OF ALLOYS OR NON-FERROUS METALS** (production of metals by electrolysis or electrophoresis [C25](#))

**C22B PRODUCTION AND REFINING OF METALS** (electrolytic [C25](#)); **PRETREATMENT OF RAW MATERIALS**

#### NOTE

In this subclass, groups for obtaining metals include obtaining the metals by non-metallurgical processes, and obtaining metal compounds by metallurgical processes, {as far as specifically indicated in the relevant groups} . Thus, for example, group [C22B 11/00](#) covers the production of silver by reduction of ammoniacal silver oxide in solution, and group [C22B 17/00](#) includes the production of cadmium oxide by a metallurgical process. Furthermore, although compounds of arsenic and antimony are classified in [C01G](#), production of the elements themselves is included in [C22B](#), as well as the production of their compounds by metallurgical processes.

#### WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:
