**A47B**

**TABLES; DESKS; OFFICE FURNITURE; CABINETS; DRAWERS; GENERAL DETAILS OF FURNITURE (furniture jointing F16B)**

**Definition statement**

*This place covers:*

This sub-class relates largely to office and domestic furniture. Some industrial furniture is included in the sub-groups relating to cabinets, racks and shelf-units. This subclass covers: Tables or desks characterised by structural features

Tables or desks characterised by adaptation for particular purposes

School benches or desks

Cabinet; racks; shelf units; similar furniture

Furniture combinations

Details of furniture: -

- Feet for furniture
- Fittings for furniture
- Details of cabinets, racks or shelf units (bars, uprights, struts, shelves, brackets, furniture panels)
- Miscellaneous furniture and miscellaneous accessories for furniture

Furniture classification is separated into 2 broad fields:

- furniture type e.g. bottle rack or sectional furniture etc.
- functional furniture e.g. folding tables or height adjustable shelves.

Classification may be necessary in both the furniture type(s) and functional furniture fields.

The drawings in the definition statements are only indicative as an example of the group or sub-group definition and encompass of course many other embodiments

**Relationships with other classification places**

Generally this sub-class does not cover transport devices or systems as covered in B65G or specific furniture, fittings or accessories for shops as covered in A47F, although it is clear that certain subject matter is common to these sub-classes.

It is clear that certain items of furniture (e.g. brackets, rails) may be classified in many different sub-classes of differing technical areas, however, the following general rules should be applied:

For components of furniture covered by specific subclasses e.g. A47F - shop furniture; E06B - doors:

If relevant for their structural and/or functional association with the furniture item, are classified in A47B.

If relevant only per se are not classified in A47B, but in the specific subclass of the item concerned.

### Special rules of classification

**Classification in head group and sub-groups**

If a document concerns embodiments which are covered by several sub-groups (e.g. A47B 1/02 and A47B 1/10) dependent upon a higher hierarchy group e.g.head group A47B 1/00, the following rules apply:

- the specific technical information relevant for some of the sub-groups is classified (EC) in all said sub-groups.
- if relevant, the structural association (e.g. the combination) of the elements covered by the sub-groups is classified (EC) in the head group; the document may also be Indexing Code for the sub-groups concerned.
- analogously, if generic technical information common to a number of the sub-groups is disclosed and only schematic embodiments of the specific subgroup embodiments are represented, the document is classified (EC) in the head group and may be Indexing Code for the subgroups.

**Classification of additional information:**

| Hand carts/trolleys          | B62B |
| Containers/packaging         | B65D |
| Refuse receptacles           | B65F |
| Storing articles in warehouses or magazines | B65G |
| Laundering, drying, ironing  | D06F |
| Partitions in general building construction | E04B |
| Locks (including E05B 1/0015 - mounting of knobs/handles not operating the bolt/lock) | E05B |
| Bolts or fastening devices for wings (incl. touch/latch mechanisms E05C 19/022) | E05C |
| Hinges                        | E05D |
| Closers or openers for wings  | E05F |
| Doors/windows                 | E06B |
| Devices for fastening or securing constructional elements | F16B |
| Furniture joints              | F16B 12/00 |
| Pipes, joints or fittings for pipes | F16L |
| Frames, supports or stands for apparatus in general | E16M |
| Structural combinations of lighting devices with other parts | F21V 33/00 |
| Domestic stoves or ranges     | F24B, F24C |
| Fridges (shelves/drawers for fridges F25D 25/02) | F25D |
| Displaying/advertising, signs, labels | G09F |
| Electric plugs; electrically-conductive connections | H01R |
| Boards, desks, casings, substations or switching arrangements for electric power | H02B |
| Installation of electric cables or lines | H02G |
| Printed circuits, casings or constructional details of electric apparatus | H05K |
Although not compulsory, in many cases the classification of additional information (e.g. particular technical aspect of a piece of furniture) may be useful in classification and subsequent retrieval of such documents and is therefore considered very desirable.

-The reference to tables or desks in this sub-class and particularly in the sub-groups A47B 13/00, A47B 19/00, A47B 21/00, A47B 27/00 and A47B 41/00 isn’t relevant per se. Dependent upon the nature of the context, these terms may be considered to be synonymous. Furthermore, the term ‘tables’ covers also tables OR underframes therefor for other than domestic use.

For the sub-groups concerning technical features of tables and desks (i.e. A47B 1/00 - A47B 41/06) it is noted that the technical features of the sub-groups themselves are defining rather than, in some cases, their terms of description.

The terms 'cabinets' or 'racks' in the sub-groups A47B 43/00 - A47B 96/20 cover also cabinets or racks for storage in general.

**A47B 1/00**

**Extensible tables (extensible shelf units A47B 46/00)**

**A47B 3/06**

**with separable parts**

**Definition statement**

*This place covers:*

Subject matter in which at least one of the parts of the table is attached to one or more of the other parts in the use configuration, the parts being capable of being disconnected from each other without destruction of the essential structures of the parts and without the use of tools (i.e., so that the parts may be immediately reassembled to form the table) in order to transform the assembly to the non-use configuration and back to the use configuration multiple times.

**A47B 83/021**  
{with seats stowable beneath table top}

**Definition statement**

*This place covers:*

Subject matter in which the seats are movable from a use position to a stored position located substantially completely beneath the top surface of the table.

**A47B 83/0213**  
{by pivotal movement}

**Definition statement**

*This place covers:*

Subject matter in which the seats rotate about a fixed axis or fixed point between the use position and the stored position beneath the table.

**A47B 83/0215**  
{by sliding movement, e.g. on track or guide}

**Definition statement**

*This place covers:*

Subject matter in which a portion of the seats are supported by sliding contact with a linear or curvilinear guide or the portion of the seats is supported by the guide through one or more interposed bearings (rolling or otherwise) or wheels as the seat is moved between the use position and the stored position. The guide has distinct ends along the path of travel of the seat portion (e.g., in contrast to a guide having the form of a cylindrical shaft around which the seat portion rotates).

**A47B 83/023**  
{Booth-type arrangements}

**Definition statement**

*This place covers:*

Subject matter including seats on the opposite sides of the table and an additional structure such that a partially enclosed compartment is formed and defined by the table, seats, and additional structure.

**A47B 83/024**  
{having opposed benches without backs, e.g. of the picnic type}

**Definition statement**

*This place covers:*

Subject matter in which the seats are located on opposite sides of the table, each seat is a bench (i.e., a horizontally extending support having plural seating portions and sized to accommodate a plurality of seated persons) that has no back rest.
