

A63B

APPARATUS FOR PHYSICAL TRAINING, GYMNASTICS, SWIMMING, CLIMBING, OR FENCING; BALL GAMES; TRAINING EQUIPMENT (apparatus for passive exercising, massage [A61H](#))

Definition statement

This place covers:

Gymnastic or exercising apparatus or equipment, of which examples are:

- Horizontal or parallel bars, balance beams, tightropes or similar apparatus;
- Apparatus for jumping e.g. pole-vaulting poles, spring-boards, trampolines, high-jump apparatus, skipping-ropes;
- Mats for absorbing the shock of landing, e.g. in pole-vaulting;
- Freely-suspended apparatus e.g. swinging rings, trapezes, climbing-ropes;
- Climbing poles, frames or stages, clubs, hoop exercising apparatus;
- Fitness devices, exercising apparatuses for ACTIVE exercising ([A63B 21/00-A63B 24/00](#));
- Exercising apparatus for developing or strengthening muscles or joints against a counterforce, e.g. in weight training;
- Apparatus for conditioning the cardio-vascular system, e.g. exercise bikes, treadmills;
- Apparatus for conditioning particular parts of the body, e.g. particular muscle groups;
- Electric or electronic controls for such apparatus.

Climbing or mountaineering apparatus, including apparatus for climbing trees or poles; Swimming aids or equipment, e.g. fins, flippers, goggles;

- Electric or electronic controls for such apparatus.

Balls for ball games including:

- Solid balls, e.g. golf balls, cricket balls, marbles;
- Hollow non-inflatable balls, e.g. for squash rackets or tennis;
- Hollow inflatable balls e.g. for football, rugby, American football;
- Balls with special arrangements e.g. handles or eccentric centres of gravity (e.g. in bowling balls); and
- Apparatus or methods for manufacturing balls or for handling or treating them, e.g. cleaning.

Rackets, bats or other striking implements for ball games, e.g. tennis rackets and similar, golf clubs, baseball bats, cricket bats, hockey sticks.

Accessories for golf; accessories for other ball games.

Targets or goals for ball games; tennis and similar nets and accessories therefor.

Implements for throwing, e.g. darts, javelins, spears, throwing-hammers, boomerangs, discus discs, quoits, juggling clubs.

Miscellaneous sporting games, e.g. miniature golf, juggling, curling, badminton, shuttlecock or like games, games using a hockey puck; projectiles for these games which do not fall into the above category of balls for ball games.

Training appliances for particular sports, e.g. for fencing, riding, skiing, rowing, punching-balls for boxing, golf swing trainers, artificial mountain slopes.

Other games or sports accessories, e.g. indicating or scoring devices, body protectors.

Relationships with other classification places

- Some sporting subject matter is to be found in other subclasses of class [A63](#).
- Skates, skis and their bindings, roller skates, skate-boards and the design or layout of playing-courts, rinks, bowling-greens or water-skiing areas or the like are classified in [A63C](#).
- Bowling-alleys, bowling-games and equipment for bowls (but not the balls which are in [A63B](#)) and billiards or snooker are classified in [A63D](#).
- Merry-go-rounds, swings, rocking-horses, toy animals for riding, chutes, switchbacks, water roundabouts, helter-skelters or the like are classified in [A63G](#).
- Toys are in [A63H](#).
- Racing, riding sports and equipment and accessories therefore, including race-courses and race-tracks, are in [A63K](#).

In relation to apparatus or methods for manufacturing balls, it should be borne in mind that working of plastics or substances in a plastic state is classified in class [B29](#) and the chemical or compositional aspects of balls is in Section [C](#), e.g. compositions for making golf balls are usually in subclass [C08L](#).

- Sporting subject matter can be found in other subclasses within CPC
- Methods to process and manage data is found under subclass [G06Q](#).
- ICT specially adapted for therapies or health-improving plans relating to physical therapies or activities, e.g. physiotherapy, acupuncture or exercising [G16H 20/30](#)
- Teaching a sequence of movements in sports is found in [G09B 19/0038](#).

Limiting references

This place does not cover:

Apparatus for passive exercising or massage	A61H
---	----------------------

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Non-skid devices or attachments for footwear, e.g. crampons	A43C 15/00
Breathing masks or helmets for use at high altitudes	A62B 18/00
Safety belts for climbers	A62B 35/00
Picks	B25D 7/00
Ladders attached to fixed structures	E06C 9/04

Informative references

Attention is drawn to the following places, which may be of interest for search:

Protective equipment in the form of clothing or garments for sporting purposes	A41D 13/00
Uses of garments specially adapted for sport activities	A41D 2600/10
Soft caps; hoods with protection against blows	A42B 1/08
Helmets	A42B 3/00
Measuring muscular strength for diagnostic purposes	A61B 5/22
Video games	A63F 13/00
Manufacturing sport articles	B21K 17/00

Connecting valves to inflatable elastic bodies	B60C 29/00
Unicycles	B62K 1/00
Bicycles	B62K 3/00
Vessels or like floating structures for pleasure or sport	B63B 34/00
Life-saving in water	B63C 9/00
Breathing aids for swimming, e.g. snorkels	B63C 11/12
Training of parachutists	B64D 23/00
Devices for producing mechanical power from muscle energy	F03G 5/00
Weapons for projecting missiles	F41B
Sling weapons	F41B 3/00
Archers' finger tabs	F41B 5/1473
Traps for clay-pigeon targets	F41J 9/18
Stop watches	G04F
Controlling member being movable by hand, e.g. joystick	G05G 9/047
PDA - Personal Assistance Device	G06F 1/1626
Time or attendance registers	G07C
Signal device with lights	G08B 5/36
Simulators for training	G09B 9/00
Devices for exercising or strengthening of fingers or arms in teaching music	G09B 15/06
Teaching repetitive work cycles; sequence of movements	G09B 19/003
Displaying; advertising; signs; labels or name-plates; seals	G09F
ICT specially adapted for therapies or health-improving plans relating to physical therapies or activities, e.g. physiotherapy, acupressure or exercising	G16H 20/30

Special rules of classification

In [A63B](#), indexing codes are required whenever the additional information is relevant; also, when only an indexing code applies.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Support element	an apparatus element for supporting a body part during exercising, e.g. a handle for the hand, a seat for the buttocks;
Handle	a support element for a single hand or arm (upper limb);
Pedal	a support element for a single foot or leg (lower limb);
Steps	support elements for lower limbs;
Band	a continuous support element for upper or lower limbs, used at undetermined, variable places during exercising;
Platform	a support element of an exercising apparatus, used for any body part, e.g. for both feet

Body planes

Synonyms and Keywords

In patent documents, the following words/expressions are often used as synonyms:

- "the body-symmetrical plane" and "midsagittal plane or median plane"

A63B 1/00

Horizontal bars

A63B 21/002

isometric or isokinetic, i.e. substantial force variation without substantial muscle motion {or wherein the speed of the motion is independent of the force applied by the user}

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Isometric exercise	a type of strength training in which the joint angle and muscle length do not change during contraction;
Isokinetic exercise	dynamic muscle activity performed at a constant angular velocity; torque and tension remain constant while muscles shorten or lengthen;
Isotonic exercise	active exercise without appreciable change in the force of muscular contraction, with shortening of the muscle.

Special rules of classification

The use of exercising apparatuses for ACTIVE physical training for cardio vascular, agility or coordination.

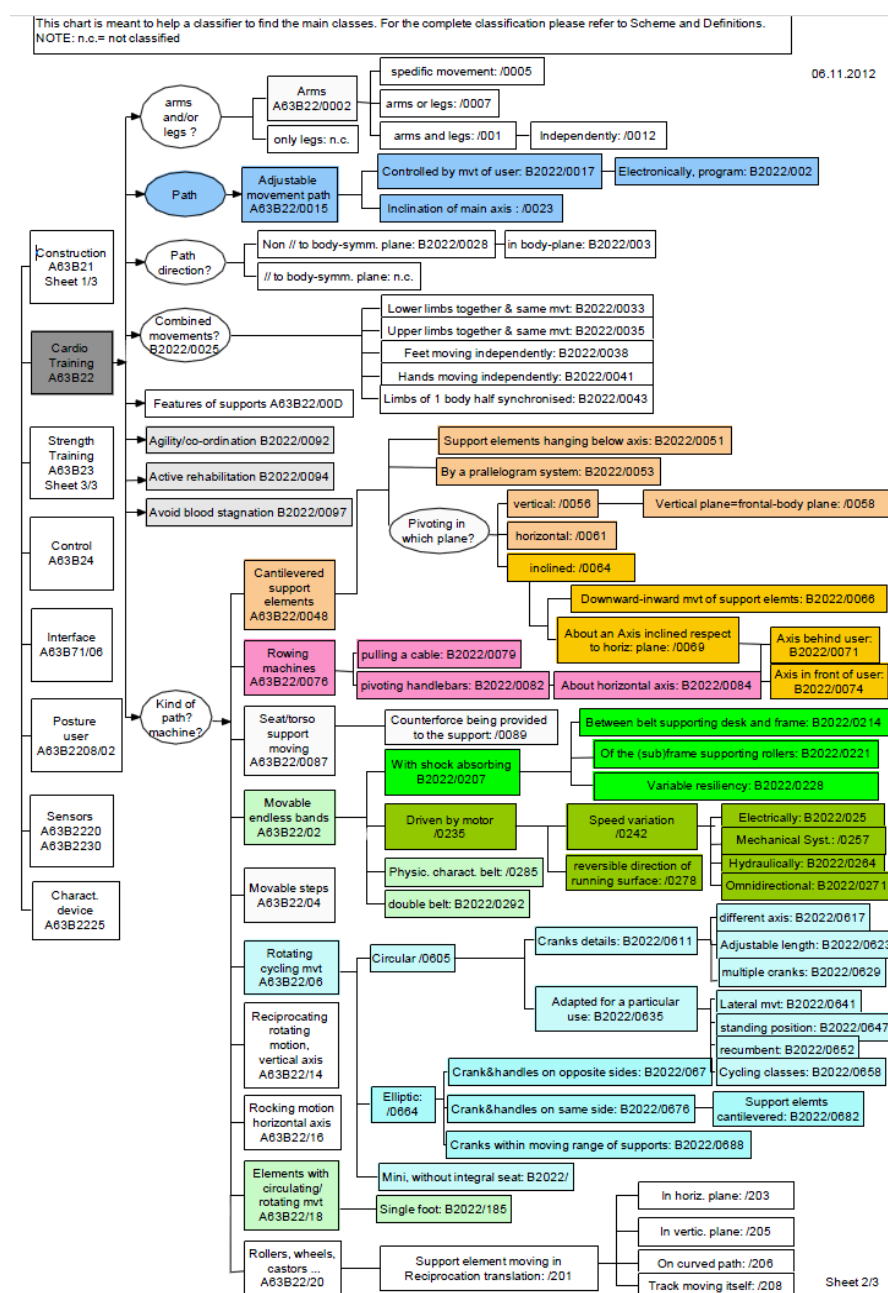

Within [A63B 22/00](#) the main different aspects to be classified are:

which limbs ([A63B 22/0002](#)); movement-path direction ([A63B 22/0028](#));

combination of movements ([A63B 22/0033](#)-[A63B 22/0043](#)); Adjustability of path ([A63B 22/0015](#)); kind of path ([A63B 22/0048](#)-[A63B 22/20](#)).

These further different aspects should be considered while classifying the apparatuses for active physical exercising (see also the flowchart annexed after [A63B 24/00](#) and the Classification examples for [A63B 22/00](#)):

Construction features of an exercise apparatus	A63B 21/00
Electric or electronic control	A63B 24/00
Means for physically limiting movements of body parts	A63B 69/0057
Sensors	A63B 2220/00
Position of the user during training	A63B 2208/00

	<p>A63B 22/001 : arms and legs simultaneously ; A63B 22/0061 :support pivoting in a horizontal plane ; A63B 22/0664 : Elliptical movement ; A63B 2022/067 : crank and handles being on opposite sides</p>
<p>A63B 22/0012 : arms and legs being functionally independent. A63B 22/203 : using rollers in a horizontal plane ; A63B 22/0664 : Elliptical movement ; A63B 2022/0676 : crank and handles being on the same side</p>	
	<p>A63B 22/001 : arms and legs simultaneously ; A63B 22/0005 : with particular movement of the arms provided by handles. A63B 22/0664 : Elliptical movement ; A63B 2022/0682 : support elements being cantilevered</p>
<p>A63B 22/001 : arms and legs simultaneously ; A63B 22/0061 : support pivoting in a horizontal plane ; A63B 22/0664 : Elliptical movement ; A63B 2022/0688 : cranks being substantially within the horizontal moving range of the support elements</p>	

		<p>A63B 22/0056 : stepper in vertical plane If not in anti-phase; A63B 2022/0033 : simultaneously ; A63B 2022/0038 : independently</p>
<p>A63B 22/0058 : stepper, vertical plane is body-plane ; A63B 2022/0053 : parallelogram If one-way clutches ; A63B 21/157 : ratchet-wheel links ; A63B 2022/0038: foot moving independently</p>		 <p>FIG. 1</p>
		<p>A63B 22/001 : arms and legs simultaneously ; A63B 22/0069 : pivoting around inclined axis ; A63B 2022/0071 : axis behind ; A63B 69/0022 : for skating ; A63B 69/182: cross-count</p>
<p>A63B 22/0069 : pivoting around inclined axis ; A63B 2022/0074 : axes in front not ; A63B 22/0066 because movement downward-outward</p>		

	<p>A63B 22/0076 : Rowing ; A63B 2022/0084 : handlebar with horizontal axis ; A63B 22/0089: a counterforce being provided to the seat</p>
<p>A63B 69/06 : for rowing ; A63B 2022/0082 : pivoting handlebars ; A63B 21/285 : 2 in cooperation ; A63B 2225/107: multi-station, same kind of resistance</p>	
	<p>A63B 22/0089 : resistance provided to seat ; A63B 22/001: for arms and legs</p>
<p>A63B 22/0694 : cycling movement, without integral seat, to be placed in front of a chair ; A63B 22/0605 : circular ; A63B 22/0023: inclination adjustable</p>	
	<p>A63B 22/20 : using rollers over the floor ; A63B 21/0004 : moving as a whole</p>

<p>A63B 22/203 : translating horizontally ; A63B 2022/0038 : foot supports moving independently ; A63B 22/0023: adjusting inclination</p>	
	<p>A63B 22/001 : Arms and legs simultaneously ; A63B 22/205 : translating substantially vertically ; A63B 2022/206: on a curved path</p>
<p>A63B 22/0012 : Arms and legs simultaneously, independently ; A63B 22/203 : translating horizontally ; A63B 2022/206 : on a curved path ; A63B 2022/0038 : feet moving independently ; A63B 2022/0035: hands moving independently</p>

Position of the user during training	A63B 2208/00

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Concentric exercise	exercise: the muscle shortens as it contracts, a concentric contraction of the biceps would cause the arm to bend at the elbow and hand to move from near to the leg, to close to the shoulder
Eccentric exercise	the muscle elongates while under tension due to an opposing force being greater than the force generated by the muscle. Rather than working to pull a joint in the direction of the muscle contraction, the muscle acts to decelerate the joint at the end of a movement
Isometric exercise	a type of strength training in which the joint angle and muscle length do not change during contraction
Isokinetic exercise	dynamic muscle activity performed at a constant angular velocity; torque and tension remain constant while muscles shorten or lengthen;
Isotonic exercise	active exercise without appreciable change in the force of muscular contraction, with shortening of the muscle.

A63B 2023/003

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Apparatus for climbing poles, trees, or the like	A63B 27/00
Walking/Climbing sticks	A45B
Ski-sticks	A63C 11/22

A63B 31/00

Swimming aids (teaching swimming [A63B 69/10](#) - [A63B 69/14](#); life-saving in water {, e.g. life-buoys, life-belts,} [B63C 9/00](#))

Relationships with other classification places

Body flotation supports, e.g. for children, are to be classified in [B63C 9/00](#) and subgroups (see, e.g. [B63C 9/08](#) and [B63C 9/13](#)), even if they do not fit the definition "life-saving".

In [B63C 9/00](#) and subgroups, the sole purpose of the device is to provide enough flotation for people - under distress – to stay afloat. It is designed with the capacity to maintain a person afloat.

On the other hand, [A63B 31/00](#) relates to swimming aids, i.e. devices which do not necessarily provide a flotation capacity sufficient to maintain a person afloat and are intended to help swimming. "Swimming" needs to be understood as an active movement by the user and not simply staying afloat.

There are inevitably overlaps, so double classification might be needed.

Attention is drawn to the following places, which may be of interest for search:

Billiards	A63B 2243/002
Shaping of plastics, golf balls	B29L 2031/546

Special rules of classification

Billiard, pool and snooker balls are classified in [A63B 37/00](#) and [A63B 2243/002](#).

A63B 37/0003

{Golf balls}

Relationships with other classification places

The subgroups are arranged in a tree structure, of which the following are the main branches:

- general subgroup for golf balls (note: to be allocated as "Additional Information" when the golf ball is not the invention but nevertheless is mentioned in the application);
- dimples and protrusions;
- non-structural external layer: coatings and markings, exclusively;
- three structural layers: cover (exclusively), intermediate layer (all the intermediate layers: Inner Cover, Mantel, Outer Core) and core (exclusively), respectively;
- ball as a whole.

The following "branches" apply independently to each of the different structural layers (cover, intermediate layer, core) and are repeated for each of the structural layers:

- Materials and Chemistry
- Coefficient of restitution
- Hardness
- Hardness Gradient
- Thickness / Diameter
- Deflection or Compression
- Density / Gravity
- Melt flow rate
- Mass, Weight (only common to the core and to the ball as a whole)
- Initial Velocity (only common to the core and to the ball as a whole)
- Flexural Modulus

(Note that some properties are not repeated for each structural layer and have therefore not been mentioned here).

It will be often necessary to classify the chemistry aspects outside of the scope of [A63B](#). Thus, multiple classification is commonly used between classes and sections. Some guidance can be derived from the following examples:

- [C08L 23/0876](#): Salts from copolymers of ethene and carboxylic acid, as neutralised ethylene carboxylic acid copolymers, i.e. ionomers
- [C08L 75/00](#): Compositions of polyureas or polyurtehanes
- [C08L 77/00](#): Compositions of polyamides obtained by reactions forming a carboxylic amide link in the main chain
- [C08K 5/00](#): Use of organic ingredients
- [C08K 5/098](#): Metal salts of carboxylic acids
- [C08G 18/00](#): Polymeric products of isocyanates or isothiocyanates
- [C09D 1/00](#): Coating compositions
- [B29C 35/00](#): Heating, cooling or curing, e.g. crosslinking, vulcanising
- [B29C 45/14819](#): Injection moulding by completely encapsulating inserts (typical for golf balls)
- [B29C 59/00](#): Surface shaping, e.g. embossing

"Practice/training golf balls" are also allocated to subgroups [A63B 69/3655](#) and/or [A63B 69/3688](#).

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Golf balls for practising drives	A63B 69/3655
Golf balls for practising putts	A63B 69/3688
Methods for moulding	B29
Chemical aspects	C08

Special rules of classification

The best approach for classifying golf ball documents:

Look through the abstract;

Look at the drawings;

Look through the claims;

Look through the description:

- Pay attention to the first paragraph, "Summary of the invention";
- In the "Detailed description of this invention" pay attention wherever it is written "...of this invention" (and similar);
- Depending on the main invention, some information from the description can be considered significant or not, that is to say, to be classified as "Invention Information" or "Additional Information". For classifying "Additional Information" pay attention to the different embodiments, examples and tables;
- Sometimes the examples compare the invention with another golf ball, which is usually not to be classified.
- Common general knowledge present in the Description should not be classified.

The physical properties of subassemblies encompassing simultaneously different layers of a golf ball are to be classified as properties of the golf ball as a whole; e.g. the "compression of a golf ball subassembly consisting of the center and the intermediate layer has a compression of 50 or less" is classified as [A63B 37/0087](#).

"Volume" and/or "surface" of the core or a layer of a golf ball must be classified with the equivalent physical property of diameter or thickness of the corresponding layer.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

The issue of the different layers of the ball:

- Non-structural: Coating/Marking.
- Structural: Cover, Intermediate layer, Core.

Golf balls usually have only ONE cover and only ONE core. The rest of the structural layers are simply intermediate layers.

- Irrespective of the wording and leaving aside the Coating/Markings (if any):
- Cover - the outermost mechanical layer
- Core - the innermost part of the ball
- Intermediate layer - every layer therebetween
- Therefore:

Glossary of terms

- "Inner cover" - intermediate layer (not Cover)
- "Outer core" - intermediate layer (not Core)
- "Core thickness": it must necessarily refer to the "outer core" (and, therefore, an Intermediate layer), as a "core" is defined by its diameter or its radius, but not by its thickness: this feature is, therefore, to be classified in [A63B 37/0045](#)
- "Mantel": it can refer to the cover OR the coat OR the intermediate layer: Therefore, it has to be interpreted correctly in order to know where to classify the information relating to such a "mantel"
- This is graphically exemplified as follows:

Other terms:

- "Thread wound core": only used for thread wound cores with nothing inside. It is, therefore, not to be used when a thread layer is wound around a core that is not thread.
- In long patent descriptions, it is often mentioned that the invention may be made from one up to three or more layers.

However, unless every single layer explicitly appears in claims, it is not to be classified in [A63B 37/0073](#) - [A63B 37/0076](#) every time.

For example:

- If the invention is mainly manufactured with 1 layer (core) but it can also be used in golf balls with more layers (but this information does not appear in the claims), we classify as follows:

Invention information: [A63B 37/0073](#);

Additional information: [A63B 37/0074](#), [A63B 37/0075](#), [A63B 37/0076](#).

If the invention describes in the claims every possible case (one, two, three-layer golf balls, etc.), classification is as follows:

Invention information: [A63B 37/0073](#), [A63B 37/0074](#), [A63B 37/0075](#), etc.

- "Multi-piece balls": Can be used both for three-piece balls and balls having two or more intermediate layers.
- Solid core ≠ Rigid core ([A63B 37/0054](#)) unless they specify that it is made of metal.
- Translucent cover [A63B 37/0024](#)
- [A63B 37/0039](#): to be allocated when the chemistry of the intermediate layer is neither an Ionomer, nor Polyurethane, nor Polybutadien, or, at least, a very unusual one amongst the previous one (so, mixed-up with other stuff, etc.)
- Initial Velocity concerning the Cover: allocate [A63B 37/0084](#).
- "Weight; Mass": Used for, e.g. specific weight, but not for chemical weight ratios.
- [A63B 37/0067](#) and [A63B 37/0083](#): Weight, just specific weight, not for ratio weight.
- MFR = Melt Flow Rate = MFI= Melt Flow Index: [A63B 37/0036](#) or [A63B 37/0048](#) (or both, if the layer is not specified).

Glossary of terms

- COR = Coefficient of Restitution -> [A63B 37/003](#), [A63B 37/0041](#), [A63B 37/0061](#) or [A63B 37/0078](#).
- Flexural Modulus [Mpa=factor x psi] is different from Young modulus=Tensile modulus=Elastic modulus, lonomer modulus, Stiffness modulus, Flexural rigidity.
- "Hardness Gradient" is most likely to be found with cores. Example: The core has a JIS-C hardness at its surface of at least 70 and a JIS-C hardness at its center that is at least 10 units lower than the hardness at the core surface.
- "Hardness distribution amongst the different ball layers" ([A63B 37/0092](#)) is to be allocated when the hardness gradient does not apply only to a specific single layer amongst several, but to the whole ball.
- Rather common parameters such as "diameter of dimple", "spin rate", "rebound resilience", "coefficient of drag", etc. are not to be classified unless they are described in the claims, the abstract or the description accurately and in a quantitative manner, or unless they are mentioned throughout the document continuously (even if not quantitatively)... except with the "scuff resistance", which is usually valued with qualitative (not quantitative) terms (i.e. "good", "bad", "better", etc.) and is to be classified even without specific values being given therefor.
- [A63B 45/00](#): Manufacture of golf balls. It is written in claims or abstract; or it is fully described in description.
- Material manufacturing process" for cover, internal layer or core: [A63B 45/00](#) and the corresponding [A63B 37/0023](#), [A63B 37/0038](#), [A63B 37/005](#) (or [A63B 37/0024](#), [A63B 37/0039](#), [A63B 37/0051](#)).
- "Moulding/molding compression": we do not have any specific subgroup for this: it is, however, a different concept from "deflection or compression" ([A63B 37/0034](#), [A63B 37/0046](#), [A63B 37/0065](#), [A63B 37/0087](#)). These features are, therefore, to be understood as "Method for Manufacturing", for which the correct subgroup is [A63B 45/00](#)
- [A63B 45/02](#): Methods or apparatus for marking golf balls. It usually goes with [A63B 37/0022](#) (either as "Invention" or "Additional" information) if they describe the mark or it appears in the drawings.
- A circular dimple is something standard -> Do not classify this feature in any of [A63B 37/0007](#) - [A63B 37/0011](#).
- Interpret [A63B 37/002](#) (i.e. "Specified dimple diameter") as "Specified dimple diameter, or length of their main axis" instead. Sometimes, dimples may have various shapes like polygonal or elliptical: in such cases perimeters, lengths, widths, major and minor axis lengths are given.
- Patents with specific drawings of one or several dimples (cross section) -> [A63B 37/0012](#).
- If some parameters (depth, diameter) appear in drawings, accurate figures are likely to be found in the text (see [A63B 37/0019](#), [A63B 37/002](#)):
- Drawings with various dimples with and without sub-dimples -> Classify simultaneously as [A63B 37/0012](#) and [A63B 37/0015](#);
- When the shape of the dimple is not clear, not important in that document, etc. -> Classify as "Additional Information" [A63B 37/0012](#).

"Volume Ratio": Classified for the time being in [A63B 37/0016](#) and [A63B 37/0017](#).

Dimple coverage (%) = Occupation ratio -> [A63B 37/0021](#).

Compression ([A63B 37/0034](#), [A63B 37/0046](#), [A63B 37/0065](#), [A63B 37/0087](#)): it can be "PGA compression", "Atti compression", "Riehle compression" or "Load/Deflection tests".

PGA Compression = Atti Compression: A piston whose travel path is fixed compresses the ball against a spring and the spring deflection is then measured.

Riehle Compression: It measures the deformation of ball under a fixed load of 90.9 kg.

Load/Deflection tests: Same as "Riehle Compression" but with a plurality of possible loads.

Synonyms and Keywords

In patent documents, the following words/expressions are often used with the meaning indicated:

Outer Cover	used for Cover
Shell	an Intermediate layer
Inner Core, Center, Centre	used for Core

A63B 37/0005

{Protrusions}

Definition statement

This place covers:

A63B 37/0006

{Arrangement or layout of dimples}

Definition statement

This place covers:

Features on the outer surface as shown in the following drawing:

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Computer-aided design	G06F 30/00
Finite element generation, e.g. wire-frame surface description, tessellation	G06T 17/20

A63B 37/0007

{Non-circular dimples}

Definition statement

This place covers:

A63B 37/0008

{Elliptical}

Definition statement*This place covers:***A63B 37/0009**

{Polygonal}

Definition statement*This place covers:*

A63B 37/0012**{Dimple profile, i.e. cross-sectional view}****Definition statement***This place covers:***A63B 37/0022****{Coatings, e.g. paint films; Markings}****Definition statement***This place covers:*

Varnish, paint etc. any thin layer coating the cover. Therefore, this encompasses only the coating and/or markings.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Methods for marking	A63B 45/02
---------------------	----------------------------

A63B 37/0023**{Covers}****Definition statement***This place covers:*

Used only for the Cover.

A63B 37/0024**{Materials other than ionomers or polyurethane}****Definition statement***This place covers:*

"Special materials", meaning any materials other than those which are normally used for covers or cores. (Poly)urethanes and ionomers are all normally used in covers, thus not "special", unless it is referred to a very specific unusual type of ionomer or polyurethane.

Any material which makes the cover be translucent is considered "special" and, thus, classified here.

A63B 37/0039**{characterised by the material}****Definition statement***This place covers:*

"Special materials" means any materials other than those which are normally used for covers or cores. (Poly)butadiene, (Poly)urethanes, ionomers are all normally used, thus not "special", unless the material is a very specific and unusual type of (poly)butadiene, (poly)urethane or ionomer.

Apparatus or methods for marking balls	A63B 45/02
--	----------------------------

A63B 37/005**{Cores}****Definition statement***This place covers:*

Used only for the Core.

A63B 37/0077**{Physical properties}****Special rules of classification**

Every subgroup of [A63B 37/0077](#) defining a property for which there is no specific subgroup defining the distribution of such property amongst the several layers of a golf ball is also used for classifying such distribution.

The physical properties of subassemblies encompassing simultaneously different layers of a golf ball are to be classified as properties of the golf ball as a whole; e.g. the "compression of a golf ball subassembly consisting of the centre and the intermediate layer has a compression of 50 or less" is classified as [A63B 37/0087](#).

A63B 37/0097

{Layers interlocking by means of protrusions or inserts, lattices or the like}

Definition statement

This place covers:

The following images that show balls with layers that are interlocked by protrusions, inserts or lattices.

Mechanical measuring of sport	G01B 5/0023

A63B 47/02

for picking-up {or collecting}

Definition statement

This place covers:

The following image shows a device for picking-up or collecting balls.

**References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Analogous devices for inserting a golf tee with a ball on it	A63B 57/0037
Bats or rackets having ball-dispensing or storing means	A63B 60/38
Targets or goals with ball-returning means	A63B 2063/001

A63B 47/021

{for picking-up automatically, e.g. by apparatus moving over the playing surface}

Definition statement

This place covers:

The following image shows an apparatus for automatic pick-up by moving over a surface.

**References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Apparatus for gathering together crops spread on the soil, e.g. apples, beets, nuts, potatoes	A01D 51/00
---	----------------------------

A63B 2047/022

{Autonomous machines which find their own way around the playing surface}

Definition statement

This place covers:

Robot-like machines running around collecting balls, able to respond autonomously to obstacles and the like. Not intended to be used for radio-controlled vehicles operated remotely by a person.

A63B 47/025

{Installations continuously collecting balls from the playing areas, e.g. by gravity, with conveyor belts}

References**Limiting references**

This place does not cover:

Golf cups with ejector means	A63B 57/405
Targets or goals with ball returning means	A63B 2063/001

A63B 47/04

for cleaning balls (apparatus for cleaning balls, as accessories for bowling- or table alleys [A63D 5/10](#))

Devices for measuring the tension of strings (for controlling the tension during stringing [A63B 51/14](#))

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Devices for controlling the tension during stringing	A63B 51/14 , A63B 51/16
Measuring force, in general	G01L
Apparatus for or methods of measuring the tension in ropes, cables, wires, threads, belts, bands or like flexible members	G01L 5/04

A63B 51/01

Pre-woven string-sets ready for insertion into a frame

Special rules of classification

Head subframes for replacing the stringing [A63B 49/038](#).

A63B 51/02

Strings; String substitutes; Products applied on strings, e.g. for protection against humidity or wear

Definition statement

This place covers:

Strings for sports rackets.

Relationships with other classification places

Methods of making a string for a racquet are usually classified in [D02G 3/444](#)

Yarn or threads for use in sports applications are ALSO classified in [D02G 3/444](#)

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Mechanical methods or apparatus in the manufacture of artificial filaments, threads, fibres, bristles or ribbons	D01D
Yarns or threads for use in sports applications	D02G 3/444
Ropes or cables in general	D07B
Strings for musical instruments	G10D 3/10

A63B 53/00

Golf clubs

Definition statement

This place covers:

Golf clubs considered as a whole, e.g. documents disclosing clubs characterised by the form, balance, Swing-weight or frequency of the overall club. In many cases the documents should also be classified in subgroups for individual characteristics (see Technical Relationships).

Relationships with other classification places

For special materials or manufacturing processes, the specific field concerned should be consulted, e.g. forged product [B21K](#); making sport articles [B21K 17/00](#); casting [B22D](#); casting of metals/special casting [B22D 19/00](#), [B22D 25/00](#); soldering/welding [B23K](#); laser welding [B23K 26/00](#); shaping composites [B29C 70/00](#); sport equipment [B29L 2031/52](#); producing articles from plastics [B29D](#); shaping of plastics for clubs [B29L 2031/5227](#); heat treatment [C21D](#); alloys [C22C 19/055](#); metal matrix composite [C22C 32/00](#); casting metallic material [C23C](#).

Also, classify where appropriate in classes relating to specific parts of the club.

Clubs or attachments on clubs for golf training	A63B 69/3632
Clubs or attachments on clubs for putting	A63B 69/3685
Metal forging or pressing of sports articles	B21K 17/00
Shaping of plastics for clubs	B29L 2031/5227

Special rules of classification

Details are also to be classified in subgroups of [A63B 60/00](#) and [A63B 2102/00](#), where appropriate.

Details of manufacturing methods are additionally classified according to the relevant manufacturing process.

A63B 53/005

{Club sets}

Definition statement

This place covers:

Group relating to sets of golf clubs, i.e. golf clubs related by a common characteristic throughout the series, e.g. length, swingweight, resonant frequency; the characteristic may be constant or progressive throughout the set.

A63B 53/02

Joint structures between the head and the shaft

References

--	----------------------------

A63B 53/023

{adjustable angular orientation}

Definition statement

This place covers:

Golf clubs in which the angular orientation of the shaft relative to the head can be adjusted (see image below).

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Substantially flexible or hinged shafts	A63B 60/0081
---	------------------------------

A63B 53/025

{lie angle only, i.e. relative angular adjustment between the shaft and the club head about an axis parallel to the intended line of play when the club is in its normal address position}

Definition statement

This place covers:

Golf clubs in which the lie angle of the shaft relative to the head can be adjusted (see image below).

A63B 53/026

{loft angle only, i.e. relative angular adjustment between the shaft and the club head about a horizontal axis perpendicular to the intended line of play when the club is in its normal address position}

Definition statement

This place covers:

Golf clubs in which the loft angle of the shaft relative to the head can be adjusted (see image below).

**A63B 53/027**

{about the longitudinal axis of the shaft only}

Definition statement

This place covers:

Golf clubs in which the shaft can be adjusted about its longitudinal axis relative to the head (see image below).

A63B 53/028

{with a range of alternative attachment points for the shaft}

Definition statement

This place covers:

Golf clubs in which the shaft can be attached to the head at any of a range of alternative attachment points (see image below).

A63B 53/04

Heads

Special rules of classification

Subgroup [A63B 53/04](#) is only to be used in case that none of its dependent lower subgroups is applicable; e.g. a document disclosing a driver but where the technology can also be used in iron clubs and putter should not be classified in [A63B 53/04](#), but rather in [A63B 53/0466](#) as Invention, [A63B 53/047](#) and [A63B 53/0487](#) as Additional.

Multiple entry classification is used, i.e. documents are classified in each subgroup that is applicable.

Club heads with the following features are additionally classified as follows:

- Sets of golf clubs, i.e. in which the heads are related throughout the set by a constant or progressive characteristic, in [A63B 53/005](#);
- Club heads with a face insert in [A63B 53/0416](#);
- Special sole configurations in [A63B 53/0433](#);
- Visual indicators for aligning the golf club in [A63B 53/0441](#);
- Heads with added weights, e.g. changeable, replaceable, in [A63B 2053/0491](#); [A63B 60/02](#)
- Materials in [A63B 2209/00](#) and subgroups.

Documents relating to woods must be classified in [A63B 53/0466](#).

Documents relating to irons must be classified in [A63B 53/047](#).

Putter heads are classified in [A63B 53/0487](#).

Adjustable heads are classified in [A63B 53/06](#), [A63B 60/00](#), [A63B 60/46](#).

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

A63B 53/0416

{Heads having an impact surface provided by a face insert}

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Striking surfaces, in general, coated with high-friction abrasive material	A63B 60/004
--	-----------------------------

A63B 53/0433

{with special sole configurations}

Definition statement

This place covers:

A special configuration of the portion of the club head that normally touches the ground; this can be on the external side or on the internal side of this portion, e.g. a difference in thickness, ribs or even a lower portion that usually should contact the ground but which is designed not to touch the ground.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Strengthening ribs	A63B 53/045
--------------------	-----------------------------

A63B 53/0437

{with special crown configurations}

Special rules of classification

In general, only wood clubs are regarded as having a crown. However, if in an iron club or a putter, the invention lies in the top portion of the club head, and this subgroup should be used.

[A63B 53/0441](#) is the relevant group, if the effect is only a visual indication.

A63B 53/0441

{with visual indicators for aligning the golf club}

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Heads with special crown configurations	A63B 53/0437
Aiming or aligning devices for training purposes, for woods and irons; for putters	A63B 69/3632 , A63B 69/3685

Special rules of classification

Considering that almost all putter heads and many woods have some form of visual indicator for aligning the golf club, this class is only given to those documents which describe details of the visual indicator, or in which the visual indicator differs from a standard marking.

A63B 53/0445

{Details of grooves or the like on the impact surface}

Definition statement

This place covers:

Details of the surface of the striking face, e.g. special groove features, other protrusions or indentations.

Special rules of classification

Note that with the exception of putters, almost all golf clubs have a grooved striking face. This subgroup is only for golf clubs in which the surface is specified in detail.

A63B 53/045

{Strengthening ribs}

Special rules of classification

If the ribs are realised by creating slits or grooves, then only the subgroup [A63B 60/52](#) should be used, unless on the impact surface, where only [A63B 53/0445](#) should be used (see definition).

Bridge-like structures on putters are generally considered normal and should not be classified here unless special.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Rib	An elongated structure that protrudes and which reinforces another surface.
-----	---

A63B 53/0454

{Strengthening ribs on the rear surface of the impact face plate}

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Heads with an impact surface provided by a face insert	A63B 53/0416
--	------------------------------

A63B 53/0458

{with non-uniform thickness of the impact face plate}

Definition statement

This place covers:

Heads having an impact face plate where the cross-section along at least one axis discloses a non-uniform thickness. This should apply even if a cross-section in another axis might be uniform.

A63B 53/0462

{characterised by tapering thickness of the impact face plate}

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Tapering	A gradually diminishing thickness, without any non-diminishing portions or steps there between, either from one side of the face to another side of the face, or from the centre of the face outwards.
----------	--

A63B 53/0466

{wood-type}

Definition statement

This place covers:

Traditional wooden golf club heads, and also heads made of other materials but similar in shape to traditional wooden heads, e.g. US2009258727 (see image below). The front-to-rear length of the head is normally greater than the height, providing for a centre of gravity positioned far behind the striking face. These heads are for long-distance shots.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

A wood-type golf club head	has a large, bulbous form usually with a convexly curved strike face and is used for hitting the ball long distances. They were traditionally solid wooden heads, but are nowadays usually in the form of hollow shells using strong, lightweight materials, e.g. titanium, fibre composite.
----------------------------	--

Synonyms and Keywords

Hybrid club: a hybrid club combines the playing characteristics of both woods and irons.

Hybrid wood: a club which has a convexly curved strike face like a wood but which is usually lower from crown to sole than a wood and does not extend as far back from the strike face to the rear of the head. It may be solid or hollow.

A63B 53/047

{iron-type}

Definition statement

This place covers:

Golf club heads resembling the type that was traditionally made of solid iron or steel, typically with a large, flat, angled striking face, usually having grooves to increase friction with a golf ball, e.g.

Definition statement

GB2451317 (see image below). This group also club heads of similar shape but made of other materials.

Special rules of classification

Irons with a cavity back, i.e. perimeter weighting but with the cavity open towards the rear of the club, should be classified here.

Irons with a hollow space which is completely closed on all sides including towards the rear should be classified in [A63B 53/0475](#).

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Iron -type golf club head	traditionally has a thin, blade-like body, usually with a planar strike face, and is made of iron or steel (forged or cast). Similar-shaped heads made of other materials, e.g. titanium, fibre composite, also fall into this category.
Cavity backs	Many irons feature peripheral weighting on some or all of the perimeter of the rear surface. Irons with weighting around most or all of the perimeter are known as "cavity backs".

A63B 53/0475

{with one or more enclosed cavities}

Definition statement

This place covers:

Irons with a hollow space which is completely closed on all sides and towards the rear.

Examples:

US2005209023

US2004266550

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Hybrid wood	A63B 53/0466
-------------	------------------------------

Special rules of classification

Irons with a cavity back, i.e. perimeter weighting but with the cavity open towards the rear of the club, should be classified in [A63B 53/047](#).

Synonyms and Keywords

Hybrid club	a hybrid club combines the playing characteristics of both woods and irons.
Hybrid iron	a club which has a flat strike face like a traditional iron but which usually has an enclosed volume behind the strike face, providing a larger moment of inertia and a centre of gravity which is displaced further behind the strike face compared with a traditional iron.

A63B 53/0487

{for putters ([A63B 53/065](#) takes precedence)}

Definition statement

This place covers:

e.g. US2007243950

When the adjustment takes place in the joint structure between the head and the shaft	A63B 53/022
Devices for measuring, verifying, correcting or customizing characteristics of golf-clubs, bats or rackets	A63B 60/42

Special rules of classification

Golf club heads with added weights, e.g. changeable, replaceable, but not otherwise adjustable, should be classified in [A63B 2053/0491](#) and one or more of [A63B 53/0466](#), [A63B 53/047](#) and [A63B 53/0475](#).

A63B 53/065

{for putters}

Definition statement

This place covers:

Putter heads with some form of adjustment means for varying the characteristics of the head, whereby the adjustment does not consist solely of changeable or replaceable added weights, or whereby the adjustment does not take place in the joint structure between the head and the shaft.

Image below shows a golf putter head 3, with head body 4 having a rotatable faceplate 3 that rotates about axis (X).

Special rules of classification

Putter heads with added weights, e.g. changeable, replaceable, but not otherwise adjustable, should be classified in [A63B 2053/0491](#), [A63B 60/02](#) and [A63B 53/0487](#).

A63B 53/08

with special arrangements for obtaining a variable impact

Definition statement

This place covers:

Golf clubs with some form of adjustment means for varying the characteristics of the club, e.g. the club's balance or centre of gravity. See for example WO2007111272, which displays a changing head weight (see image below).

Substantially flexible shafts, hinged shafts	A63B 60/0081
Telescopic shafts	A63B 60/0085
Weighted handle	A63B 60/24
Means for damping vibration	A63B 60/54
Shaft materials	A63B 2209/00
Size reducing arrangements for stowing or transport	A63B 2210/50
Shaping composites, i.e. plastics material comprising reinforcements, fillers or preformed parts, e.g. inserts	B29C 70/00
Layered products characterised by the non-homogeneity or physical structure, i.e. comprising a fibrous, filamentary, particulate or foam layer; Layered products characterised by having a layer differing constitutionally or physically in different parts	B32B 5/00
Manufacture of articles or shaped materials containing macromolecular substances	C08J 5/00

Special rules of classification

Considering that all golf clubs have a shaft, classifying in this group is not required for documents mentioning a particular type of shaft, if the shaft itself is not important for the invention disclosed, and is well known per se; in such a case, classifying the invention alone in the relevant groups is considered sufficient.

This group is also not required for documents disclosing a golf club, in which the otherwise well-known shaft is chosen to provide a golf club with specific characteristics. For example, a golf club with a carefully selected resonant frequency based on the length and stiffness of the shaft and the mass of the club head should be classified in [A63B 53/00](#) and [A63B 60/002](#), a set of such clubs should also be classified in [A63B 53/005](#).

Documents relating to methods of manufacturing composite shaft should also be classified in [B29C](#).

Characteristics of materials are classified in [A63B 2209/00](#) and subgroups, e.g. long, oriented fibres, e.g. wound filaments, woven fabrics, and mats [A63B 2209/023](#).

A63B 53/12

Metallic shafts

Definition statement

This place covers:

This class is for shafts made of metallic materials.

References

Limiting references

This place does not cover:

Shafts made of a composite material comprising metallic and non-metallic materials	A63B 53/10 , A63B 60/00 , A63B 60/46
--	---

Special rules of classification

This class is not required for documents mentioning a particular type of metallic shaft if the shaft itself is not important to the invention disclosed and is well known per se; in such a case, classifying the invention alone is considered sufficient.

This class is also not required for documents disclosing a golf club in which an otherwise well known metallic shaft is chosen to provide a golf club with specific characteristics. For example, a golf club with a carefully selected resonant frequency based on the length and stiffness of the shaft and the mass of the club head should be classified in [A63B 53/00](#) and [A63B 60/002](#) ; a set of such clubs should also be classified in [A63B 53/005](#)

A63B 53/14

Handles

Definition statement

This place covers:

This class is for documents relating to the area or areas of the golf club gripped by the golfer when playing golf. It is for grips covering a part or parts of the club shaft. It is also for "gripless" shafts, i.e. shafts intended to be grasped directly by the hands of the golfer without an attached grip member.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

A63B 60/006

{Surfaces specially adapted for reducing air resistance}

Definition statement

This place covers:

Details of the surface, e.g. dimpled.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Surfaces reducing air resistance, in general	F15D 1/12
--	---------------------------

Special rules of classification

Forms, profiles or through holes for reducing air resistance (i.e. special aerodynamic features that are not related to specific details of the surface) are classified in [A63B 2225/01](#).

A63B 60/0081

{Substantially flexible shafts; Hinged shafts}

Definition statement

This place covers:

Flexible shafts (with or without a hinge).

Shafts with a hinge (independent of whether the hinged parts are flexible on their own or not).

Shafts with a certain degree of stiffness, independent of whether the flexibility is explicitly mentioned, as both flexibility and stiffness are relative terms that refer to the same property (i.e. a bigger or smaller degree of bendability).

References

Limiting references

This place does not cover:

Allowing adjustable angular orientation of the head of a golf club with respect to the shaft of the golf club	A63B 53/023
---	-----------------------------

A63B 60/0085

{Telescopic shafts}

Definition statement

This place covers:

Telescopic shafts, handles and grips of rackets, golf clubs and every other kind of sport clubs and bats.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

Handles, grips and also shafts (when the shaft is used for gripping the apparatus) adjustable in length and which are not telescopic	A63B 60/28

------------------------------------	------------------------------

Sensors arranged on the exercise apparatus or sports implement

[A63B 2220/833](#)

A63B 60/48

with corrugated cross-section

Definition statement

This place covers:

Special rules of classification

Handles or grips contoured to the anatomy of the user's hand are additionally classified in [A63B 60/12](#).

A63B 60/50

with through-holes ([A63B 60/18](#) takes precedence; for stringing purposes [A63B 49/00](#))

Definition statement

This place covers:

Used for non-elongated holes traversing the solid parts of the bat (can also be the blade, if solid). It is also used for important holes in the bat, even if they do not exactly traverse the bat completely (i.e. "through" has to be understood in a broad way).

Definition statement

Only used for through holes which have not been subsequently filled-in with another material. However, it is used when only a lid or a cap has been placed on the through hole, subsequently covering it but not completely filling it in.

Example of through holes completely traversing the shaft.

Example of through holes completely traversing a solid blade.

Example of important holes (8, 10) in the frame, not exactly traversing it, but still of an special relevance. US patent 5,232,220.

Tethered playing balls or other tethered playing bodies supported on a tethering arm	A63F 2007/4093

A63B 69/00**Training appliances or apparatus for special sports (training of parachutists [B64D 23/00](#))****Definition statement***This place covers:*

Mechanical aspects of training appliances or apparatus.

Relationships with other classification places

[A63B 69/00](#) and its subgroups deal with the mechanical features of training appliances or apparatus used when training for sports. Some groups and subgroups in subclass [A63B](#) are used for additional information and may cause confusion:

- [A63B 24/00](#), which relates to electric or electronic controls for apparatuses classified in other groups and subgroups of [A63B](#) (not [A63B 71/06](#)).
- [A63B 71/06](#), which relates to different kinds of indicating devices for sports for apparatuses classified in other groups and subgroups of [A63B](#).
- [A63B 2220/00](#), for measuring of physical parameters relating to sporting activity.
- When the invention disclosed in a document does not lie in a mechanical sports device or the electronic controlling thereof with a mechanical effect on the device, it should not be classified in [A63B](#) (at least not as "invention information").

References**Limiting references***This place does not cover:*

Training of parachutists	B64D 23/00
--------------------------	----------------------------

Informative references*Attention is drawn to the following places, which may be of interest for search:*

Exercising apparatus for developing or strengthening the muscles or joints of the body by working against a counterforce	A63B 21/00
Exercising apparatus specially adapted for particular parts of the body	A63B 23/00
Measuring movement of entire body or parts thereof	A61B 5/11

Measuring muscular strength for diagnostic purposes	A61B 5/22
Apparatus for passive exercising or massage	A61H
Video games	A63F 13/00
Exercising for producing mechanical power	F03G 5/00
Archers' finger tabs	F41B 5/1473
Measuring of sport goods in general	G01B 5/0023
Measure arrangements characterised by the use of optical means	G01B 11/00
Systems for determining distance or velocity using ultrasonic, sonic, or infrasonic waves	G01S 11/14
Systems using reflection of acoustic waves	G01S 15/00
Systems using reflection of electromagnetic waves, velocity or trajectory	G01S 17/58
GPS – receivers – sporting applications	G01S 19/19
Controlling member being movable by hand, e.g. joystick	G05G 9/047
Input interaction (Gesture, VR, GUI)	G06F 3/01
Data acquisition and logging	G06F 17/40
Performance analysis	G06Q 10/0639
Analysis of motion	G06T 7/20
Recognition of whole body movements, e.g. for sport training	G06V 40/23
Race time recorders	G07C 1/24
Simulators for teaching or training	G09B 9/00
Devices for exercising or strengthening of fingers or arms in teaching music	G09B 15/06
Teaching repetitive work cycles; Sequence of movements; sport	G09B 19/0038
Rhythm (Matching music to exercise)	G10H 1/40
Synchronising audio tracks of files	G10H 2240/325
ICT specially adapted for therapies or health-improving plans relating to physical therapies or activities, e.g. physiotherapy, acupressure or exercising	G16H 20/30

Special rules of classification

The control aspect should be classified in [A63B 24/00](#)

The interface features (indicating or scoring devices) should be classified in [A63B 71/06](#)

The sensors should be classified in [A63B 2220/00](#) or [A63B 2230/00](#)

The position of the user should be classified in [A63B 2208/00](#)

The specific sport should be classified in [A63B 2243/00](#) or [A63B 2244/00](#), unless covered by the title of the group.

A63B 69/0002**{for baseball}****Definition statement***This place covers:*

Baseball, e.g. softball or rounders.

Special rules of classification

Depending on whether it is used for baseball, softball or rounders, this subgroup always needs to be complemented by, respectively, the following codes.

Baseball, softball or rounders	A63B 2102/18
--------------------------------	------------------------------

A63B 69/0013**{Baseball bases}****Definition statement***This place covers:*

Baseball mounds also.

References**Informative references***Attention is drawn to the following places, which may be of interest for search:*

Apparatus for setting-out or dividing courts, in general	A63C 19/06
--	----------------------------

A63B 69/002**{for football (American-football dummies [A63B 69/34](#))}****Definition statement***This place covers:*

Training appliances or apparatus for:

- Association football (more commonly known as football or soccer); or
- American football.

References**Limiting references***This place does not cover:*

American-football dummies	A63B 69/34
---------------------------	----------------------------

Special rules of classification

Depending on whether it is used for Association or American football, this subgroup always needs to be complemented by, respectively with the following codes:

Association football (soccer)	A63B 2243/0025
American football	A63B 2243/007

A63B 69/0022

{for skating}

Punching balls {, e.g. for boxing; Other devices for striking used during training of combat sports, e.g. bags}

Definition statement

This place covers:

Training devices subjected to strikes or blows by a person training in a combat sport including: punching bags, punching balls, pads held or attached to the human body, and striking dummies.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Golf tees	A63B 57/10
Means for releasably holding a ball in position; Balls constrained to move around a fixed point, e.g. by tethering	A63B 69/0073
Dummies, e.g. for boxing or American football	A63B 69/34

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Punching ball	Devices which move and return fast due to their low inertia when subject to strikes or blows; mainly designed to be hit at resonant frequency
---------------	---

Synonyms and Keywords

In patent documents, the following words/expressions are often used as synonyms:

- Punching ball
- Speed bag

A63B 69/215

{Anthropomorphic devices}

Definition statement

This place covers:

Striking devices having an anthropomorphic shape or resemblance.

Illustrative example of subject matter classified in this group:

A63B 69/22

mounted on, or suspended from, a fixed support

Definition statement

This place covers:

Punching balls, punching bags or other striking devices mounted on or suspended from a stationary support during the striking activity. The support may be adjusted or repositioned when not in use and the training device, e.g. the ball or bag, may move when struck, but the overall structure remains in place during the exercise.

Illustrative example of subject matter classified in this group:

Definition statement

A punching ball mounted on a fixed support. The height of the ball is adjustable but remains set once the punching exercise begins.

Illustrative example of subject matter classified in this group:

A punching ball suspended from a fixed support. The height of the ball is adjustable but remains set once the punching exercise begins.

A63B 69/24**mounted on, or suspended from, a movable support****Definition statement***This place covers:*

Punching balls, punching bags or other striking devices mounted on or suspended from a support set in motion during the striking activity. The motion of the training device should be an added feature to enhance the training experience, with said motion imparted independent from the striking activity.

Illustrative example of subject matter classified in this group:

A punching target mounted on a movable support. The target is set in motion by a motor and drive shaft during the punching exercise, and a sensor detects movement by the user to alter the motion of the target.

Illustrative example of subject matter classified in this group:

Punching bags mounted on a movable support. The carousel and track system supporting the punching bags are set in motion with a motor and produce unpredictable movements. Alternatively,

the carousel and track system are designed to produce unpredictable movements without a motor in response to the punching force from the user.

A63B 69/34

{Tackling, blocking or grappling dummies, e.g.} boxing or {wrestling or American-} football dummies

Definition statement

This place covers:

Tackling, blocking or grappling dummies.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Hanging heavy punching bags	A63B 69/305
Manipulators	B25J

Special rules of classification

This subgroup should always be complemented with the appropriate code in [A63B 2102/00](#), [A63B 2243/00](#) or [A63B 2244/00](#) relating to the specific sport or sports for which the dummy is used.

Boxing dummies used for punching or striking training are classified in [A63B 69/20](#) and subgroups, e.g. [A63B 69/215](#).

A63B 69/36

for golf

Definition statement

This place covers:

Mechanical aspects of training appliances or apparatus used when training golf, i.e. mechanical equipment which is not normally used during the game of golf.

Relationships with other classification places

[A63B 69/36](#) and its subgroups deal with the mechanical features of training appliances or apparatus used when training golf. Some groups and subgroups in subclass [A63B](#) are used for additional information and may cause confusion:

- [A63B 24/00](#), which relates to electric or electronic controls for apparatuses classified in other groups and subgroups of [A63B](#) (not [A63B 71/06](#)).

Relationships with other classification places

- [A63B 71/06](#), which relates to different kinds of indicating devices for sports for apparatuses classified in other groups and subgroups of [A63B](#).
- [A63B 2220/00](#), for measuring of physical parameters relating to sporting activity.

When the invention disclosed in a document does not lie in a mechanical sports device or the electronic controlling thereof with a mechanical effect on the device, it should not be classified in [A63B](#) (at least not as "invention information").

{Striking surfaces with impact indicating means, e.g. markers}

Definition statement

This place covers:

Means indicating the actual impact point, i.e. point of contact, with the ball.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Means indicating the preferred impact point for normal golf clubs, i.e. visual indicators for aligning the golf club	A63B 53/0441
Visual indicators for training purposes for indicating the preferred impact point or aligning the golf club	A63B 69/3632
Visual indicators for putting training purposes for indicating the preferred impact point or aligning the putter	A63B 69/3685

Special rules of classification

Note: the means indicate the actual impact point, i.e. point of contact, with the ball; means indicating the preferred impact point for normal golf clubs should be coded in [A63B 53/0441](#), and for training purposes in [A63B 69/3632](#) or [A63B 69/3685](#).

A63B 69/3621

{Contacting or non-contacting mechanical means for guiding the swing}

Definition statement

This place covers:

Contacting and non-contacting mechanical (i.e. not only visual) means for guiding the swing. "Non-contacting mechanical means" means that there would be contact only if the movement is executed

wrongly. Thus, it is valid for any type of device that the club contacts during the swing OR would contact if used wrongly (within the normal limits of a swing).

The following figure that shows an example of non-contacting means.

Devices for protection, storage or transport for golf clubs, bats, rackets or the like	A63B 60/56

Application-oriented references

Examples of places where the subject matter of this place is covered when specially adapted, used for a particular purpose, or incorporated in a larger system:

Devices for handling, treating or holding balls	A63B 57/20
---	----------------------------

Informative references

Attention is drawn to the following places, which may be of interest for search:

Space saving in sport equipment	A63B 2210/00
Sport bags	A45C 2003/007
Hand-propelled vehicles for transporting sport articles	B62B 2202/40

A63B 71/0045

{specially adapted for games played with rackets or bats ([A63B 60/56](#) takes precedence)}

Definition statement

This place covers:

Accessories for stowing, putting away or transporting exercise apparatus or sports equipment, specially adapted for games played with rackets or bats.

References

Limiting references

This place does not cover:

Devices for protection, storage or transport for golf clubs, bats, rackets or the like	A63B 60/56
--	----------------------------

Automatically producing a series of tones	G10H 1/26
Regulating music	G10H 1/40

Synonyms and Keywords

cadence = strokes, strides etc per second.

A63B 2071/0694**{Visual indication, e.g. Indicia}****Relationships with other classification places**

This code typically is used with multiple classifications, exemplified as follows.

The following image shows an example of a typical document for training a golf swing (thus, classified in [A63B 69/3623](#)) and which is further classified in [A63B 2071/0694](#) because of the alignment rods that give the golfer the visual indication of the actual target line.

FIG. 5

FIG. 6

The following image shows an example of use of [A63B 2071/0694](#) for classifying the pose markings of a mat for learning yoga.

The next image shows use of [A63B 2071/0694](#) for classifying the reference markings (95) on the crown of a golf club head.

FIG. 1

Bats with through holes	A63B 60/50
-------------------------	----------------------------

A63B 2225/02**Testing, calibrating or measuring of equipment****References****Limiting references***This place does not cover:*

Measuring or verifying ball characteristics	A63B 47/008
Measuring or verifying club, bat or racket characteristics	A63B 60/42

A63B 2225/05**with suction cups****References****Limiting references***This place does not cover:*

Suction cups used as force resisting device	A63B 21/0089
---	------------------------------

A63B 2225/08**with writing point****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Golf tees with writing means	A63B 57/18
------------------------------	----------------------------

A63B 2225/093**Height****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Telescopic systems with locking in discrete positions	F16B 7/105
---	----------------------------

A63B 2225/10**Multi-station exercising machines****Definition statement***This place covers:*

e.g. radially extending from a central linking element.

References**Limiting references***This place does not cover:*Compound apparatus for fitness training: [A63B 23/03558](#) takes precedence

A63B 2225/15

with identification means that can be read by electronic means

Definition statement

This place covers:

e.g. a smart card.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Identification of a person	A61B 5/117
Record carriers for use with machines	G06K 19/00
Individual entry or exit registers	G07C 9/00
Cards for payment	G07F 7/00

A63B 2225/20

with means for remote communication, e.g. internet or the like

Definition statement

This place covers:

networking.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

with wireless data transmission	A63B 2225/50
PDA	G06F 1/1626
digital computing special functions	G06F 17/00
advertising	G09F 23/00

A63B 2225/605

Floating

References**Limiting references**

This place does not cover:

Exercising apparatus comprising buoyant volumes to be submerged	A63B 21/0606
Inflatable apparatus	A63B 2225/62

A63B 2225/62**Inflatable****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Fluid filled, e.g. air-filled body protectors	A63B 71/081
---	-----------------------------

A63B 2225/72**Means preventing unauthorised use, e.g. by lowering a tennis net****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Stopping the operation of the apparatus	A63B 2071/0081
---	--------------------------------

A63B 2230/00**Measuring physiological parameters of the user****References****Limiting references***This place does not cover:*

Measuring correct grip size	A63B 2060/462
-----------------------------	-------------------------------

Informative references*Attention is drawn to the following places, which may be of interest for search:*

Game controllers involving biosensors worn by the player, e.g. for measuring heart beat, limb activity	A63F 2300/1012
--	--------------------------------

A63B 2230/30**blood pressure ([A63B 2230/04](#) takes precedence)****References****Limiting references***This place does not cover:*

Heartbeat characteristics, e.g. E.G.C., blood pressure modulations	A63B 2230/04
--	------------------------------

A63B 2230/50**temperature****References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Measuring temperature	A63B 2220/72
-----------------------	------------------------------

A63B 2230/75**calorie expenditure****Definition statement**

This place covers:

This code is used even where the calorie consumption is calculated from other measurements, rather than directly measured.

Also indicated as MET (Metabolic Equivalent of Task).

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Computing aids in which the computing members form at least part of the displayed result and manipulated directly by hand, e.g. abacus, pocket adding device	G06C 1/00
--	---------------------------

A63B 2243/00

Specific ball sports not provided for in [A63B 2102/00](#) - [A63B 2102/38](#)

Special rules of classification

This group and its corresponding subgroups are only used when the relevant sport/s is/are not unambiguously clear from any other of the symbols allocated.

A63B 2243/0025**Football****References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

American football	A63B 2243/007
-------------------	-------------------------------

Special rules of classification

This group is intended for the game of soccer

A63B 2244/00**Sports without balls****Special rules of classification**

The corresponding subgroups of this subgroup are only used when the relevant sport/s is/are not unambiguously clear from any other of the symbols allocated.

A63B 2244/088**hurdling****Definition statement**

This place covers:

Running and jumping over an obstacle at speed.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Hurdles or the like and athletic hurdles	A63K 3/04 , A63K 3/043
Road signs or traffic signals in the form of a three-dimensional body	E01F 9/654

A63B 2244/10**Combat sports****References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Rugby, American football	A63B 2243/0066
--------------------------	--------------------------------

A63B 2244/102**Boxing****References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Boxing rings	A63C 19/005
--------------	-----------------------------

A63B 2244/22**Dancing****Definition statement**

This place covers:

All types of dancing, including ballet.

A63B 2244/225**Pole dancing****Definition statement**

This place covers:

Rigid poles and also swaying rods.

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

Climbing poles	A63B 9/00
Supports for anchoring force resistors between horizontal surfaces, e.g. floor and ceiling	A63B 21/1681
