</tbody>
</table>

*N = new entries where reclassification into entries is involved; C = entries with modified file scope where reclassification of documents from the entries is involved; Q = new entries which are firstly populated with documents via administrative transfers from deleted (D) entries. Afterwards, the transferred documents into the Q entry will either stay or be moved to more appropriate entries, as determined by intellectual reclassification; T = existing entries with enlarged file scope, which receive documents from C or D entries, e.g. when a limiting reference is removed from the entry title; M = entries with no change to the file scope (no reclassification); D = deleted entries; F = frozen entries will be deleted once reclassification of documents from the entries is completed; U = entries that are unchanged.

NOTES:

- **No curly brackets are used for titles in CPC only subclasses, e.g. C12Y, A23Y; 2000 series symbol titles of groups found at the end of schemes (orthogonal codes); or the Y section titles. The curly brackets are used for 2000 series symbol titles found interspersed throughout the main trunk schemes (breakdown codes).**

- U groups: it is obligatory to display the required “anchor” symbol (U group), i.e. the entry immediately preceding a new group or an array of new groups to be created (in case new groups are not clearly subgroups of C-type groups). Always include the symbol, indent level and title of the U group in the table above.
CPC NOTICE OF CHANGES 1594

DATE: JANUARY 1, 20224

PROJECT MP1 1966

- All entry types should be included in the scheme changes table above for better understanding of the overall scheme change picture. Symbol, indent level, and title are required for all types.
- “Transferred to” column must be completed for all C, D, F, and Q type entries. F groups will be deleted once reclassification is completed.
- When multiple symbols are included in the “Transferred to” column, avoid using ranges of symbols in order to be as precise as possible.
- For administrative transfer of documents, the following text should be used: “<administrative transfer to XX>”, “<administrative transfer to XX and YY simultaneously>”, or “<administrative transfer to XX, YY, ... and ZZ simultaneously>” when administrative transfer of the same documents is to more than one place.
- Administrative transfer to main trunk groups is assumed to be the source allocation type, unless otherwise indicated.
- Administrative transfer to 2000/Y series groups is assumed to be “additional information”.
- If needed, instructions for allocation type should be indicated within the angle brackets using the abbreviations “ADD” or “INV”: <administrative transfer to XX ADD>, <administrative transfer to XX INV>, or <administrative transfer to XX ADD, YY INV, ... and ZZ ADD simultaneously>.
- In certain situations, the “D” entries of 2000-series or Y-series groups may not require a destination (“Transferred to”) symbol, however it is required to specify “<no transfer>” in the “Transferred to” column for such cases.
- For finalization projects, the deleted “F” symbols should have <no transfer> in the “Transferred to” column.
- For more details about the types of scheme change, see CPC Guide.
2. A. DEFINITIONS (new)

E21B 7/002

Definition statement

This place covers:

Drilling devices with multiple shafts in the borehole that are independently driven or one shaft is driven relative to another.

References

Limiting References

This place does not cover:

Drilling a non-circular hole E21B 7/001

Informative References

Attention is drawn to the following places, which may be of interest for search:

Informative References

Attention is drawn to the following places, which may be of interest for search:

| Magnetic or electric prospecting        | G01V 3/00 |

E21B 47/138

Definition statement

This place covers:

Devices or carriers that are flowable with or through fluids in the well for performing measurements or for transmitting data, control or actuating signals.
E21B 49/0815

References

Informative References
Attention is drawn to the following places, which may be of interest for search:

| Bailers | E21B 27/00 |

E21B 2200/20

Special rules of classification
Subject matter classified here should include significant or specific details of modeling or simulating.

E21B 2200/22

References

Informative References
Attention is drawn to the following places, which may be of interest for search:

| Fuzzy logic, artificial intelligence, neural networks per se | G06N |

Special rules of classification
Subject matter classified here should include significant/specific details of fuzzy logic, artificial intelligence, neural networks, or the like.
2. A. DEFINITIONS (modified)

**E21B 4/00**

**Definition statement**

Replace: The existing Definition statement TEXT with the updated text below. Do NOT update image.

Drives located inside the borehole for powering drilling units.

Illustrative example of subject matter classified in this place:

**References**

**Informative references**

Replace: The reference text for the symbol F04C 2/107 as shown below:

| Rotary-piston machines with helical teeth, e.g. Moineau motors | F04C 2/107 |

**E21B 7/128**

**References**

**Informative references**

Insert: The following new row to the Informative references table:

| Floating drilling platforms | B63B 35/44 |

**E21B 17/206**

**References**

**Informative references**

Insert: The following new row to the Informative references table:
Flexible electrical cables in boreholes

**E21B 19/002**

**Definition statement**

*Replace:* The existing Definition statement TEXT with the updated text below. Do NOT update image.

Handling and supporting of tubulars in relation to underwater drilling operations other than feeding the drill string into the borehole or controlling the weight on bit.

Illustrative example of subject matter classified in this place:

**E21B 19/14**

**Definition statement**

*Replace:* The existing Definition statement with the updated one below.

Storage of rods and handling of rods between storage and a position where the rods can be connected or disconnected.

**E21B 19/20**

**Definition statement**

*Replace:* The existing Definition statement TEXT with the updated text below. Do NOT update image.

The combination of feeding from rack and connecting.

Illustrative example of subject matter classified in this place:
Definition statement

Replace: The existing Definition statement TEXT with the updated text below. Do NOT update image.

Illustrative example of subject matter classified in this place:

References

Insert: The following new Informative references section and table.

Informative references
Attention is drawn to the following places, which may be of interest for search:

| Junk baskets for fishing | E21B 31/08 |

E21B 33/06

References

Informative references

E21B 41/005

References

Informative references
Insert: The following new row to the Informative references table:
Treating radioactively contaminated material; Decontamination arrangements therefor

E21B 43/003

Definition statement

Insert: The following new Definition statement.

Processes for inducing vibrations in earth formations using tools inside the borehole or at the surface.

E21B 43/08

References

Insert: The following new row to the Informative references table:

Informative references
Attention is drawn to the following places, which may be of interest for search:

| Separation, filters in general | B01D |

E21B 43/11

Definition statement

Replace: The existing Definition statement TEXT with the updated text below. Do NOT update image.

Perforators and guns used to create apertures in casing or formation in order to establish a fluid communication with the reservoir for the production of oil or gas. Included are details about construction, ignition, communication and placement.

Illustrative example of subject matter classified in this place:
E21B 43/28

Definition statement

Replace: The existing Definition statement TEXT with the updated text below. Do NOT update image.

Production of minerals other than hydrocarbons by dissolving them in situ with a dissolving agent.

Illustrative example of subject matter classified in this place:

References

Replace: The Informative references table with the updated table below.

Informative references

Attention is drawn to the following places, which may be of interest for search:

| Methods or apparatus for cleaning boreholes or wells using chemical means for removing paraffins and other substances from the wellbore | E21B 37/06 |
| Methods or apparatus for cleaning boreholes or wells using steerable or laterally extendable nozzles | E21B 43/292 |

E21B 43/34

Definition statement

Replace: The existing Definition statement TEXT with the updated text below. Do NOT update image.

Separation of materials produced by the well.

Illustrative example of subject matter classified in this place:
**E21B 47/01**

**Definition statement**

*Replace:* The existing Definition statement with the updated one below.

Devices for mounting a data collection instrument upon a boring tool, boring tool string or cable-carried tool. Devices for shielding down-hole data collection instruments from damage.

**E21B 47/02**

**Definition statement**

*Replace:* The existing Definition statement with the updated one below.

Processes or apparatus for measuring the inclination or orientation of boreholes or devices in boreholes or wells.

**E21B 47/026**

**Definition statement**

*Replace:* The existing Definition statement with the updated one below.

Processes or apparatus for measuring the inclination, i.e. dip, or orientation, i.e. strike, of a drilled stratum, e.g. by using a specially adapted compass, e.g. a Brunton compass.

**References**

**Informative references**

*Insert:* The following new row to the Informative references table.

| Geophysics; Detecting Masses or Objects | G01V |
E21B 47/06

Definition statement

Insert: The following new Definition statement

Measurements of temperature or pressure when specific measurement techniques are disclosed, or if the temperature or pressure data is relevant for the execution of another operation.

E21B 47/10

Definition statement

Insert: The following new paragraph at the end of the existing Definition statement:

Processes or apparatus for measuring or detecting flow of oil, water, or gas, or measuring properties (e.g. electrical) of fluids.

References

Delete: The Limiting references section and table.

Insert: The following new row in the Informative references table.

Informative references

Attention is drawn to the following places, which may be of interest for search:

| Locating or determining the position of objects in boreholes or wells using impression packers | E21B 47/098 |

E21B 47/12

Definition statement

Replace: The existing Definition statement with the updated one below.
Processes or apparatus in which an information or control signal is sent to or from equipment located in the borehole over an information transmission link.

References

Informative references

Insert: The following new row in the Informative references table.

| Transmission of digital information, e.g. telegraphic communication | H04L |

E21B 49/006

Definition statement

Insert: The following new Definition statement.

Measuring wall stresses in the borehole through in-situ measurements only.

References
